*The Gods' Machines* Wun Chok Bong, 2008-05-27 Based on the author s decipherment of prehistoric carvings and the application of mathematical measurements *The Gods Machines* shows how unknown phenomena from Angkor Wat to Stonehenge to crop circles are actually powerhouses built by an advanced extraterrestrial civilization for tapping electromagnetic energy The book traces the development of that civilization on Earth over 5 000 years revealing how all these structures are aligned according to a universal formula an angle of 135 degrees at which Earth s energy has been

tapped by the alien creators of these monuments These fascinating theories not only explain our distant past but also open the door to a future of power technology and space travel Megalithic sites such as Newgrange and Stonehenge are constructed with quartz and iron rich stones with electrical conduction properties minerals also found atop Aztec temple and inside crop circles These stones according to the author served as dry cell batteries when heated and stressed and supplied energy to the builders traveling vehicles Most interestingly the author has tested his theory on today s crop circles The Gods Machines is certain to stimulate debate among readers interested in alternative history ancient civilization and extraterrestrial intelligence

Matthew Green, 2022-07-19 Beguiling Elizabeth Lowry Wall Street Journal A brilliant London historian BBC Radio tells the story of Britain as never before through its abandoned villages and towns Drowned Buried by sand Decimated by plague Plunged off a cliff This is the extraordinary tale of Britain's eerie and remarkable ghost towns and villages shadowlands that once hummed with life Peering through the cracks of history we find Dunwich a medieval city plunged off a cliff by sea storms the abandoned village of Wharram Percy wiped out by the Black Death the lost city of Trellech unearthed by moles in 2002 and a Norfolk village zombified by the military and turned into a Nazi Soviet and Afghan village for training Matthew Green a British historian and broadcaster tells the astonishing tales of the rise and demise of these places animating the people who lived worked dreamed and died there Traveling across Britain to explore their haunting and often beautiful remains Green transports the reader to these lost towns and cities as they teeter on the brink of oblivion vividly capturing the sounds of the sea clawing away row upon row of houses the taste of medieval wine or the sights of puffin hunting on the tallest cliffs in the country We experience them in their prime look on at their destruction and revisit their lingering remains as they are mourned by evictees and reimaged by artists writers and mavericks A stunning and original excavation of Britain's untold history Shadowlands gives us a truer sense of the progress and ravages of time in a moment when many of our own settlements are threatened as never before      *Decoding Neolithic Atlantic and Mediterranean Island Ritual* George Nash, Andrew Townsend, 2016-03-31 What constitutes an island and the archaeology contained within Is it the physicality of its boundary between shoreline and sea Does this physical barrier extend further into a watery zone Archaeologically can islands be defined by cultural heritage and influence Clearly and based on these few probing questions islands are more than just lumps of rock and earth sitting in the middle of a sea or ocean An island is a space which when described in terms of topography landscape form and resources becomes a place A place can sometimes be delineated with barriers and

boundaries it may also have a perimeter and can be distinguished from the space that surrounds it The 16 papers presented here explore the physicality and levels of insularity of individual islands and island groups during prehistory through a series of case studies on Neolithic island archaeology in the Atlantic and Mediterranean regions For the eastern Atlantic the Atlantic Archipelago papers discuss the sacred geographies and material culture of Neolithic Gotland Orkney and Anglesey and the architecture of and ritual behavior associated with megalithic monuments in the Channel Islands and the Scilly Isles The Mediterranean region is represented by a different type of Neolithic both in terms of architecture and material culture Papers discuss theoretical constructs and ritual deposition cave sites ritualized and religious aspects of Neolithic death and burial metaphysical journeys associated with the underworld in Late Neolithic Malta and the possible role of its Temple Period art in ritual activities and palaeoenvironmental evidence from the Neolithic monuments of Corsica The cases examined illustrate the diversity of the evidence available that affords a better understanding of the European Mediterranean Neolithic island society not least the effects of interaction contact and or geographical insularity isolation all factors that are considered to have consequences for the establishment and modification of cultures in island settings
