Popper, Anthony D. Hawkins, Richard R. Fay, David A. Mann, Soraya Bartol, Thomas J. Carlson, Sheryl Coombs, William T. Ellison, Roger L. Gentry, Michele B. Halvorsen, Svein Løkkeborg, Peter H. Rogers, Brandon L. Southall, David G. Zeddies, William N. Tavolga, 2014-07-07 This Technical Report presents the outcome of a Working Group that was established to determine broadly applicable sound exposure guidelines for fishes and sea turtles After consideration of the diversity of fish and sea turtles guidelines were developed for broad groups of animals defined by the way they detect sound Different sound sources were considered in terms of their acoustic characteristics and appropriate metrics defined for measurement of the received levels. The resultant sound exposure guidelines are presented in a set of tables In some cases numerical guidelines are provided expressed in appropriate metrics When there were insufficient data to support numerical values the relative likelihood of effects occurring was evaluated although the actual likelihood of effects depends on the received level These sound exposure quidelines which are based on the best scientific information at the time

of writing should be treated as interim The expectation is that with more research the guidelines can be refined and more cells in the tables completed Recommendations are put forward defining the research requirements of highest priority for extending these interim exposure guidelines The Art of Dreams Barbara Hahn, Meike Werner, 2016-08-22 We all dream we all share these strange experiences that infuse our nights But we only know of those nightly adventures when we decide to represent them In the long history of coming to terms with dreams there seem to be two different ways of delineating our forays into the world of the unconscious One is the attempt of interpreting of unveiling the hidden meaning of dreams The other one is not so much concerned with the relation of dream and meaning of dream and reality it rather concentrates on trying to find means of representation for this extremely productive force that determines our sleep The essays collected in this book explore both attempts They follow debates in philosophy and psychoanalysis and they study literature theatre dance film and photography On Slowness Lutz Koepnick, 2014-10-07 Speed is an obvious facet of contemporary society whereas slowness has often been dismissed as conservative and antimodern Challenging a long tradition of thought Lutz Koepnick instead proposes to understand slowness as a strategy of the contemporary a decidedly modern practice that gazes firmly at and into the present's velocity As he engages with late twentieth and early twenty first century art photography video film and literature Koepnick explores slowness as a critical medium to intensify our temporal and spatial experiences Slowness helps us register the multiple layers of time history and motion that constitute our present It offers a timely and untimely mode of aesthetic perception and representation that emphasizes the openness of the future and undermines any conception of the present as a mere replay of the past Discussing the photography and art of Janet Cardiff Olafur Eliasson Hiroshi Sugimoto and Michael Wesely the films of Peter Weir and Tom Tykwer the video installations of Douglas Gordon Willie Doherty and Bill Viola and the fiction of Don DeLillo Koepnick shows how slowness can carve out spaces within processes of acceleration that allow us to reflect on alternate temporalities and durations Circular .1911 The Kaleidoscope of Women's Sounds in Music of the Late 20th and Early 21st Centuries Kheng K. Koay, 2015-10-05 This book traces the development of music in the late 20th and early 21st centuries with regards to the work of six women composers Sofia Gubaidulina Joan Tower Ellen Taaffe Zwilich Libby Larsen Chen Yi and Judith Weir The study integrates cultural contexts with the composers biographies their diverse compositional styles and provides in depth analyses of their musical works The Kaleidoscope of Women's Sounds in Music of the Late 20th and Early 21st Centuries offers a more detailed guide to not only these composers but also their musical characters and styles than previous studies on women s music It discusses several aspects of these women's compositional perspectives and their personal experiences as they developed their music careers The book also places emphasis on how these composers incorporated diverse musical styles and the idioms of others into the development of their own distinctly personal styles The analytical approach adopted in this book is supplemented with illustrations of musical examples in order to provide a more complete understanding of the work of these composers
