Public Health and Infectious Diseases Jeffrey Griffiths, James H. Maguire, Kristian Heggenhougen, Stella R. Quah, 2010-03-09 Emerging infectious diseases may be defined as diseases being caused by pathogens only recently recognized to exist This group of diseases is important globally and the experience of the last 30 years suggests that new emerging diseases are likely to bedevil us As the global climate changes so changes the environment which can support not only the pathogens but also their vectors of transmission This expands the exposure and effects of infectious disease and therefore the importance of widespread understanding of the relationship between public health and infectious disease Public Health and Infectious Diseases brings together chapters that explain reasons for the emergence of these infectious diseases These include the ecological context of human interactions with other humans with animals that may host human pathogens and with a changing agricultural and industrial environment increasing resistance to antimicrobials the ubiquity of global travel and international commerce Features the latest discoveries related to influenza with a newly published article by Davidson Hamer and Jean van Seventer Provides a listing of rare diseases that have become resurgent or spread their geographic distribution and are re emergent Highlights dengue and malaria as well as agents such as West Nile and other arboviruses that have spread to new continents causing widespread concerns Includes discussions of climate influencing the spread of infectious disease and political and societal aspects
