*Whose History?* Grant Rodwell, 2013 Somebody once quipped that any work of Australian historical fiction is a burning fuse travelling over decades through Australian culture and society In some manner every newly published Australian historical novel is connected to what it has preceded Each work belongs to a proud history Through multiple examples Grant Rodwell encourages readers to see how a work of historical fiction has evolved Thus under various themes WHOSE HISTORY examines the traditions in Australian historical fiction and ponders how Australian historical novels can engage teachers and student teachers WHOSE HISTORY aims to illustrate how historical novels and their related genres may be used as an engaging teacher learning strategy for student teachers in pre service teacher education courses It does not argue all teaching of History curriculum in pre service units should be based on the use of historical novels as a stimulus nor does it argue for a particular percentage of the use of historical novels in such courses It simply seeks to argue the case for this particular approach leaving the extent of the use of historical novels used in History curriculum units to the professional expertise of the lecturers responsible for the units

**Lethal Intersections** Patricia Hill Collins, 2023-10-09 School shootings police misconduct and sexual assault where people are injured and die dominate the news What are the connections between

such incidents of violence and extreme harm In this new book world renowned sociologist Patricia Hill Collins explores how violence differentially affects people according to their class sexuality nationality and ethnicity These invisible workings of overlapping power relations give rise to what she terms lethal intersections where multiple forms of oppression converge to catalyze a set of violent practices that fall more heavily on particular groups Drawing on a rich tapestry of cases Collins challenges readers to reflect on what counts as violence today and what can be done about it Resisting violence offers a common thread that weaves together disparate antiviolence projects across the world When parents of murdered children organize against gun violence when Black citizens march against the excessive use of police force in their neighborhoods and when women and girls report sexual abuse by employers coaches and community leaders the ideas and actions of ordinary people lay a foundation for new ways of thinking about and combating violence Through its ground breaking analysis Lethal Intersections aims to stimulate debate about violence as one of the most pressing social problems of our times Also available as an audiobook

**The Oxford Handbook of Law and Anthropology** Marie-Claire Foblets, Mark Goodale, Maria Sapignoli, Olaf Zenker, 2022-04-01 The Oxford Handbook of Law and Anthropology is a ground breaking collection of essays that provides an original and internationally framed conception of the historical theoretical and ethnographic interconnections of law and anthropology Each of the chapters in the Handbook provides a survey of the current state of scholarly debate and an argument about the future direction of research in this dynamic and interdisciplinary field The structure of the Handbook is animated by an overarching collective narrative about how law and anthropology have and should relate to each other as intersecting domains of inquiry that address such fundamental questions as dispute resolution normative ordering social organization and legal political and social identity The need for such a comprehensive project has become even more pressing as lawyers and anthropologists work together in an ever increasing number of areas including immigration and asylum processes international justice forums cultural heritage certification and monitoring and the writing of new national constitutions among many others The Handbook takes critical stock of these various points of intersection in order to identify and conceptualize the most promising areas of innovation and sociolegal relevance as well as to

acknowledge the points of tension open questions and areas for future development

*Water* Katie Meehan, Naho Mirumachi, Alex Loftus, Majed Akhter, 2023-02-13. Discover the hydrosocial cycle and the impact of power, knowledge and scarcity on water rights and use through this engaging and student friendly textbook. In *Water: A Critical Introduction*, a team of distinguished researchers delivers an expert examination of our most pressing water related challenges, arguing that flows of water are shaped by social practices and geometries of power. Spanning five centuries, this comprehensive volume reflects on how imperial expansion has shaped hydrosocial relations in and between Europe, Asia, Africa and the Americas, how water demand has changed over time and how this change impacted lifestyle. As the first major text to synthesize critical water research in both local and global perspectives, this book is anchored by clear and compelling arguments, the four planks and supported by the authors' original research and up to date synthesis of the latest critical research on major water problems. It also includes maps, illustrations and additional learning materials to be used by educators. Readers will find a lively and thorough introduction that explains why a critical approach is necessary to fully understand our current water challenges, with a focus on the skeptical superhero.
