The Hospice Movement Easing Deaths Pains:

The Hospice Movement Cathy Siebold,1992 What had been intended as a full fledged alternative to a system of care that seemed best suited to the interests of physicians and hospital staff not the terminally ill has for the most part been reduced to a mere extension of that system Cathy Siebold a social worker and psychotherapist who has witnessed firsthand the evolution of hospice care since its modern incarnation in the 1960s presents a balanced and objective analysis of the movement s accomplishments and failings in *The Hospice Movement Easing Death s Pains* Using social movement theory to frame her discussion Siebold traces the bell curve of growth maturity and decline that to a point has characterized the hospice movement [Music at the End of Life](#) Jennifer L. Peter N. Stearns,2020-10-13 *The Routledge History of Death Since 1800* looks at how death has been treated and dealt with in modern history the history of the past 250 years in a global context through a mix of definite often quantifiable changes and a complex qualitative assessment of the subject The book is divided into three parts with the first considering major trends in death history and identifying widespread patterns of change and continuity in the material and cultural features of death since 1800 The second part turns to specifically regional experiences and the third offers more specialized chapters on key topics in the modern history of death Historical findings and debates feed directly into a current and prospective assessment of death as many societies transition into patterns of ageing that will further alter the death experience and challenge modern reactions Thus a final chapter probes this topic by way of introducing the links between historical experience and current trajectories ensuring that the book gives the reader a framework for assessing the ongoing process as well as an understanding of the past Global in focus and linking death to a variety of major developments in modern global history the volume is ideal for all those interested in the multifaceted history of how death is dealt with in different societies over time and who want access to the rich and growing historiography on the subject Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license *The Theology of Suffering and Death* Natalie Kertes Weaver,2013

This book offers a theological foundation for engaging with the realities of suffering and dying. Designed particularly for practical theology students and trainee caregivers, it introduces the spiritual and theological issues raised by suffering and dying. The chapters consider how Christian theology deals with the problem of suffering and how the Bible treats these difficult issues; post-biblical interpretations of Jesus' suffering and the Cross; modern instances including ecology, poverty, discrimination, and war; comparative religious approaches; and the depiction in popular culture. Natalie Weaver relates theology to practical issues of caregiving and provides a toolbox for thinking about suffering and death in a creative and supportive way.

Death and Dying in America Andrea Fontana, Jennifer Reid Keene, 2009-07-20 This engaging new book takes a fresh approach to the major topics surrounding the processes and rituals of death and dying in the United States. It emphasizes individual experiences and personal reactions to death as well as placing mortality within a wider social context, drawing on theoretical frameworks, empirical research, and popular culture. Throughout the text, the authors highlight the importance of two key factors in American society which determine who dies and under what circumstances: persistent social inequality and the American consumerist ethic. These features are explored through a discussion of topics ranging from debates about euthanasia to deaths resulting from war and terrorism; from the death of a child to children's experience of grieving and bereavement; and from beliefs about life after death to more practical issues such as the disposal of the dead body. Drawing on sociological, anthropological, philosophical, and historical research, the authors present the salient features of death and dying for upper-level students across the social sciences. For anyone interested in learning more about the end of life, this book will provide a useful and accessible perspective on the uniquely American understanding of death and dying.

Religion, Death, and Dying Lucy Bregman, 2009-11-25 A wide-ranging anthology for general readers covering many religious, ethical, and spiritual aspects of death, dying, and bereavement in American society. What do various spiritual and ethical belief systems have to say about modern medicine's approach to the end of life? Do all major religions characterize the afterlife in similar ways? How do funeral rites and rituals vary across different faiths? Now there is one resource that gathers leading scholars to address these questions and more about the many religious, ethical, and spiritual aspects of death, dying, and bereavement in America. *Religion, Death, and Dying* compares and contrasts the ways different faiths and ethical schools contemplate the end of life. The work is organized into three thematic volumes: first, an examination of the contemporary medicalized death from the perspective of different religious traditions and the professions involved; second, an exploration of complex, often controversial issues including the death of children, AIDS, capital punishment, and war; and finally, a survey of the funeral and bereavement rituals that have evolved under various religions.
