Doctors of Another Calling David K. C. Cooper, 2013-11-26 The medical profession is rich in those who have made names for themselves outside of medicine The fields of literature exploration business sport entertainment and beyond abound with doctors whose interests lie outside medicine This book largely written by members of the medical profession examines the efforts of doctors in non medical fields The doctors discussed here are those who are or were well known to the public for their contributions to their non medical fields of choice In many cases the public may have been unaware that a subject was medically qualified This book provides wide ranging and comprehensive biographical sketches of forty two doctors who are

best known to the public for their contributions to fields outside of medicine **Sir Hans Sloane** Arthur MacGregor,1994 Sir Hans Sloane was a considerable figure in his time He was the natural successor to Sir Isaac Newton as President of the Royal Society President of the Royal College of Physicians and the friend of John Ray Robert Boyle and other principal figures in the learned community of his day He was also the author of a major two volume Natural History of Jamaica the result of personal fieldwork on the island while a young man **Poetic Exhibitions** Eric Gidal,2001 In the process of tracing poetic and critical responses to the museum and its collections Poem Exhibitions simultaneously demonstrates the impact of nationalist ideologies and scientific discourse on formal and thematic developments in Romantic poetry and aesthetics

Museum Masters Edward P. Alexander,1995 Alexander brings to life the stories of twelve ambitious leaders from the United States and Europe who helped shape the future of the museum world **Museum Storage and Meaning** Mirjam Brusius,Kavita Singh,2017-09-07 Beyond their often beautiful exhibition halls many museums contain vast hidden spaces in which objects may be stored conserved or processed Museums can also include unseen archives study rooms and libraries which are inaccessible to the public This collection of essays focuses on this domain an area that has hitherto received little attention Divided into four sections the book critically examines the physical space of museum storage areas the fluctuating historical fortunes of exhibits the growing phenomenon of publicly visible storage and the politics of objects deemed worthy of collection but unsuitable for display In doing so it explores issues including the relationship between storage and canonization the politics of collecting the use of museum storage as a form of censorship the architectural character of storage space and the economic and epistemic value of museum objects Essay contributions come from a broad combination of museum directors curators archaeologists historians and other academics **The Scientific Revolution in Global**

Perspective William E. Burns,2016 This is the first book to put the scientific revolution its causes and effects in a global context It breaks with the Eurocentric tradition of previous scientific revolution surveys to fully reimagine the emergence of modern science as a process on a world scale It has maps that for the first time situate the scientific revolution geographically Provided by publisher **The Routledge History of Loneliness** Katie Barclay,Elaine Chalus,Deborah Simonton,2023-02-28 The Routledge History of Loneliness takes a multidisciplinary approach to the history of a modern emotion exploring its form and development across cultures from the seventeenth century to the present Bringing together thirty scholars from various disciplines including history anthropology philosophy literature and art history the volume considers how loneliness was represented in art and literature conceptualised by philosophers and writers and described by people in their personal narratives It considers loneliness as a feeling so often defined in contrast to sociability and affective connections particularly attending to loneliness in relation to the family household and community Acknowledging that loneliness is a relatively novel term in English the book explores its precedents in ideas about solitude melancholy and nostalgia as well as how it might be considered in cross cultural perspectives With wide appeal to students and researchers

Medical Education: Past, Present and Future Kenneth Calman, 2006-12-12 Highly Commended BMA Awards 2007 I would certainly recommend this book to all in Medical Education Medical education both for undergraduate and postgraduate students and for those training in their chosen specialty is currently undergoing great change In Medical Education Past Present and Future Handling on Learning Sir Kenneth Calman puts this change in its proper historical context and also examines the current upheavals and their implications for the future An ambitious but timely project made readable and specific by the use of a case based approach a book of this range and type has not been attempted since the early 20th century Written by a known expert in the field and therefore individualistic but with a real insider's attributes of being able to discriminate between what does and does not matter the insider viewpoint especially of someone so recently involved at the centre of political and educational debate The overall theme of regulation covers not just the professionals viewpoint but also the public's and therefore covers political influences on the educational and regulatory process

Managing Natural Science Collections Robert Huxley, Christiane Quaisser, Carol R Butler, René WRJ Dekker, 2020-07-15 Managing Natural Science Collections demonstrates the need for consistency and evidence based decision making in the management of natural science collections which are becoming increasingly valuable when it comes to addressing societal challenges Drawing upon the experience of four experts who have managed some of the largest and most diverse collections in the world the book aims to assist in the making of strategic and operational decisions regarding care development access and resource management Encouraging the reader to consider how collection strategies can be aligned with the mission of their institution and contribute to its vision the authors also examine ways to deliver a consistent approach that will secure the present and future availability and relevance of collections Principles of good practice and resource optimisation in an ethical and legal context are provided throughout the book as well as case studies sample documents and templates all of which will be useful for discussion and teaching Managing Natural Science Collections encourages each reader to consider the different options available to them As such it should be essential reading for museum practitioners and other professionals around the world who are involved with any strategic aspect of managing natural science collections Students of museum studies will also find much to interest them within the pages of this book
