Sound Of Writing:

The Sound of Writing Christopher Cannon, Steven Justice, 2023-11-14 An interdisciplinary exploration of how writers have conveyed sound through text Edited by Christopher Cannon and Steven Justice The Sound of Writing explores the devices and techniques that writers have used to represent sound and how they have changed over time Contributors consider how writing has channeled sounds as varied as the human voice and the buzzing of bees using not only alphabets but also the resources of the visual and musical arts Cannon and Justice have assembled a constellation of classicists medievalists modernists literary historians and musicologists to trace the sound of writing from the beginning of the Western record to poetry written in the last century This rich series of essays considers the writings of Sappho Simonides Aldhelm Marcarbru Dante Alighieri William Langland Charles Butler Tennyson Gertrude Stein and T S Eliot as well as poems and songs in Ancient Greek Old and Middle English Italian Old French Occitan and modern English The book will interest anyone curious about the way sound has been preserved in the past and the kinds of ingenuity that can recover the process of that preservation Essays focus on questions of language and expression and each contributor sets out a distinct method for understanding the relationship between sound and writing Cannon and Justice open the volume with a survey of the various ways sound has been understood as the object of our senses Each ensuing chapter presents a case study for a sonic phenomenology at a specific time in history With approaches from a wide variety of disciplines The Sound of Writing analyzes writing systems and the aural dimensions of literary cultures to reconstruct historical soundscapes in vivid ways

Sound Writing Tobias Wilke, 2022-04-21 Considers the avant garde rethinking of poetic language in terms of physical speech production Avant garde writers and artists of the twentieth century radically reconceived poetic language appropriating scientific theories and techniques as they turned their attention to the physical process of spoken language This modernist sound writing focused on the bodily production of speech which it rendered in poetic legible graphic form Modernist sound writing aims to capture the acoustic phenomenon of vocal articulation by graphic means Tobias Wilke considers sound writing from its inception in nineteenth century disciplines like physiology and experimental phonetics following its role in the aesthetic practices of the interwar avant garde and through to its reemergence in the postwar period These projects work with the possibility of crossing over from the audible to the visible from speech to notation from body to trace Employing various techniques and concepts this search for new possibilities played a central role in the transformation of poetry into a site of radical linguistic experimentation Considering the works of

Warner blames this on decades of educational reform rooted in standardization assessments and accountability We have done no more Warner argues than conditioned students to perform writing related simulations which pass temporary muster but do little to help students develop their writing abilities This style of teaching has made students passive and disengaged Worse yet it hasn't prepared them for writing in the college classroom Rather than making choices and thinking critically as writers must undergraduates simply follow the rules such as the five paragraph essay designed to help them pass these high stakes assessments In *Why They Can't Write* Warner has crafted both a diagnosis for what ails us and a blueprint for fixing a broken system Combining current knowledge of what works in teaching and learning with the most enduring philosophies of classical education this book challenges readers to develop the skills attitudes knowledge and habits of mind of strong writers
