The First Executives Lives And Events In The Shadow Of The American Revolution:

The First Executives Bob Navarro, 2001-08-27 This book *The First Executives Lives and Events in the Shadow of the American Revolution* presents a view of American history that has been almost completely forgotten. It is about a period of American history that has almost been obliterated by the focus on the events surrounding the Revolutionary War. During this time America had a guiding leadership in place that was responsible for forming many of the structures and procedures that we have in our government today. These early chief executives were the visionaries and originators of many of our ideas that we take for granted today. Through their contributions the development of the Presidency took place and with it the destiny of the United States. The position of a President was initiated from precursor intercolonial gatherings that were conducted under the Albany Congress of 1754 and the Stamp Act Congress of 1765. In the Albany Congress Benjamin Franklin made a formal presentation of a plan for creating a union to the colonial delegates. Franklin's plan was a design of a union of all of the colonies under a single government with each colony preserving its right of local independence and separate sovereignty of each colony. The plan included the provision of a single president to be in charge of this union. The Stamp Act Congress was called to support an intercolonial meeting on the issue of the Stamp Act. Nine colonies assembled as an intercolonial congress to deal with the agenda of the Stamp Act of 1765, the Currency Act of 1764 which forbade the colonies to issue any new paper currency and the loss of the right to trial by jury in the Vice Admiralty courts. When the Stamp Act Congress convened in New York City, New York on October 7, 1765, the first event associated with this meeting was that a President of this body, Timothy Ruggles, was elected to preside over the affairs that were to be conducted by this congress. Ruggles thus became the precursor chief executive of a set of Presidents who were subsequently to lead both the First and Second Continental Congresses. A decade later, a formally elected President of the United States, Peyton Randolph, came into being when the first functioning central government started with the First Continental Congress that convened in September 5, 1774, at Philadelphia, Pennsylvania. The purpose of the First Continental Congress was to debate the issues that were confronting the colonies under British policies. The intent of the sessions was to propose a plan of action in response to the British activities. The Second Continental Congress convened in Philadelphia, Pennsylvania, on May 10, 1775, for the purpose of discussing the sovereignty of America. In its first action, the delegates unanimously elected Peyton Randolph again to be the chief executive of the body. The Second Continental Congress was formed for the purpose of obtaining redress from Great Britain of American grievances and to both recover and establish American rights and liberties that would be recognized by England. More Presidents were elected in the Second Continental Congress with John Hancock following as the next President. The formal sessions ended in October 1788 with Cyrus Griffin being the last elected President of the Continental Congress. An interim caretaker government continued under the Secretary of Congress, Charles Thomson, until March 2, 1789. Since George Washington was not inaugurated as the first Constitutional President until April 30, 1789, there is a fifteen year period in

which the President of the Continental Congress or the Chairman in the role of President pro tempore acted as the chief executive officer and as head of state of the government of the United States Too little credit has been given to the creation of the executive functions and the role of each of the chief executives during this Revolutionary War and post revolutionary period Mostly forgotten in the annals of the history of t *American Book Publishing Record* ,2005 The Footprints of a Wisconsin Lumber Executive Jan M. Long,2001-02-05 When one studies the history of Wisconsin it is impossible to ignore the significant role played by the lumber industry during the Nineteenth Century Down through the years many authors have discussed the history of the lumber industry in Wisconsin during this era No discussion of this subject is complete without reference to the dynamic impact of The Knapp Stout Co Company and its founder William Wilson due to its dominating role in the industry Consequently many authors have referenced this company and its founder However up to this point no book has been exclusively devoted to this famed company and its founder This volume tells the compelling story of William Wilson who built a world class lumber empire in the woods of Wisconsin It collects this secondary information that is the relevant published accounts of this company and its founder weaving it together with primary sources In the end we have a volume which brings into shaper focus the history of Northwestern Wisconsin s Red Cedar Valley and the forces which forever modified the geographical character of the region *CRM Bulletin* United States. Poverty provides an invaluable guide for management educators who want to inspire a new generation of leaders to tackle global poverty challenges. This expert collection shows educators how to teach poverty in management programmes with examples, encouragement and guidance from course leaders and management academics. The five sections of the book focus on frameworks for understanding course design and topic integration within courses, extra-curricular approaches or community-based approaches, contemporary issues and future directions. The book is a companion volume to *Socially Responsive Organizations and the Challenge of Poverty* which shows a clear rationale for the inclusion of poverty in management education. Showcasing innovative teaching, module development and program design methods that integrate the issue of poverty into global business management courses and curricula, this handbook shows educators how to design effective programmes and modules that get to the heart of poverty issues as they relate to management education. It is essential reading for faculty members, trainers and administrators who are interested in new ways to engage students with the complex relationship between poverty and business practice.
