Fenske,2007-11-26 In analyses of tattoo contests advertising and modern primitive photographs the book shows how images of tattooed bodies communicate and disrupt notions of gender class and exoticism through their discursive performances Fenske suggests working within dominant discourse to represent and subvert oppressive gender and class evaluations **Philosophising Experiences and Vision of the Female Body, Mind, and Soul: Historical Context and Contemporary Theory** Musingafi, Maxwell Constantine Chando,Mafumbate, Racheal,Khumalo, Thandi Fredah,2021-04-23 Much of our understanding of the world our societies and ourselves rests on theories and knowledge generated predominantly by men of certain nationalities and economic classes This male dominated and culturally specific theorizing and knowledge have generally resulted in the

exclusion of women and other groups from the process of formal theorizing and knowledge building Feminism argues that the male dominated knowledge represents a skewed perception of reality and is only partial knowledge Feminism is a generalized wide ranging system of ideas about social life and human experience developed from a woman centered perspective It treats women as the central subjects in the investigative process and seeks to see the world from the distinctive vantage points of women in the social world The best way to empower women and better the situation for women is to take women s daily experiences and their informal theorizing into account and on this basis adopt feminist approaches to building theory and knowledge Philosophising Experiences and Vision of the Female Body Mind and Soul Historical Context and Contemporary Theory provides an overview and introduction to the study of feminist theory and practice in the social sciences This book provides a starting point for further and more advanced study of the nexus of feminism gender and development and translates feminist theory and concepts into practice The chapters investigate in a historical context mainstream and contemporary theories of feminism and gender studies This book is ideal for post graduate students of social science researchers of development management business management public governance and gender and development activists feminists and practitioners stakeholders researchers academicians and students interested in feminist theory and knowledge building

Women and Bullfighting Sarah Pink, 2020-07-12 This book investigates the popularity and success of contemporary women performers in bullfighting culture which has been framed by a discourse of traditionalist masculinity This examination of the changing situation of women in the bullfighting world is used to explore the ways in which gender is represented enacted and negotiated in contemporary Spain The bullfight in the 1990s is in an ambiguous position it is a traditional performance in a changing consumer society In order to survive it needs to adapt itself to a wider social context and in particular to international media coverage It is in this context that the current success of women performers is located However women performers are a contested phenomenon in the bullfighting world there is heated debate over their acceptability much of which focuses on the body Moreover the entry of women into the bullfight questions existing definitions of the sport s ritual structure and of gender relations in Spain Thoroughly researched and compelling to read Women and Bullfighting addresses these issues and argues that existing traditionalist approaches to gender bullfighting and ritual in Spain need to be revised in order to locate women bullfighters in the context of a richly varied culture which is increasingly affected by the media and contemporary patterns of consumption This provocative book will be of interest to researchers and students of anthropology gender studies sociology cultural studies media studies and Spanish studies
