

# Sound Sculpture

**Thom Holmes**

## Sound Sculpture:

**Sound Art** Thom Holmes, 2022-04-27 Sound Art offers the first comprehensive introduction to sound art written for undergraduate students Bridging and blending aspects of the visual and sonic arts modern sound art first emerged in the early 20th century and has grown into a thriving and varied field In 13 thematic chapters this book enables students to clearly grasp both the concepts behind this unique area of art and its history and practice Each chapter begins with an exploration of key ideas and theories followed by an in depth discussion of selected relevant works both classic and current Drawing on a broad diverse range of examples and firmly interdisciplinary this book will be essential reading for anyone studying or teaching the theory history appreciation or practice of sound art *The ^AOxford Handbook of Sound Art* Jane Grant, John Matthias, David Prior, 2021-09-27 The Oxford Handbook of Sound Art surveys the practices politics and emerging frameworks of thought that now define the artistic practice of sound art **Sound Sculpture** John Grayson, 1975

**Sound Art Revisited** Alan Licht, 2019-08-22 The first edition of Sound Art Revisited published as Sound Art Beyond Music Between Categories served as a groundbreaking work toward defining this emerging field and this fully updated volume significantly expands the story to include current research since the book's initial release Viewed through a lens of music and art histories rather than philosophical theory it covers dozens of artists and works not found in any other book on the subject Locating sound art's roots across the centuries from spatialized church music to the technological developments of radio sound recording and the telephone the book traces the evolution of sound installations and sound sculpture the rise of sound art exhibitions and galleries and finally looks at the critical cross pollination that marks some of the most important and challenging art with and about sound being produced today **The ^AOxford Handbook of Sound and Image in Western Art** Yael Kaduri, 2016-07-14 The Oxford Handbook of Sound and Image in Western Art is the first book to examine under one umbrella different kinds of analogies mutual influences integrations and collaborations of audio and visual in different art forms painting sculpture installation architecture performance art animation film video art visual music multimedia experimental music sound art opera theatre and dance Sitting at the cutting edge of the field of music and visual arts the book offers a unique at times controversial view of this rapidly evolving area of study Environments of Musical Sculpture You Can Build John Grayson, Douglas Walker, Timothy Cowan, 1976 This book shows you how to invent and build your own new musical instruments and sound sculptures using mainly the materials in your environment Over 120 detailed drawings and photos show sample instruments made in this manner by people from all walks of life In addition there are over 70 pages of special music which anyone can play on his newly invented musical instruments or musical sculptures The book outlines a complete non exclusive community and environmental approach to music making where pleasure self motivation and inner satisfaction are the basic ingredients Back cover **After Sound** G Douglas Barrett, 2016-08-11 After Sound considers contemporary art practices that reconceive music beyond the limitation of sound This book is called After Sound

because music and sound are in Barrett's account different entities. While musicology and sound art theory alike typically equate music with pure instrumental sound or absolute music, Barrett posits music as an expanded field of artistic practice encompassing a range of different media and symbolic relationships. The works discussed in *After Sound* thus use performance, text, scores, musical automata, video, social practice, and installation, while they articulate a novel aesthetic space for a radically engaged musical practice. Coining the term critical music, this book examines a diverse collection of art projects which intervene into specific political and philosophical conflicts by exploring music's unique historical forms. Through a series of intimate studies of artworks surveyed from the visual and performing arts of the past ten years, Pussy Riot, Ultra red, Hong Kai Wang, Peter Ablinger, Pauline Boudry, and Renate Lorenz, and others, *After Sound* offers a significant revision to the way we think about music. The book as a whole offers a way out of one of the most vexing deadlocks of contemporary cultural criticism: the choice between a sound art effectively divorced from the formal historical coordinates of musical practice and the hermetic music that dominates new music circles today.

**Electronic Music** Nick Collins, Margaret Schedel, Scott Wilson, 2013-05-09. This accessible Introduction explores both mainstream and experimental manifestations of electronic music. From early recording equipment to the most recent multimedia performances, the history of electronic music is full of interesting characters, fascinating and unusual music, and radical technology. Covering many different eras, genres, and media, analyses of works appear alongside critical discussion of central ideas and themes, making this an essential guide for anyone approaching the subject for the first time. Chapters include key topics from synth-pop to sound art, from electronic dance music to electrical instruments, and from the expression of pure sound to audiovisuals. Highly illustrated and with a wide selection of examples, the book provides many suggestions for further reading and listening to encourage students to begin their own experiments in this exciting field.

*Interactivity and Game Creation* Anthony Brooks, Eva Irene Brooks, Duckworth Jonathan, 2021-04-09. This book constitutes the refereed post-conference proceedings of the 9th International Conference on Interactivity and Game Creation ArtsIT 2020 held in Aalborg, Denmark, in December 2020. Due to the COVID-19 pandemic, the conference was held virtually. The 28 revised full papers presented were carefully selected from 60 submissions. The papers represent a forum for the dissemination of cutting-edge research results in the area of arts, design, and technology, including open-related topics like interactivity and game creation. They are grouped in terms of content on art, installation, and performance, games, design, intelligence, and creativity in healthcare, wellbeing, and aging.

*The Bloomsbury Handbook of Sound Art* Sanne Krogh Groth, Holger Schulze, 2020-02-20. The Bloomsbury Handbook of Sound Art explores and delineates what Sound Art is in the 21st century. Sound artworks today embody the contemporary and transcultural trends towards the post-apocalyptic, a wide sensorial spectrum of sonic imaginaries, as well as the decolonization and deinstitutionalization around the making of sound. Within the areas of musicology, art history, and later sound studies, Sound Art has evolved at least since the 1980s into a turbulent field of academic critique and aesthetic analysis.

Summoning artists researchers curators and critics this volume takes note of and reflects the most recent shifts and drifts in Sound Art rooted in sonic histories and implying future trajectories **Cultures of Participation** Birgit Eriksson, Carsten Stage, Bjarki Valtýsson, 2019-09-05 This book examines cultural participation from three different but interrelated perspectives participatory art and aesthetics participatory digital media and participatory cultural policies and institutions Focusing on how ideals and practices relating to cultural participation express and re produce different cultures of participation an interdisciplinary team of authors demonstrate how the areas of arts digital media and cultural policy and institutions are shaped by different but interrelated contextual backgrounds Chapters offer a variety of perspectives and strategies for empirically identifying cultures of participation and their current transformations and tensions in various regional and national settings This book will be of interest to academics and cultural leaders in the areas of museum studies media and communications arts arts education cultural studies curatorial studies and digital studies It will also be relevant for cultural workers artists and policy makers interested in the participatory agenda in art digital media and cultural institutions **Teaching Electronic Music** Blake Stevens, 2021-08-16 Teaching Electronic Music Cultural Creative and Analytical Perspectives offers innovative and practical techniques for teaching electronic music in a wide range of classroom settings Across a dozen essays an array of contributors including practitioners in musicology art history ethnomusicology music theory performance and composition reflect on the challenges of teaching electronic music highlighting pedagogical strategies while addressing questions such as What can instructors do to expand and diversify musical knowledge Can the study of electronic music foster critical reflection on technology What are the implications of a digital culture that allows so many to be producers of music How can instructors engage students in creative experimentation with sound Electronic music presents unique possibilities and challenges to instructors of music history courses calling for careful attention to creative curricula historiographies repertoires and practices Teaching Electronic Music features practical models of instruction as well as paths for further inquiry identifying untapped methodological directions with broad interest and wide applicability

**Library of Congress Subject Headings** Library of Congress, 2012 Library of Congress Subject Headings Library of Congress. Cataloging Policy and Support Office, 2007 Sonic Sculpture and the Performative Impulse Melissa Christine Warak, 2025-03-28 This study considers the performativity of sound producing sculptures made in the twenty first century through a cultural history of certain works A subfield of the sound art medium sonic sculpture presents new possibilities in sensory engagement with the viewer creating a mediated experience for eye and ear Contextualized within three linking nodes of sonic engagement sonic sculpture as a socially engaged art listening to history and the use of the human body as the material of sonic sculpture itself each chapter interrogates one or two works by a contemporary artist These in depth analyses of the works serve as lenses to the artists larger practices and engagements with things that sound Artists covered include Nick Cave Kara Walker Janet Cardiff George Bures Miller and Ragnar Kjartansson The book will be of interest to

scholars working in art history sound studies musicology and cultural studies      Music and Heritage Liam Maloney, John Schofield, 2021-04-13 Music and Heritage provides new thinking about the diverse ways people engage with heritage By exploring the relationships that exist between music place and identity the book illustrates how people form attachments to place and how such attachments are represented by sound and music making Presenting case studies and perspectives from across a range of genres the volume argues that combining music with heritage provides an alternative and productive opportunity to think about heritage values and place attachment Contributions to this edited collection use a diversity of methods perspectives cues and genres to reflect critically on issues related to these and other interconnections in ways that encourage new thinking about the character meaning and purpose of cultural heritage and the various ways in which people can interact with it through sound thus re encountering the supposedly familiar world around them Taking heritage studies musicology and place making research in new directions Music and Heritage will be of interest to academics and students engaged in the study of heritage history music geography and anthropology It will also be relevant to those with an interest in how music relates to place making and place attachment as well as to practitioners and policymakers working in the planning design and creative sectors      Participatory Sound Art Vadim Keylin, 2023-11-20 This book addresses a major gap in sound art scholarship the role of audience participation It offers a survey of participatory sound art from its origins in the historical avant gardes to the non institutionalized forms of sonic creativity in contemporary digital culture In doing so it proposes an innovative theoretical framework for analysing such phenomena rooted in Pragmatist aesthetics affordance theory and postcritique Combining artwork analyses with qualitative studies it focuses on three principal aspects of participatory sound art the ways the materialities of the artworks facilitate and structure the participatory processes the interplay of the creative agencies of the artists and the participants and the postcritical approach to sound art s politics unfolding through the participants affective gestures In considering these multiple dimensions this book contributes to the growing fields of sound studies and participation studies as well as to curatorial practice regarding sound art and participatory art      **50 Fantastic Ideas for Making Music** Judith Harries, 2021-08-05 The 50 Fantastic Ideas series is packed full of fun original skills based activities for Early Years practitioners to use with children aged 0 5 Each activity features step by step guidance a list of resources and a detailed explanation of the skills children will learn Creative simple and highly effective this series is a must have for every Early Years setting Music is key to early childhood development and contributes to socialisation speaking motor skills and more 50 Fantastic Ideas for Making Music is packed full of fun and accessible ideas for singing creating instruments from recycled materials exploring sounds and making music together From making maracas tambourines and rainsticks in the music workshop to beatboxing singing stomping and even writing rhythms every activity uses easy to source equipment or no equipment at all Whether you re a specialist music teacher or a non specialist looking for inspiration this book is perfect for anyone looking to put the magic back into music in their Early Years

setting Written by Early Years expert Judith Harries all ideas include step by step instructions tips to understand music terminology and suggestions for further development      **Music, Electronic Media and Culture** Simon Emmerson, 2016-04-29 Technology revolutionised the ways that music was produced in the twentieth century As that century drew to a close and a new century begins a new revolution in roles is underway The separate categories of composer performer distributor and listener are being challenged while the sounds of the world itself become available for musical use All kinds of sounds are now brought into the remit of composition enabling the music of others to be sampled or plundered including that of unwitting musicians from non western cultures This sound world may appear contradictory stimulating and invigorating as well as exploitative and destructive This book addresses some of the issues now posed by the brave new world of music produced with technology      **The Player Bookazine Issue 19** The Player, 2011-11-30
