The First European Revolution:

The First European Revolution R. I. Moore, 2000-10-19 This book provides a radical reassessment of Europe from the late tenth to the early thirteenth centuries **The First European Revolution, 1776-1815** Norman Hampson, 1969

The Furies Arno J. Mayer, 2002-01-15 This is a deliberately comparative study of violence and terror in the French and Russian revolutions It points up a web of significant similarities which are explored and refined by analogic analysis **The First European** Pierre Briant, 2017-01-02 Enlightenment thinkers searching for ancient models to understand contemporary affairs were the first to critically interpret Alexander the Great's achievements As Pierre Briant shows in their minds Alexander was the first European an empire builder who welcomed trade with the Orient and brought Western civilization to its oppressed peoples **The first European revolution, 1776-1875** Norman Hampson, 1969 **1848 — A European Revolution?** A. Körner, 2000-02-17 This book is among the rare contributions to the 150th anniversary of 1848 which takes a completely new theoretically informed approach Instead of a traditional social or political history the authors analyse the dichotomy between the international dimension in the ideas of the revolution and the nationalisation of memories in its commemorations over the past 150 years The book offers original research on the history of European ideas and takes part in the current debate about the relationship between history and memory *Critical Theory of Legal Revolutions* Hauke Brunkhorst, 2014-06-19 This unique work analyzes the crisis in modern society building on the ideas of the Frankfurt School thinkers Emphasizing social evolution and learning processes it argues that crisis is mediated by social class conflicts and collective learning the results of which are embodied in constitutional and public law First the work outlines a new categorical framework of critical theory in which it is conceived as a theory of crisis It shows that the Marxist focus on economy and on class struggle is too narrow to deal with the range of social conflicts within modern society and posits that a crisis of legitimization is at the core of all crises It then discusses the dialectic of revolutionary and evolutionary developmental processes of modern society and its legal system This volume in the *Critical Theory and Contemporary Society* by a leading scholar in the field provides a new approach to critical theory that will appeal to anyone studying political sociology political theory and law [Also a History of Philosophy, Volume 2](#) Jürgen Habermas, 2024-09-26 In this second volume of his groundbreaking new work on the history of philosophy Jürgen Habermas traces the development of Western thought from the reception of Platonism by early Christian thought through the revolution in medieval philosophy and theology triggered by the rediscovery of Aristotle's works up to the decoupling of philosophical and theological thought in nominalism and the Reformation that ushered in the postmetaphysical thinking of the modern age In contrast to conventional histories that focus on movements and schools Habermas takes the dialectic of faith and knowledge as a guiding thread for analysing key developments in the thought of major figures such as Augustine Aquinas Scotus Ockham and Luther that constitute milestones in the genealogy of postmetaphysical thinking A distinctive feature of Habermas approach is the

prominence he accords practical philosophy and in particular legal and political ideas and the corresponding attention he pays to social institutional and political history especially as these bear on the relationship between church and state As a result the central preoccupations of Christian thought are shown to be original responses to questions raised by the Christian worldview that exploded the framework of Greek metaphysical thinking and remain crucial for the self understanding of contemporary philosophy Far from raising claims to exclusivity completeness or closure Habermas s history of philosophy published in English in three volumes opens up new lines of research and reflection that will influence the humanities and social sciences for decades to come

Past Sense — Studies in Medieval and Early Modern European History

Constantin Fasolt, 2014-04-03 The twenty studies collected in this volume focus on the transition from the Middle Ages to the modern world The method leads from technical investigations on William Durant the Younger ca 1266 1330 and Hermann Conring 1606 1681 through reflection on the nature of historical knowledge to a break with historicism an affirmation of anachronism and a broad perspective on the history of Europe The introduction explains when and why these studies were written and places them in the context of contemporary historical thinking by drawing on Wittgenstein s Philosophical Investigations This book will appeal to historians with an interest in historical theory historians of late medieval and early modern Europe and students looking for the meaning of history

Joseph de Maistre and his European Readers, 2011-05-23 Following the publication of Isaiah Berlin s essay on Joseph de Maistre 1753 1821 the Savoyard philosopher has been known primarily in the English speaking world as a precursor of fascism The essays in this volume challenge this view Disclosing the inaccuracies and limitations of Berlin s account they illustrate Maistre s colossally diverse European posterity Far from an inflexible ideologist Maistre was a versatile and deeply modern thinker who attracted interpreters across the political spectrum Through the centuries Maistre s passionate Europeanism has contributed to his popularity from Madrid to Moscow And in our times when religion is re asserting itself as a source of public reason his theorization of the encounter between tradition and modernity is lending his work ever more urgent relevance Cover illustration by Matthieu Manche
