Stones Around Callanish Guide To The Minor Megalithic Sites Of The Callanish Area:

The Book of Unconformities Hugh Raffles, 2020-08-25 From the author of the acclaimed *Insectopedia* a powerful exploration of loss endurance and the absences that permeate the present When Hugh Raffles's two sisters died suddenly within a few weeks of each other he reached for rocks stones and other seemingly solid objects as anchors in a world unmoored as ways to make sense of these events through stories far larger than his own A moving profound and affirming meditation *The Book of Unconformities* is grounded in stories of stones Neolithic stone circles Icelandic lava mica from a Nazi concentration camp petrified whale blubber in Svalbard the marble prized by Manhattan's Lenape and a huge Greenlandic meteorite that arrived with six Inuit adventurers in the exuberant but fractious New York City of 1897 As Raffles follows these fundamental objects unearthing the events they've engendered he finds them losing their solidity and becoming as capricious indifferent and willful as time itself *Building the Great Stone Circles of the North* Colin Richards, 2013-11-30 Of all prehistoric monuments few are more emotive than the great stone circles that were built throughout Britain and Ireland From the tall elegant pointed monoliths of the Stones of Stenness to the grandeur of Stonehenge and the sarsen blocks at Avebury circles of stone exert a magnetic fascination to those who venture into their sphere In Britain today more people visit these structures than any other form of prehistoric monument and visitors stand in awe at their scale and question how and why they were erected *Building the Great Stone Circles of the North* looks at the enigmatic stone structures of Scotland and investigates the background of their construction and their cultural significance **The Stones Around Callanish** Gerald Ponting, 2000 *Stone Circles* Colin Richards, Vicki Cummings, 2024-08-27 The definitive guide to the stone circles of Britain and Ireland From Stonehenge and the Ring of Brodgar to the Rollright Stones and Avebury the British and Irish Isles are scattered with the stone circles of our prehistoric ancestors Although there have been many theories to explain them to this day there is no consensus about their purpose Colin Richards and Vicki Cummings provide a clear and illuminating field guide to 424 key stone circle sites in Britain and Ireland Organised by region this handy volume sets out the features of these megalithic monuments including their landscape position construction and physical properties The authors take stock of cutting edge research and recent excavations stone circles that were previously lost to time They present new insights on the chronology composition and roles of different circles to transform our understanding the sites Beautifully illustrated with photographs maps and plans this is an essential guide to Britain and Ireland's most mysterious prehistoric monuments **Materialitas** Gabriel Cooney, John Chapman, 2009-12-01 Stone monuments and objects are highly accessible today and formed a focus for engagement transformation and re use in the past Stone is inextricably linked to ideas of monumentality and remembrance It formed an active medium in the creation of identities and memory in a range of social contexts and practices including the embodied performative and incorporated practices of daily activities and traditions It can be argued that the material presence and physical character of stone objects and monuments were not only

actively harnessed in these encounters but were also the very stuff from which social relations were derived perceived and thought through This volume explores the power and effect of stone through the meanings that emerged out of peoples engagement and encounters with its physical properties Focused primarily on the Neolithic and Bronze Age of Atlantic Europe it brings together authors working on the materiality materialitas of stone via stone objects rock art monuments and quarrying activity This highlights the connections that cross cut what are traditionally seen as disparate research areas within the archaeological discipline

Exploring Ancient Skies David H. Kelley, Eugene F. Milone, 2005-12-06 Exploring Ancient Skies brings together the methods of archaeology and the insights of modern astronomy to explore the science of astronomy as it was practiced in various cultures prior to the invention of the telescope The book reviews an enormous and growing body of literature on the cultures of the ancient Mediterranean the Far East and the New World particularly Mesoamerica putting the ancient astronomical materials into their archaeological and cultural contexts The authors begin with an overview of the field and proceed to essential aspects of naked eye astronomy followed by an examination of specific cultures The book concludes by taking into account the purposes of ancient astronomy astrology navigation calendar regulation and not least the understanding of our place and role in the universe Skies are recreated to display critical events as they would have appeared to ancient observers events such as the supernova of 1054 the lion horoscope or the Star of Bethlehem Exploring Ancient Skies provides a comprehensive overview of the relationships between astronomy and other areas of human investigation It will be useful as a reference for scholars and students in both astronomy and archaeology and will be of compelling interest to readers who seek a broad understanding of our collective intellectual history

for getting away from it all and which have been immortalized in music And don't forget to visit the Megalithic Portal website and get involved by posting your discoveries online All royalties from this book go to support the running of the Megalithic Portal www.megalithic.com **Archaeology**, 1984 **Whitaker's Cumulative Book List**, 1984 **Set in Stone** Vicki Cummings, Amelia Pannett, 2005 As its title might suggest this volume sets out to present a new view of Scotland's Neolithic as seen via its monumental structures The papers brought together here came out of a research day at Cardiff University's School of History and Archaeology in January 2002 and cover a diverse number of topics They raise questions of ancestry and worldview and highlight the amount that can be done in examining the settings of monuments **The Old Stones of Scotland** Andy Burnham, 2019-01-01 Where to start with Scotland From what amounts to a stone circle showroom at Machrie Moor on Arran in the southwest up to Orkney in the far north where some of Britain's most spectacular prehistoric remains can be found there are amazing sites of all types up and down the country Some settings are unexpected Balfarg one of Scotland's largest henge monuments is situated in the centre of a 1980s housing estate in Fife while the stone circle of Craighead Badentoy in Aberdeenshire is surrounded by huge industrial containers If you don't have long then the Isle of Arran or Kilmartin Valley Argyll are good choices as both are reachable in a day from Glasgow and contain a wealth of prehistoric monuments If you have longer then consider visiting Orkney or Western Isles such as Lewis and Harris for world famous sites as well as hundreds of lesser known treasures The Old Stones of Scotland is part of a series covering the megalithic and other prehistoric sites of Britain and Ireland The series is published together as The Old Stones A Field Guide to the Megalithic Sites of Britain and Ireland available as a book and an ebook **Bibliography of Monuments in the Care of the Secretary of State for Scotland** Morag Cross, 1994 British Books in Print, 1985 **The British National Bibliography** Arthur James Wells, 1979 **Whitaker's Books in Print**, 1998 **From Carnac to Callanish** Aubrey Burl, Dr Aubrey Burl, 1993-01-01 This book discusses the lines of standing stones that until now have been the neglected wonders of prehistoric Europe rows that were foci of rituals in Britain Ireland and Brittany for over two thousand years Places such as Carnac in Brittany and Callanish in the Hebrides are visited by many visitors each year but before now there has been no book that seriously explains the history significance and background to these impressive sites Aubrey Burl shows that the settings vary from pairs of isolated stones in the far south west of Ireland to networks of long lines in Scotland Dartmoor and Brittany and describes the types in a sequence of architectural chapters that stress the increasing social and commercial connections between regions hundred of miles apart He uses information from a wide variety of sources excavation reports megalithic art astronomical analyses and legends to provide explanations of why the rows were erected when and what they may have been used for *Megaliths and Lost Science* Learn Alchemical, 2025-08-20 Across windswept plains misty coasts and forgotten valleys stand the megaliths silent monuments of stone that defy time and explanation From the vast circles of Stonehenge and Carnac to the underground chambers of Malta from the spiraled carvings of Newgrange to

the shattered blocks of Puma Punku these sites are more than ruins They are enigmas carved in granite whispering of a science we no longer understand For centuries archaeologists explorers and visionaries have asked Who built them and why Were these monuments primitive ritual centers or did they encode astronomical knowledge acoustic harmonics and geometric principles lost to history Why do so many cultures separated by oceans share spirals cup marks and sacred orientations toward the stars Could sound itself have been a forgotten tool shaping stone and altering consciousness In Megaliths and Lost Science the stones are not treated as mute relics but as active archives of ancient memory This book journeys through spirals and symbols echo chambers and alignments myths and suppressed discoveries uncovering how these monuments may have preserved fragments of a forgotten world science Drawing upon archaeology archaeoastronomy mythology and emerging fields such as archaeoacoustics and cymatics it challenges orthodox timelines while grounding its insights in cross cultural comparisons and hard data Both rigorous and provocative this work invites readers into the great debate between mainstream history and alternative visions of the past It explores how colonialism and academic orthodoxy have shaped the way we interpret sacred sites and how new technologies satellite mapping genetic research acoustic testing are reawakening questions long dismissed This is not a book of simple answers but of necessary questions The megaliths endure because they were built on more than stone They were tuned to resonance aligned with the heavens and infused with meaning Their silence is deceptive for those who listen carefully the stones still speak
