The Collapse of Global Liberalism Philip Pilkington,2025-06-03 In the 1990s a vision emerged of a frictionless world of globalization in which the West would become ever richer on the basis of a tech based service economy all underpinned by a rules based liberal international order It became the basis for the mainstream politics of centre left and right Philip Pilkington argues that this vision was always delusional and is now dying It is based on a doctrinaire and unrealistic form of liberalism and has given rise to hollowed out financialised economies and disintegrating societies that can barely even reproduce their population or meet their energy needs The US and UK find themselves ill equipped to compete with China and other non liberal states within an emerging post liberal order in which what really matters is industrial capacity

realpolitik and military strength Only by abandoning our liberal delusions and advancing our own brand of hard headed post liberalism can the West survive No clear sighted observer of contemporary geopolitics can afford to miss this bracing diagnosis of the West s malaise and bold agenda for renewal

Environmental Advertising in China and the USA Xinghua Li,2016-05-05 Since the late 1980s green consumerism has been hailed in the West as an efficient solution to environmental problems However Chinese consumers have been slow to warm up to eco friendly products Consumers prefer SUVs to hybrid cars health supplements and snake oil medicines to organic foods and eco fashion is still secluded in high end designer studios These choices contradict the findings of many sustainable lifestyle surveys that claim to register a rising desire for green products among the Chinese This book examines the psycho cultural differences that disrupt the translation of eco friendly appeals to China by analyzing environmental advertising It explores the different notions of green the structures of desire that underlies the advertisements and how they are shaped by ideological cultural and historical differences Rather than arguing the superiority of the American or Chinese version of green consumerism the book interrogates the role of advertising in the global spread of Western ideologies and explores the possibilities for consumers to resist transnational corporate hegemony in the green movement This book fills an important gap in the critical scholarship on green marketing and should be of interest to students and scholars of environment studies green advertising and marketing environmental communication and media studies China studies and environmental sociology ethics and cultural studies

The Internationalisation of Young High-Tech Firms Oliver Bürgel, Andreas Fier, Georg Licht, Gordon Murray, 2012-12-06 There is now a certain tradition of Anglo German comparative research on new technology based firms NTBFs Two of the most influential studies in this area have both been sponsored by the Anglo German Foundation for the Study of Industrial Society AGF Starting in 1977 the first AGF project on NTBFs which was carried out by the consultancy firm Arthur D Little has been one of the most important early contributions in this field Little 1977 This report was the first public document to use the term new technology based firm and to provide a definition which despite its operational limitations subsequently became an established term in the literature More importantly this study represented one of the first serious attempts to survey the existing stock of this type of firm The report was critical of the contemporary situation in Europe This is a policy area which continues to be hotly debated see European Commission 1995 Bank of England 1996 and HM Treasury 1998 It emphasised that in comparison with the USA Germany and the UK were each lagging behind if judged by the rate of formation of NTBFs and in their total contribution to the overall economic activity of both countries In terms of a policy contribution this study was instrumental in highlighting the lack of support infrastructures for the genesis and growth of high tech start ups in two of Europe s leading economies
