CAVE DWELLERS IN GRAFFITI BATTLE

Graffiti - the curse of the modern age.

Tenants of the Lascaux caves in the Dordogne are hopping mad. They've been given two weeks to get out of their homes, all on ac-

count of a little wall-painting.

VANDALS

"They're vandals," said the caves' landlord. "Before these people moved in the caves were in excellent condition. Now they're covered in graffiti which will cost a great deal to remove. We are understandably annoyed, having spent a lot of time and money bringing these dwellings up to modern standards."

And here's its hoof print. See? During the long winter months we put a lot of effort into these paintings so that our children can recognize the animal and its track. It makes the hunting season so much easier. Imagine what would happen if we didn't do it. We'd have kids nuzzling at a sabre-toothed tiger shouting, "Goat! Easy meat!"

PROPERTY SLUMP

But the landlord is standing his ground. "In these times of falling house prices you can't afford to let standards slip," said the agents. "Some of the graffiti is quite unrecognizable as man or beast. And look at the roof."

MAN BURNS FINGER IN FIRE

Expert Warns Of
New Cave Danger

"It was a shock," cave-man Zog told the Sentinel. "I got home from a hard day's hunting-gathering and saw this pretty red stuff in the cave. Naturally, I reached out to touch it. Imagine my surprise when I got burned. It was fire! Fire, previously a natural phenomenon, has entered the house. Reports from around the

world point to widespread use of this dangerous new domestic appliance.

VOLCANOES

Insurance companies blame the Society of Firemakers. "They go out with long sticks looking for fire whenever they can find it," said a spokesman. Bush fires, lightning strikes, volcanoes, anything that's hot. Then they put their

sticks in the flame and rush back to start fires in a household situation. This is potentially lethal.

Knowledge, Power and Ignorance Bidhan Kanti Das, Gorky Chakraborty, Abhijit Guha, 2024-06-21 What is knowledge and ignorance How is it decided Do power and power relations influence this process Does the spread of knowledge lead to more ignorance Is ignorance socially produced Is knowledge always socially contextualized This book deals with these important questions on the interplay of knowledge ignorance and power located in varied contexts in India As systematic knowledge grows so does the possibility of ignorance Ignorance is a state which people attribute to others and is loaded with moral judgment Thus being underdeveloped often implies a kind of stupidity or failure This volume seeks to be premised in a framework where ignorance is understood as being a socially produced and maintained phenomenon where the ways of knowing and not knowing are interdependent It is a novel attempt for an academic re orientation of the Knowledge Ignorance paradigm through a process of re interpretation of the bounded purview attached with the existing epistemological understandings It focuses on concrete case studies often with an ethnographic stint The volume critically looks at various

aspects Epistemological Issues Understanding Community Perspectives and the State Natural Resources Power and Ignorance Media and Production of Non Knowledge and other emerging areas Each essay bears a striking similarity that of understanding the complex processes and dynamics of the production of ignorance in a field of commonly held beliefs of knowledge be it scientific societal religious magical or political through the overarching realm of power This interdisciplinary volume will be of interest to a cross section of academics and students of sociology social anthropology political science human geography history public policy and development studies

Stone Age Sentinel Fergus Fleming, Paul Dowsell, 1998-08-01 These funny factual books take an imaginative but historically accurate look at how a modern tabloid newspaper might have covered the issues of the past but with tongue firmly in cheek

In the Forest Vishvajit Pandya, 2009-04-16 There are always at least two histories of encounter or contact as each party would tell the story differently but where and when is it really the first contact and for whom This book deploys an analytical framework developed from Semiotics to have both sides of the story address each other It is ethnography of dialogue emerging from textual representation by outsiders and its relationship to visual response and presentations by the Andaman Islanders that this book aims to present as the critical ethnography of history The section on Visuality looks at how the Other is incorporated into an organized knowledge system including Ongee myths and songs about outsiders and the early photographs of tribal people by British settlers and ethnographers The section on Materiality concerns the investment in things made to influence natural processes or to distinguish the human body and discusses how they are transacted between cultures that come into contact The concluding section on history addresses encounters and developments in which the experiences of both tribal and settler are implicated more thoroughly than in the transaction of objects Thus juxtaposing alternative perspectives on change indicates areas of experience unaccounted for in the dominant discourse and shows the provisionality of images

Megaliths and Lost Science Learn Alchemical, 2025-08-20 Across windswept plains misty coasts and forgotten valleys stand the megaliths silent monuments of stone that defy time and explanation From the vast circles of Stonehenge and Carnac to the underground chambers of Malta from the spiraled carvings of Newgrange to the shattered blocks of Puma

Punku these sites are more than ruins They are enigmas carved in granite whispering of a science we no longer understand For centuries archaeologists explorers and visionaries have asked Who built them and why Were these monuments primitive ritual centers or did they encode astronomical knowledge acoustic harmonics and geometric principles lost to history Why do so many cultures separated by oceans share spirals cup marks and sacred orientations toward the stars Could sound itself have been a forgotten tool shaping stone and altering consciousness In *Megaliths and Lost Science* the stones are not treated as mute relics but as active archives of ancient memory This book journeys through spirals and symbols echo chambers and alignments myths and suppressed discoveries uncovering how these monuments may have preserved fragments of a forgotten world science Drawing upon archaeology archaeoastronomy mythology and emerging fields such as archaeoacoustics and cymatics it challenges orthodox timelines while grounding its insights in cross cultural comparisons and hard data Both rigorous and provocative this work invites readers into the great debate between mainstream history and alternative visions of the past It explores how colonialism and academic orthodoxy have shaped the way we interpret sacred sites and how new technologies satellite mapping genetic research acoustic testing are reawakening questions long dismissed This is not a book of simple answers but of necessary questions The megaliths endure because they were built on more than stone They were tuned to resonance aligned with the heavens and infused with meaning Their silence is deceptive for those who listen carefully the stones still speak

Islands Of

India Dr. Sarit Kumar Mukerji, This book gives many interesting and informative details about the various big and small islands of India. **The Granite Monthly**, 1914. Telling Children About the Past Nena Galanidou, Liv Helga

Dommasnes, 2007-12-01. This book brings together archaeologists, historians, psychologists and educators from different countries and academic traditions to address the many ways that we tell children about the distant past. Knowing the past is fundamentally important for human societies as well as for individual development. The authors expose many unquestioned assumptions and preformed images in narratives of the past that are routinely presented to children. The contributors both examine the ways in which children come to grips with the past and critically assess the many ways in which contemporary societies and an increasing number of commercial agents construct and use the past.

The Magic of Crystals Ken and

Joules Taylor, 2014-12-18. This book is a guide to your personal discovery of crystals. The beauty and power of crystals and

other stones have long been recognized from the ancient times of Tutankhamen to the modern masterpieces of Cartier and Fabarg From precious jewellery to the bricks and mortar that make up our homes they have now become an integral part of our lives Perhaps the huge upsurge of spiritual interest in crystals towards the end of the 20th century coincides with the significance many people attach to the dawn of a new millennium Or perhaps more people have become intrigued by the new and interesting crystals now available from all corners of the world The Magic of Crystals explores how these stones are the product of natural energy derived from natural forces such as ancient stars the sun the movement of the earth over thousands of years and the heat of molten rock It would almost seem wasteful to ignore them
