foregrounds the overlapping and often contested work these institutions do in narrating and memorializing histories of genocide and human rights abuses for a public audience. Museums that link the Holocaust with social justice, human rights, and genocide prevention have been founded in many countries, for example the Kazerne Dossin Memorial Museum in Belgium, the Anne Frank House in the Netherlands, and the Johannesburg Holocaust and Genocide Centre in South Africa, making Holocaust and human rights museums a global phenomenon. It is not uncommon for these institutions to court controversy by linking the Holocaust to human rights issues in their locales and abroad. Some begin from a Holocaust core and extrapolate from this history to address broader concerns, while others integrate the Holocaust as a or at times the case study par excellence of human rights abuses. Other institutions that may not explicitly focus on the Holocaust continue to engage these representational practices to highlight other instances of genocide and human rights abuses. The case studies in this book illuminate the convergences between Holocaust and human rights museums in their demands for social justice and reparation, educational and activist purpose, design principles, and curatorial choices. But it also shows how these museums can also be sites of contestation around how stories of suffering, courage, and survival are told, whose stories are prioritized, and who is consulted. Although Holocaust museums were once the most influential form of representation of human rights issues in the international museum and heritage fields, they are now in dialogue, visually, spatially, methodologically, with museums and memorial sites concerned with human rights more broadly. Interrogating debates in both museology and Holocaust memory studies, this volume reveals how institutions dedicated to these concerns have become active and influential contributors to local, national, and transnational dialogues about human rights.

**The Idea of a Human Rights Museum**

Karen Busby, Adam Muller, Andrew Woolford, 2015-09-25. The Idea of a Human Rights Museum is the first book to examine the formation of the Canadian Museum for Human Rights and to situate the museum within the context of the international proliferation of such institutions. Sixteen essays consider the wider political, cultural, and architectural contexts within which the museum physically and conceptually evolved, drawing comparisons between the CMHR and institutions elsewhere in the world that emphasize human rights and social justice. This collection brings together authors from diverse fields: law, cultural studies, museum studies, sociology, history, political science, and literature, to critically assess the potentials and pitfalls of human rights education through museums. Accessible, engaging, and informative, the collection's essays will encourage museumgoers to think more deeply about the content of human rights exhibits. The Idea of a Human Rights Museum is the first title in the University of Manitoba Press's Human Rights and Social Justice Series. This series publishes work that explores the quest for social justice and the basic rights and freedoms to which all human beings are entitled, including civil

political economic social collective and cultural rights
