Sirian Experiments:

The Sirian Experiments Doris Lessing, 1981 The first person account of Ambien II a female ruler of the Sirian empire who slowly realizes how sophisticated the Canopus empire is and attempts to effect a similar society **The Sirian Experiments (Canopus in Argos: Archives Series, Book 3)** Doris Lessing, 2012-05-31 From Doris Lessing winner of the Nobel Prize for Literature this is the third instalment in the visionary novel cycle Canopus in Argos Archives *The Sirian Experiments* Doris Lessing, 1982 **The Sirian Experiments** D. Lessing, 1994 *The Sirian Experiments* Doris Lessing, 1980 **Identity in Doris Lessing's Space Fiction** David F. Waterman, 2006 In this study of identity in Doris Lessing's space fiction David Waterman devotes a chapter to each of the five novels in the Canopus in Argos Archives series as well as *Briefing for a Descent into Hell* *Memoirs of a Survivor* and finally *The Reason for It* This is an important addition to understanding the works of this prolific author His major argument is that Lessing's space fiction identifies the universal problem society's division into competitive and predatory groups and places it outside the bounds of time and space encouraging a social critique which takes into account our inherited blindness our degenerative disease which must be addressed before genuine progress can be made Lessing's examination of the relationship between individual identity and group identity produces a productive tension that accounts for so much of interest in her work over many years Nowhere is that tension more obvious or more interesting than in the space fiction that David Waterman so ably explores Waterman writes convincingly of Lessing's desire to cut through the performance the received ideas the habits and customs of our daily lives Drawing on a wide range of sources he provides an interdisciplinary reading of the space fiction and maps Lessing's brave exploration of the hierarchical landscapes that so often imprison us Waterman offers a timely reading of Lessing for contemporary readers living in the landscape of globalization Professor Margaret Moan Rowe Purdue University [Genetics and the Literary Imagination](#) Clare Hanson, 2020-05-06 Oxford Textual Perspectives is a series of informative and provocative studies focused upon literary texts conceived of in the broadest sense of that term and the technologies cultures and communities that produce inform and receive them It provides fresh interpretations of fundamental works and of the vital and challenging issues emerging in English literary studies By engaging with the materiality of the literary text its production and reception history and frequently testing and exploring the boundaries of the notion of text itself the volumes in the series question familiar frameworks and provide innovative interpretations of both canonical and less well known works This is the first book to explore the dramatic impact of genetics on literary fiction over the past four decades After James Watson and Francis Crick's discovery of the structure of DNA in 1953 and the subsequent cracking of the genetic code a gene centric discourse developed which had a major impact not only on biological science but on wider culture As figures like E O Wilson and Richard Dawkins popularised the neo Darwinian view that behaviour was driven by genetic self interest novelists were both compelled and unnerved by such a vision of the origins and ends of life This book maps the ways in which Doris Lessing

A S Byatt Ian McEwan and Kazuo Ishiguro wrestled with the reductionist neo Darwinian account of human nature and with the challenge it posed to humanist beliefs about identity agency and morality It argues that these novelists were alienated to varying degrees by neo Darwinian arguments but that the recent shift to postgenomic science has enabled a greater rapprochement between biological and post humanist concepts of human nature The postgenomic view of organisms as agentic and interactive is echoed in the life writing of Margaret Drabble and Jackie Kay which also explores the ethical implications of this holistic biological perspective As advances in postgenomics especially epigenetics provoke increasing public interest and concern this book offers a timely analysis of debates that have fundamentally altered our understanding of what it means to be human

Eugenics, Literature, and Culture in Post-war Britain Clare Hanson,2013 This book explores eugenics in its wider social context and in literary representations in post war Britain Drawing on a wide range of sources in medicine social and educational policy genetics popular science science fiction and literary texts Hanson tracks the dynamic interactions between eugenic ideas across diverse cultural fields demonstrating the strength of the eugenic imagination Challenging assumptions that eugenics was fatally compromised by its association with Nazi atrocities or that it petered out in the context of changed social attitudes in an egalitarian post war society the book demonstrates that eugenic thought not only persisted after 1945 but became more prominent Throughout eugenics is defined as a cultural movement rather than more narrowly as a science and the study is focused on its border crossing capacity as a style of thought By tracing the expression of eugenic ideas across disciplinary boundaries and in both high and low culture this book demonstrates the powerful and pervasive influence of eugenics in the post war years Authors visited include Raymond Williams John Braine Agatha Christie Muriel Spark Anthony Burgess Doris Lessing and J G Ballard

Women in the House of Fiction Lorna Sage,1992-08-21 The novel was once upon a time the genre women felt at home in This wide ranging and detailed study of contemporary novelists explores the forms of nostalgia shared by many feminist critics for a woman s novel and the subtle or savage strategies which have turned the house of fiction upside down The result is a critique of the nature of narrative now and a celebration of the energies that are undoing our definitions of women s work

Mothers and Masters in Contemporary Utopian and Dystopian Literature Mary Elizabeth Theis,2009 Because advances made by science and technology far outstripped improvements in human nature utopian dreams of perfect societies in the twentieth century quickly metamorphosed into dystopian nightmares which undermined individual identity and threatened the integrity of the family Armed with technological and scientific tools totalizing social systems found in literature abolish the distinction between public and private life and thus penetrate and corrupt the very core of all utopian blueprints and visions the education of future generations At the heart of the family mothers as parents transmit their diverse cultural traditions while socializing their children and thus compete with ideologically driven systems that usurp their role as educators Mothers and Masters in Contemporary Utopian and Dystopian Literature focuses therefore on the thematic importance of this and other

maternal roles for generic metamorphosis the shift to dystopia invariably is signaled by the inversion of traditional maternal roles The longevity of the utopian dystopian literary tradition and persistence of the maternal model of human relationships serve as points of reference in this post modern age of relative cultural values Meta utopian exploration of this thematic tension between utopia and dystopia reminds us that no place may not be home but we need to keep going there
