Stones Of The Sky:

Stones of the Sky Pablo Neruda, 1987 This suite of thirty poems is Neruda's last love song to the Earth. When he wrote these poems he was dying of cancer and as the title suggests he addresses not ordinary stones but cosmic ones: stones that reconcile immobile permanence and the clarity of spiritual flight. When the poet meets his crystallized self the encounter takes on an eerie brilliance. The Village Voice Bilingual with introduction. An excellent bilingual edition. Choice

Sky Blue Stone Arash Khazeni, 2014-05-10 This book traces the journeys of a stone across the world. From its remote point of origin in the city of Nishapur in eastern Iran, turquoise was traded through India, Central Asia, and the Near East, becoming an object of imperial exchange between the Safavid, Mughal, and Ottoman empires. Along this trail unfolds the story of turquoise, a phosphate of aluminum and copper formed in rocks below the surface of the earth, and its discovery and export as a global commodity. In the material culture and imperial regalia of early modern Islamic tributary empires, moving from the steppe to the sown, turquoise was a sacred stone and a potent symbol of power projected in vivid color displays. From the empires of Islamic Eurasia, the turquoise trade reached Europe, where the stone was collected as an exotic object from the East. The Eurasian trade lasted into the nineteenth century when the oldest mines in Iran collapsed and lost. Aztec mines in the Americas reopened, unearthing more accessible sources of the stone to rival the Persian blue. *Sky Blue Stone* recounts the origins, trade, and circulation of a natural object in the context of the history of Islamic Eurasia and global encounters between empire and nature.
