APA Newsletter for Teaching Philosophy     *History of Ancient Philosophy* Wilhelm Windelband, Robert Ernest Cushman, 1899     Principles and Practices in Ancient Greek and Chinese Science G.E.R. Lloyd, 2023-07-28

From the 90 or so articles he has published in the last two decades Professor Lloyd has chosen fifteen of the most important and influential to be reprinted in this collection. They tackle a wide range of problems in ancient Greek and Chinese thought focussing especially on science but including also medicine, mathematics, philosophy and mythology. Three common themes recur: the ancients' own concern with disciplinary boundaries, their engagement in polemics and the heterogeneity of different traditions, cultivating different styles of reasoning with different results in ancient science. Alongside papers that deal with technical issues in the interpretation of our sources, others raise strategic questions to do with the institutional framework of ancient science, the role of literacy in its development and the underlying ontological and epistemological presuppositions of different groups of ancient investigators. The collection closes with a study in which Lloyd sets out how he sees the further comparative study of ancient science developing. Two of the articles appear here for the first time in English. The others are reprinted in their original form. Supplementary bibliographies are added referring to the most recent scholarship on the issues discussed.

Not safe to miss.

Malcolm Schofield, Cambridge University

OSAP was founded to provide a place for long pieces on major issues in ancient philosophy. In the years since it has fulfilled this role with great success, over and over again publishing groundbreaking papers on what seemed to be familiar topics and others surveying new ground to break. It represents brilliantly the vigour and the increasingly broad scope of scholarship in ancient philosophy and shows us all how the subject should flourish.

This volume aims at exploring the ancient roots of holistic approaches in the specific field of medicine and the life sciences without, however, overlooking the larger theoretical implications of these discussions. Therefore, the project plans to broaden the perspective to include larger cultural

discussions and in a comparative spirit reach out to some examples from non Graeco Roman medical cultures As such it constitutes a fundamental contribution to history of medicine philosophy of medicine cultural studies and ancient studies more broadly The wide ranging selection of chapters offers a comprehensive view of an exciting new field the interrogation of ancient sources in the light of modern concepts in philosophy of medicine as justification of the claim for their enduring relevance as object of study and at the same time as means to a more adequate contextualisation of modern debates within a long historical process Contributors are Hynek Barto Sean Coughlin Elizabeth Craik Brooke Holmes Helen King Giouli Korobili David Leith Vivian Nutton Julius Rocca William Michael Short P N Singer Konstantinos Stefou Chiara Thumiger Laurence Totelin Claire Trenery John Wee Francis Zimmermann
