Diapause H. Dingle,2012-12-06 This volume is an outgrowth of a Symposium entitled Evolution of Escape in Space and Time
held at the XV International Congress of Entomology in Washington D C USA in August 1976 The choice of topic was
prompted by recent advances in evolutionary ecology and the apparent suitability of insect migration and dia pause as
appropriate material for evolutionary studies In the event that choice seems amply justified as I hope a perusal of these
papers will show These Sympos ium papers hardly cover the topic of the evolution of escape mechanisms exhaustively and I
am sure everyone will have his favorite lacuna Some of the more obvious ones are indicated by Professor Southwood in his
Concluding Remarks at the end of the book The purpose of the Symposium however was not complete coverage but rather to
indicate the potential inherent in insect migration and diapause for the study of evolutionary problems In that I think we have
succeeded reasonably well These papers are expanded and in some cases somewhat altered versions of the papers delivered
in Washington This has allowed greater coverage of the topics in question I suggested a format of a general overview of a
topic emphasizing the author s own research con tributions In general the papers follow this outline although emphases vary
