Songs Of The Gorilla Nation My Journey Through Autism:

Songs of the Gorilla Nation Dawn Prince-Hughes, Ph.D.,2005-03-22 This is a book about autism Specifically it is about my autism which is both like and unlike other people s autism But just as much it is a story about how I emerged from the darkness of it into the beauty of it In this elegant and thought provoking memoir Dawn Prince Hughes traces her personal growth from undiagnosed autism to the moment when as a young woman she entered the Seattle Zoo and immediately became fascinated with the gorillas Having suffered from a lifelong inability to relate to people in a meaningful way Dawn was surprised to find herself irresistibly drawn to these great primates By observing them and later working with them she was finally able to emerge from her solitude and connect to living beings in a way she had never previously experienced Songs of the Gorilla Nation is more than a story of autism it is a paean to all that is important in life Dawn Prince Hughes s evocative story will undoubtedly have a lasting impact forcing us like the author herself to rediscover and assess our own understanding of human emotion

Autistic Dreaming Anna Reading,2025-08-01 The relationship between storytelling neurodiversity and memory remains critically overlooked While scholarship recognizes the presence of neurodiverse thinking in popular folktales and access to works by autistic people is growing the opportunity neurodiverse storytelling offers to reshape communication and remembrance is largely neglected Autistic Dreaming illuminates how the integration of neurodivergent perspectives can expand ideas of polysensory memory and the connection between human and more than human memory Focusing on autistic activists blogs memoirs artworks and films this study spotlights a neuroqueer method of remembering that reforges links between the present and the past and the individual and collective [See It Feelingly](#)

Ralph James Savarese,2018-10-26 Ralph James Savarese showcases the voices of autistic readers by sharing their unique insights into literature and their sensory experiences of the world thereby challenging common claims that people with autism have a limited ability to understand language to partake in imaginative play and to generate the complex theory of mind necessary to appreciate literature

Carnal Aesthetics Marta Zarzycka,Bettina Papenburg,2012-12-18 Art today is an increasingly multifaceted phenomenon encompassing transgressive works that intervene in war and ecological disasters in inequalities and revolutionary changes in technology Carnal Aesthetics is a fascinating new examination of this aspect of contemporary visual culture Employing recent theories of transgressive body imagery trauma affect and sensation it provides a fresh look at the meeting point between the politics of representation and the politics of perception through the prismatic lens of feminist theory Acclaimed scholars analyse a wide range of seminal case studies coming from different media digital photography painting video film and multimedia art They explore here a number of transgressive movements that significantly reconfigure the relationship between the body and the image Unlike other books on the complex relationship between politics and aesthetics Carnal Aesthetics seeks to provide a novel approach to art and culture by challenging the primacy of vision and by injecting an intersectional perspective into the fields of visual studies film and media studies as well

as trauma studies It is a significant contribution across these dynamic fields of exploration for scholars who deal with the socio political nature of contemporary visual culture in their work

Autistic Intelligence Douglas W. Maynard, Jason Turowetz, 2022-05-25 An examination of diagnostic processes that questions how we can better understand autism as a category and the unique forms of intelligence it glosses As autism has grown in prevalence so too have our attempts to make sense of it From placing unfounded blame on vaccines to seeking a genetic cause Americans have struggled to understand what autism is and where it comes from Amidst these efforts however a key aspect of autism has been largely overlooked the diagnostic process itself That process is the central focus of *Autistic Intelligence* The authors ask us to question the norms by which we measure autistic behavior to probe how that behavior can be considered sensible rather than disordered and to explore how we can better appreciate the individuality of those who receive the diagnosis Drawing on hundreds of hours of video recordings and ethnographic observations at a clinic where professionals evaluated children for autism the authors analysis of interactions among clinicians parents and children demystifies the categories tools and practices involved in the diagnostic process *Autistic Intelligence* shows that autism is not a stable category it is the outcome of complex interactional processes involving professionals children families and facets of the social and clinical environments they inhabit The authors suggest that diagnosis in addition to carefully classifying children also can highlight or include unique and particular contributions those with autism potentially can make to the world around us

Underdogs Heather Love, 2021-09-17 A pathbreaking genealogy of queer theory that traces its roots to an unexpected source sociological research on marginal communities in the era before Stonewall The sociology of social deviants flourished in the United States at midcentury studying the lives of outsiders such as homosexuals Jews disabled people drug addicts and political radicals But in the following decades many of these downcast figures would become the architects of new social movements activists in revolt against institutions the state and social constraint As queer theory gained prominence as a subfield of the humanities in the late 1980s it seemed to inherit these radical activist impulses challenging not only gender and sexual norms but also the nature of society itself With *Underdogs* Heather Love shows that queer theorists inherited as much from sociologists as they did from activists Through theoretical and archival work Love traces the connection between midcentury studies of deviance and the antinormative antiessentialist field of queer theory While sociologists saw deviance as an inevitable fact of social life queer theorists embraced it as a rallying cry A robust interdisciplinary history of the field *Underdogs* stages a reencounter with the practices and communities that underwrite radical queer thought

The Asperger Plus Child George T. Lynn, Joanne Barrie Lynn, 2007 This practical guide to helping children with complex diagnoses at home and at school is based on current research as well as the author s clinical observations from working with this population for 15 years Written for parents teachers counselors and medical professionals

Nicholas Gaskill, A. J. Nocek, 2014-10-01 Once largely ignored the speculative philosophy of Alfred North Whitehead has assumed a new prominence in contemporary theory across the humanities and social sciences Philosophers and artists literary critics and social theorists anthropologists and computer scientists have all embraced Whitehead's thought extending it through inquiries into the nature of life the problem of consciousness and the ontology of objects as well as into experiments in education and digital media The Lure of Whitehead offers readers not only a comprehensive introduction to Whitehead's philosophy but also a demonstration of how his work advances our emerging understanding of life in the posthuman epoch Contributors Jeffrey A Bell Southeastern Louisiana U Nathan Brown U of California Davis Peter Canning Didier Debaise Free U of Brussels Roland Faber Claremont Lincoln U Michael Halewood U of Essex Graham Harman American U in Cairo Bruno Latour Sciences Po Paris Erin Manning Concordia U Montreal Steven Meyer Washington U Luciana Parisi U of London Keith Robinson U of Arkansas at Little Rock Isabelle Stengers Free U of Brussels James Williams U of Dundee **Storytelling Apes** Mary Sanders Pollock, 2015-05-04 The annals of field primatology are filled with stories about charismatic animals native to some of the most challenging and remote areas on earth There are for example the chimpanzees of Tanzania whose social and family interactions Jane Goodall has studied for decades the mountain gorillas of the Virungas chronicled first by George Schaller and then later more obsessively by Dian Fossey various species of monkeys Indian langurs Kenyan baboons and Brazilian spider monkeys studied by Sarah Hrdy Shirley Strum Robert Sapolsky Barbara Smuts and Karen Strier and finally the orangutans of the Bornean woodlands whom Birut Galdikas has observed passionately Humans are after all storytelling apes The narrative urge is encoded in our DNA along with large brains nimble fingers and color vision traits we share with lemurs monkeys and apes In Storytelling Apes Mary Sanders Pollock traces the development and evolution of primatology field narratives while reflecting upon the development of the discipline and the changing

conditions within natural primate habitat Like almost every other field primatologist who followed her Jane Goodall recognized the individuality of her study animals defying formal scientific protocols she named her chimpanzee subjects instead of numbering them thereby establishing a trend For Goodall Fossey Sapolsky and numerous other scientists whose works are discussed in *Storytelling Apes* free living primates became fully realized characters in romances tragedies comedies and never ending soap operas With this work Pollock shows readers with a humanist perspective that science writing can have remarkable literary value encourages scientists to share their passions with the general public and inspires the conservation community

What Is Posthumanism? Cary Wolfe, 2013-11-30 What does it mean to think beyond humanism Is it possible to craft a mode of philosophy ethics and interpretation that rejects the classic humanist divisions of self and other mind and body society and nature human and animal organic and technological Can a new kind of humanities posthumanities respond to the redefinition of humanity's place in the world by both the technological and the biological or green continuum in which the human is but one life form among many Exploring how both critical thought along with cultural practice have reacted to this radical repositioning Cary Wolfe one of the founding figures in the field of animal studies and posthumanist theory ranges across bioethics cognitive science animal ethics gender and disability to develop a theoretical and philosophical approach responsive to our changing understanding of ourselves and our world Then in performing posthumanist readings of such diverse works as Temple Grandin's writings Wallace Stevens's poetry Lars von Trier's *Dancer in the Dark* the architecture of Diller Scofidio and David Byrne and Brian Eno's *My Life in the Bush of Ghosts* he shows how this philosophical sensibility can transform art and culture For Wolfe a vibrant rigorous posthumanism is vital for addressing questions of ethics and justice language and trans species communication social systems and their inclusions and exclusions and the intellectual aspirations of interdisciplinarity In *What Is Posthumanism* he carefully distinguishes posthumanism from transhumanism the biotechnological enhancement of human beings and narrow definitions of the posthuman as the hoped for transcendence of materiality In doing so Wolfe reveals that it is humanism not the human in all its embodied and prosthetic complexity that is left behind in posthumanist thought

The Minor Gesture Erin Manning, 2016-05-19 In this wide ranging and probing book Erin Manning extends her previous inquiries into the politics of movement to the concept of the minor gesture The minor gesture although it may pass almost unperceived transforms the field of relations More than a chance variation less than a volition it requires rethinking common assumptions about human agency and political action To embrace the minor gesture's power to fashion relations its capacity to open new modes of experience and manners of expression is to challenge the ways in which the neurotypical image of the human devalues alternative ways of being moved by and moving through the world in particular what Manning terms autistic perception Drawing on Deleuze and Guattari's schizoanalysis and Whitehead's speculative pragmatism Manning's far reaching analyses range from fashion to depression to the writings of autistics in each case affirming the neurodiversity of the minor and the
