Igartua, Brian D. Joseph, Kirsten Jeppesen Kragh, Lene Schøsler, 2019-06-15 This volume centers on three important theoretical concepts for the study of language change and the ways in which language structure emerges and turns into new structure reanalysis actualization and indexicality Reanalysis is a part of ongoing everyday language use a process through which language is reproduced and changed Actualization refers to the processes through which a reanalyzed structure spreads throughout single communities and society Indexicality covers the way in which parts of a linguistic system can point to other parts of the system both syntagmatically and paradigmatically The inclusion of indexicality leads to fine grained analysis in morphology word order and constructional syntax **Language change for the worse** Dankmar W. Language in Prehistory John D. Bengtson, 2008 Compiled in honor and celebration of veteran anthropologist Harold C Fleming this book contains 23 articles by anthropologists in the general sense from the four main disciplines of prehistory archaeology biogenetics paleoanthropology and genetic historical linguistics Because of Professor Fleming s major focus on language he founded the Association for the Study of Language in Prehistory and the journal Mother Tongue the content of the book is heavily tilted toward the study of human language its origins historical development and taxonomy Because of Fleming s extensive field experience in Africa some of the articles deal with African topics This volume is intended to exemplify the principle in the words of Fleming himself that each of the four disciplines is enriched when it combines with any one of the other four The authors are representative of the cutting edge of their respective fields and this book is unusual in including contributions from a wide range of anthropological fields rather than concentrating in any one of them

the international range of scholarship in the field of Historical Linguistics as well as some of its major themes The work and

ideas they discuss are relevant not only to other aspects of Historical Linguistics but also to more general developments in linguistic theory. Along with Professor Jones' Introduction, their comments provide a major overview of Historical Linguistics that will be the reference point for its development for many years to come and form an important contribution to general theories of linguistic behaviour.
