Wallis,2023-10-05 Of all avian groups birds of prey in particular have long been a prominent subject of fascination in many human societies This book demonstrates that the art and materiality of human engagements with raptors has been significant through deep time and across the world from earliest prehistory to Indigenous thinking in the present day Drawing on a wide range of global case studies and a plurality of complementary perspectives it explores the varied and fluid dynamics between humans and birds of prey as evidenced in this diverse art historical and archaeological record From their depictions as powerful beings in visual art and their important roles in Indigenous mythologies to the significance of their body parts as active agents in religious rituals the intentional deposition of their faunal remains and the display of their preserved bodies in museums there is no doubt that birds of prey have been figures of great import for the shaping of human society and culture However several of the chapters in this volume are particularly concerned with looking beyond the

culture nature dichotomy and human centred accounts to explore perspectival and other post humanist thinking on human raptor ontologies and epistemologies The contributors recognize that human raptor relationships are not driven exclusively by human intentionality and that when these species meet they relate to and become with one another This raptor with human focused approach allows for a productive re framing of questions about human raptor interstices enables fresh thinking about established evidence and offers signposts for present and future intra actions with birds of prey *The London Journal: and Weekly Record of Literature, Science, and Art* ,1864 **Scandinavica** Elias Bredsdorff,2001

Chambers's Journal of Popular Literature, Science and Arts ,1900 *Rock Art Through Time* Peter Skoglund,2016-06-30 As in many other areas in south Scandinavia the region surrounding the city of Simrishamn in south east Scania has a great many Bronze Age mounds that are still visible in the landscape and records from the museums demonstrate that the area is rich in bronze metalwork Nevertheless it is the figurative rock art that makes this region stand out as distinct from surrounding areas that lack such images The rock art constitutes a spatially well defined tradition that covers the Bronze Age and the earliest Iron Age c 1700 200 BC and although the number of sites is comparatively small a characteristic and unusual feature is the large representation of various kinds of metal axes Significantly these images are tightly distributed inside the core zone of metal consumption in southernmost Scandinavia This beautifully illustrated new addition to the Swedish rock Art series presents a detailed reassessment of the Simrishamn rock art and examines the close relationship between iconography displayed on metals and that found in rock art in so doing it raises some important questions of principle concerning the current understanding of the south Scandinavian rock art tradition *Art-Union* ,1861
