Urban Stormwater Management in the United States Committee on Reducing Stormwater Discharge Contributions to Water Pollution, National Research Council, 2009-02-17 The rapid conversion of land to urban and suburban areas has profoundly altered how water flows during and following storm events putting higher volumes of water and more pollutants into the nation's rivers lakes and estuaries These changes have degraded water quality and habitat in virtually every urban stream system The Clean Water Act regulatory framework for addressing sewage and industrial wastes is not well suited to the more difficult problem of stormwater discharges This book calls for an entirely new permitting structure that would put authority and accountability for stormwater discharges at the municipal level A number of additional actions such as conserving natural areas reducing hard surface cover e.g. roads and parking lots and retrofitting urban areas with features that hold and treat stormwater are recommended

Stormwater Will Wilson, 2016-07-15 In February sitting under nearly 80 inches of snow residents of Boston dreamed of the great melt But city planners were less excited especially those working with the EPA For with every great storm snow or rain eventually comes buckets of stormwater The rivers of urban run off from man made surfaces roads freeways sidewalks roofed structures parking lots airports and industrial sites among others are teeming with all sorts of debris oil grease pesticides road salts metals bacteria and viruses and toxic chemicals from automobiles among others Urban terrain unlike soil does not have the ability to filter or biodegrade contaminants like natural soil does And the threat to human health by urban runoff is not only due to materials

scoured from surfaces but also from the infrastructure of the sewer system itself Storm water systems are often combined with sanitary sewer systems en route to sewage treatment plants Excessive storm water can cause this joint system to overflow resulting in sewage contamination of waterways Urban runoff is usually collected by storm sewers and discharged directly into waterways and many sources of discharge go uncontrolled and untreated Constructed Creeks is the primary reference on stormwater science and management that is intended for policy makers and active citizens as well as scientists looking for tools to educate with Current Practices in Modelling the Management of Stormwater Impacts William James,1994-02-07 This impressive publication presents the proceedings of the 1993 Toronto Stormwater and Water Quality Modelling meeting The number of papers in the book has been substantially increased and for the first time the contributions have been peer reviewed for novelty accuracy readability and relevance Chapters are arranged in five sections ecosystem impacts water quality modelling new methods and modelling data management and current practice The appendices are valuable research aids with a detailed index a substantial glossary encompassing the entire discipline lists of acronyms models and abbreviations and a complete list of authors cited in the book The editor also provides a classification of the 485 papers of the 11 year series of conferences held at the University of Kentucky at Louisville *Advances in Modeling the Management of Stormwater Impacts* William James,1997-01-01 The latest book in the popular series demonstrates state of the art methods models and techniques for water quality management This book includes a CD ROM that collects hundreds of hard to find literature citations from the gray literature Municipal Stormwater Management Thomas N.
