## **Storm Over Venezuela:**

*Weekly Climate Bulletin*, 1993      **Resource Nationalism and Energy Policy** David R. Mares, 2022-10-04 It is widely thought that state ownership of natural resources oil and natural gas in particular causes countries to fall under the sway of the resource curse In such cases governments allegedly display resource nationalism which destabilizes the economy society and politics In this book David R Mares dispels these beliefs and develops a powerful new account of the relationship between state resource ownership and energy policy Mares examines variations in energy policy across a wide range of countries underscoring the fact that in most of the world outside the United States subsoil natural resources are owned by the state He considers the history of Latin American oil and gas policies and provides an in depth analysis of Venezuela from 1989 to 2016 before during and after the presidency of Hugo Chavez Mares demonstrates that the key factors that influence energy policy are the inclusiveness of the political system the level of competitiveness within policy making and the characteristics of individual leaders Domestic politics not state ownership determines the effectiveness and efficiency of energy policies the resource curse is avoidable Drawing on these findings Mares reconceptualizes resource nationalism arguing that government intervention into resource extraction is legitimate as long as the benefits are shared through the provision of public goods Featuring a sophisticated grasp of both Latin American politics and energy policy this book sheds new light on why some governments are responsible stewards of natural resources while others appropriate national wealth for partisan or private benefit      Atlas of Earth's Meteor Showers Peter Jenniskens, 2023-10-24 2025 PROSE Award Finalist in Chemistry Physics Astronomy and Cosmology The International Astronomical Union formalized the naming of meteor showers in 2006 Each newly discovered shower now is assigned a unique and officially recognized name number and 3 letter code Close to a thousand possible meteor showers have since been reported over a hundred in the cause of writing this book Atlas of Earth's Meteor Showers takes stock of all reported detections by going back to the combined video and radar data in hand at the end of 2021 in order to weed out duplicates and false detections Maps were created that show the direction of motion of meteors their radiant during 5 day and 10 day intervals throughout the year All 500 showers recognized are briefly described from their radiant speed and orbital elements and the meteoroid mass distribution index was calculated Physical properties of the meteoroids were derived from their beginning peak and end height from their deceleration in Earth's atmosphere and from spectroscopic information Candidate parent bodies are mentioned and the age of the stream was calculated from the dispersions in orbital elements and from the meteor magnitude distribution index A brief history is given of the shower's discovery of when features were first recognized and of results from dynamical modeling all with references to the literature Presents approximately 400 detailed meteor shower maps that show what showers are active on a given night for visual video and radar observers Provides thorough descriptions of each shower that can be used in planetary astronomy and for meteor observing sessions the discovery of new showers and planetary defense Highlights periodic

unusual showers that may be expected on a given night based on past occurrences that are important to satellite hazard avoidance and meteor storm chasing      **More Freaky Weather Stories** Grace Vail,2019-07-15 Weather is one of the most amazing forces on Earth Sometimes it s mild sometimes it s wild and sometimes it s downright freaky This book explores the weirdest weather on record including dramatic temperature changes deadly precipitation and weather events where and when they shouldn t be Readers will be captivated by stories of fog tsunamis never ending lightning storms and rainbows created by moonlight Full color photographs bring these and other incredible weather phenomena into detailed thrilling focus Fact boxes and sidebars provide more information about the freaky true science behind Earth s craziest weather

Harkin,Andrew Hunter Murray,2015-09-29 The Third Book of General Ignorance gathers together 180 questions both new and previously featured on the BBC TV programme s popular General Ignorance round and show why when it comes to general knowledge none of us knows anything at all Who invented the sandwich What was the best thing before sliced bread Who first ate frogs legs Which cat never changes its spots What did Lady Godiva do What can you legally do if you come across a Welshman in Chester after sunset      *Petro-Aggression* Jeff D. Colgan,2013-01-31 Oil is the world s single most

important commodity and its political effects are pervasive Jeff D Colgan extends the idea of the resource curse into the realm of international relations exploring how countries form their foreign policy preferences and intentions Why are some but not all oil exporting petrostates aggressive To answer this question a theory of aggressive foreign policy preferences is developed and then tested using both quantitative and qualitative methods Petro Aggression shows that oil creates incentives that increase a petrostate s aggression but also incentives for the opposite The net effect depends critically on its domestic politics especially the preferences of its leader Revolutionary leaders are especially significant Using case studies including Iraq Iran Libya Saudi Arabia and Venezuela this book offers new insight into why oil politics has a central role in global peace and conflict      **OFDA Annual Report** United States. *Colossus Challenged* H. Michael Erisman,2019-03-04 In recent years the powerful and long standing influence of the United States in the Caribbean and Central America has been challenged directly by Cuba Mexico and Venezuela and many think indirectly by the USSR This struggle for dominance which has altered and still is significantly changing the power configuration in the Caribbean Basin is examined in detail in *Colossus Challenged* The book contains seven chapters by prominent area specialists Five of the chapters focus on the Caribbean policies of the major contenders for power analyzing the evolution of each country s policies the main variables affecting its definition of interests and its decision making and its prospects for exerting regional influence in the foreseeable future The other two chapters look at the rivalry for Caribbean influence from the perspectives of eastern Caribbean and Central American governments

Sources for Forging the Modern World James Carter, Richard A. Warren, 2018-09 In *Forging the Modern World A History* authors James Carter and Richard Warren offer an accessible explanation of key transformations in global economic political and ideological relationships since the sixteenth century The book is distinct from most world history texts in three important ways First it explores the ways in which historians use and produce information Each chapter delves deeply into one or two specific issues of historical inquiry related to the chapter theme showing how new primary sources methodologies or intellectual trends have changed how we engage with the past Second it clearly explains the political economic and ideological concepts that students need to understand in order to compare events and trends across time and space Finally the chapters are organized around global historical themes which are explored through an array of conceptual and comparative lenses While the book chapters proceed chronologically each chapter is written with some chronological overlap linking it to preceding and subsequent chapters This strategy emphasizes the interconnectedness between the events and themes of one chapter and those of surrounding chapters A companion sourcebook follows the main book s organization and includes approximately 6 7 primary sources with two questions following each source
