Abstract

The authors provide an up-to-date theoretically based qualitative review of research dealing with the relationship between HRM, employee well-being, and individual/organisational performance (HRM-WB-IOP research). The review is based on a systematic critical analysis of all HRM-WB-IOP studies ($N = 46$) published in 13 core HRM and management journals in the 2000 to 2018 period. The authors first identify different theoretical models of the HRM-WB-IOP relationship, which they then use to map research in the area. The results show that mutual gains conceptualisations play a dominant role in extant HRM-WB-IOP research, at the expense of alternative conflicting outcomes and mutual losses models, which are also shown to receive very limited empirical support across the 46 studies. As part of this mapping exercise, the authors identify important knowledge gaps in the area and conclude by setting out a number of key recommendations for future research to address these gaps.

KEYWORDS

Design For More-Than-Human Futures Martín Tironi,Marcos Chilet,Carola Ureta Marín,Pablo Hermansen,2023-09-18 This book explores the work of important authors in the search for a transition towards more ethical design focused on more than human coexistence In a time of environmental crises in which the human species threatens its own survival and the highest level of exacerbation of the idea of a future and technological innovation it is important to discard certain anthropocentric categories in order to situate design beyond the role that it traditionally held in the capitalist world creating opportunities to create more just and sustainable worlds This book is an invitation to travel new paths for design framed by ethics of more than human coexistence that breaks with the unsustainability installed in the designs that outfit our lives Questioning the notion of human centered design is central to this discussion It is not only a theoretical and methodological concern but an ethical need to critically rethink the modern colonialist and anthropocentric inheritance that

resonates in design culture The authors in this book explore the ideas oriented to form new relations with the more than human and with the planet using design as a form of political enquiry This book will be of interest to academics and students from the world of design and particularly those involved in emerging branches of the field such as speculative design critical design non anthropocentric design and design for transition **Revisiting Environmental and Natural Resource Questions in Sub-Saharan Africa** Wilson Akpan,Philani Moyo,2017-06-23 Based on case studies in Southern Africa West Africa and East Africa this book revisits some of the dilemmas and paradoxes associated with the development management and utilisation of environmental resources as well as lacklustre official handling of climate change related challenges in Sub Saharan Africa On the subject of natural resource exploitation in particular the book revisits scholarly debates and specific practices around compensation benefit and burden sharing local participation and space place dynamics It highlights fundamental ambiguities in the ways the dominant discourses and policy responses have been framed and mobilised and examines epistemic and ideational incongruences that have hobbled and sometimes negated the effectiveness of otherwise well intentioned interventions On climate change the book revisits debates around the vulnerability assets nexus with regard to mitigation and adaptation as well as the intersection of climate information and livelihoods in agro based settings The contradictions gaps and limitations of climate change policies and strategies in different regions are re examined based on new data In the last few years the Environment and Natural Resources Working Group of the South African Sociological Association SASA has intensified efforts to go beyond the annual SASA Congresses and the production of journal articles in making the research agendas of its members more visible to the global scholarly and policy community This book is one result of such efforts It calls for a constant questioning of orthodoxies and the promotion of ethnographically sensitive and epistemologically nuanced scholarly and policy approaches to developmental challenges in Africa especially in relation to environmental resources and environmental change **Orwell Reconsidered** Stephen Ingle,2019-10-21 George Orwell has had a profound influence on modern politics and culture He is regularly invoked as an authority by journalists commentators and politicians and his works speak with increasing relevance to our polarised and media saturated society Stephen Ingle explores Orwell s character his life and his beliefs by guiding the reader through the main events private and public that shaped his life and major works This includes his time fighting in the Spanish Civil War as well as the writing of classics like Animal Farm and 1984 The book also reconsiders Orwell s legacy and contextualises his contemporary resonance Orwell it is argued is more concerned with morality than ideology This book will be of significant interest to students and other readers interested in Orwell s life as well as his profound contribution to the history of social and political thought and English literature **Revisiting Jesus Christ's Continuing Humanity** Patrick Nasongo Ph.D.,2022-09-12 Most readers are familiar with Jesus deity and His humanity while He was here on the earth but they seldom consider the fact of His continuing humanity Dr Nasongo investigates the insufficient treatment of this subject from the time of the Apostolic Fathers

to the present and then he presents the biblical evidence for Christ's continuing humanity. In the process he demonstrates its relationship to apologetics, hermeneutics, and systematic theology with a special emphasis on eschatology.
