The Human Reality:

The Human Reality Valentin Matcas, 2016-04-20 There is a difference between the material objective world and the actual human reality since the human reality is very vast formed of this physical objective world and much more Since there is a difference between the actual human reality and the current knowledge about the human reality while by altering the knowledge itself about the human reality it remains separated into the consensual human reality and the actual normal objective human reality While if you lack awareness of all these you end up exploited as a human being in a human world Because you cannot study the human reality without comprehending those controlling the knowledge about the human reality and how they do so forcefully consensually or through stereotypes set in place since Aristotle and long before since this is how they end up controlling you and the entire world Furthermore you cannot form an accurate model of the universe if you do not understand yourself if you do not understand exactly your needs driving you to perform this study if you do not understand your mind constituting your means of understanding the universe and if you do not understand Life altogether spanning the universe actively involved in its structure shape behavior and development At the same time understanding the world around is the key to understanding yourself your life and your meaning in life and in the world closing this circle of knowledge Since this is why we consider the most relevant circumstances behind the famous studies of the world we find true ideas and how they influence the understanding of the world throughout time we seek to understand how and why people accept consensual scientific and ideological models of this world and how this influences their life interconnectivity and development while we discover systematically this entire world Furthermore we use this study of the human reality to test all significant knowledge and ideas including human reasoning past civilizations indoctrination Einstein astral planes of existence ideologies Renaissance the Brotherhood ideological control ages of Earth cosmogony social and mind control Giordano Bruno consensual interconnectivity Relativity human origins and development Copernicus the Consensual Matrix the Big Bang Theory dreams ancient wars stereotypes Galileo Galilei conscious reasoning Schrodinger his cat Creationism alternate realities and much more the entire human reality This book studies systematically the human reality focusing on accurate truth while discarding beliefs and errors of reasoning correlating with all relevant knowledge from physics religion spirituality society education history psychology and more If you want to learn more about everything surrounding you and everything that you really are this book is for you

that offers a challenge to every thinking person It shows us who and what we really are where we have come from and why and where we are really going

Human Reality--Who We Are and Why We Exist Anonymous,2009-11-01 Human beings have questioned their existence for as long as they have been able to ponder and reason In attempting to answer the questions of human existence some have become religious others atheist some spiritual others agnostic some scientific others philosophical Regardless of how the questions have been answered we have only been left with more questions or the concession that many things about our existence are just unknowable or beyond our ability to understand Because of the difficulty in continually pondering the conclusions of what seem to be unanswerable questions we have turned our attention to fantasy and science fiction genres of thought that allow us to escape the reality of own ignorance Finally a book has been written that solves this human dilemma It is the most powerful book ever composed on the subject matter It transcends fantasy and science fiction in its simple presentation of reality and leaves the reader with the most profound perspective of human existence available It has the potential of changing one s life even the whole world forever This book answers all of life s questions leaving none on which to speculate or remained confused It provides the most complete and comprehensive answers to human reality ever given Every piece of the puzzle needed to understand who we are and why we exist is included And the most compelling element is that it speaks to our common sense the very essence of our humanity If read with an open mind this book will unfold a whole new perspective of the world and its inhabitants and what their relationship is with the rest of the Universe With this new and much needed perspective we stand to gain a full understanding of ourselves We will no longer remain shackled with the chains of ignorance prejudice and inequality that have kept humankind in bondage and misery for thousands of years Armed with this knowledge we will be able to reshape our individual realities and together transform our world not just for ourselves but for all life upon earth

0.1% Beyond Human Reality: An innocent Look into Existence and the Potential of Being Human S.S. López,2020-12-28 0 1 percent is a humble journey through the murky waters of human nature existential doubt suffering and human potential The 99 9 percent offers a starting point to understanding humanity through current human realities Rational subjective deep subjective intersubjective and virtual realities form the backbone of how we perceive analyze and rationalize whatever this thing is that we call existence The book offers the reader some perspective on the obstacles we face while living completely unaware of our whole vital experience in the world and the endless potential we possess as human beings in such an inter correlated universe Once we are clear about our limitations our values and deep layers of existence we enter the realm of our 0 1 percent Here we are fully self aware creators of our own experiences with our own self made choices taking full responsibility for ourselves and the world We can begin to dream of giving purpose to our life 0 1 Beyond Human Reality confronts us with the realization that we are the origin of all coming evil as well as the most awe inspiring acts of kindness

The Human Symbolic Construction of Reality Nils G. Holm,2014 It is typical of humans to create forms of understanding at a symbolic level of the biological and

physiological reality that confronts them This gives meaning and a coherent structure to the often chaotic nature of that reality This book sums up several years of research into religion from a perspective informed by history phenomenology and psychology Religion has been a means of creating such symbolic understandings The similarities between various religions are actually very great although their differences tend to dominate our view of them Everything in the world of religion can be traced back to everyday simple circumstances which through the construction of symbols at both the cognitive and the behavioral levels acquire a more elevated and sacred character The book provides an introduction to the key aspects of a psycho phenomenological study of the forms of expression within religions Series Nordic Studies in Religion and Culture Vol 2 Subject Religious Studies Phenomenology Psychology *The Human Civilization* Valentin Matcas, 2016-04-20 Were there advanced civilizations on Earth older than what it is currently believed and accepted Because we keep noticing their traces everywhere while authorities deny their presence Are there other civilizations out there among planets and stars Because we keep seeing their people around here pursuing their obscure interests with authorities ignoring everything Are there nonhuman civilizations on Earth in parallel with the human civilization Because they interact from the shadow of the underground with the human civilization while again authorities deny systematically their presence And when authorities are constrained in any way to give an answer they state vaguely that it is a matter of human survival And how can humans defend themselves of anyone and anything as they are held in ignorance and denial Is there life after death Because countless of people had died and came back to tell their story and it is always consistent This implies the existence of higher extraordinary civilizations in parallel with the human civilization from above These higher civilizations could be possible since their niches of life and existence are accurate and already present within other realities Science and academia ignore this topic entirely ridiculing all seekers of higher truth and forcing them in this manner to stop their research What can there be more important to know in this world than the meaning of life itself the meaning of this entire human civilization along with the meaning of the lives and existence of all humans here in this world and in all higher worlds Why postponing disclosure if it is imperative for people's wider existence Who profits and who loses through this entire coverup Who exactly controls the current human authority Why is humanity kept ignorant in what it concerns the most important subject of all life everywhere and life eternally intelligent and civilized life Because if there are other civilizations on Earth and elsewhere human or not if there are other realities up there besides this one populated and civilized then people's ignorance renders them vulnerable when they die and have to go elsewhere In this manner once you ignore the kind of realities that may be out there you might be tricked to go and live in treacherous dubious unholy worlds claiming that they are in fact the holly lands promised to you by your own religion And so you disappear Because it is stated in religious records to be careful not to follow false deities Yet how can you know anything in this domain if you are kept ignorant the entire time and probably lied to misled and many times tempted with irrelevant material compensations throughout life This book helps you understand

civilizations from a rigorous comprehensive perspective including the meaning interests agreements and intentions that civilizations have in the wider world why individuals form civilizations as an end product of their cumulative lifetime efforts and furthermore what meanings these civilizations have in the wider world **Science Fiction, Ethics and the Human Condition** Christian Baron, Peter Nicolai Halvorsen, Christine Cornea, 2017-07-10 This book explores what science fiction can tell us about the human condition in a technological world with the ethical dilemmas and consequences that this entails This book is the result of the joint efforts of scholars and scientists from various disciplines This interdisciplinary approach sets an example for those who like us have been busy assessing the ways in which fictional attempts to fathom the possibilities of science and technology speak to central concerns about what it means to be human in a contemporary world of technology and which ethical dilemmas it brings along One of the aims of this book is to demonstrate what can be achieved in approaching science fiction as a kind of imaginary laboratory for experimentation where visions of human or even post human life under various scientific technological or natural conditions that differ from our own situation can be thought through and commented upon Although a scholarly work this book is also designed to be accessible to a general audience that has an interest in science fiction as well as to a broader academic audience interested in ethical questions *The Human Reality and Politics* Taysir Najm Nashif, 2013-09-11 This book is a collection of descriptive and analytical articles The articles which were recently written deal with developments and events at the local regional and global levels It is the view of the author that forward and backward change is caused by dynamic seen and unseen factors of different qualities full freedom is imaginary politics is a major driving force in society and that to improve human relations there is a need for a better communication between human cultures Dynamics of change implies that all factors are relevant in the explanation of developments The author maintains that reality is wider than explanation and that in order to help in the achievement of peaceful existence there is a need to narrow socio economic gaps nationally and internationally *The American Journal of Sociology* Albion W. Small, Ellsworth Faris, Ernest Watson Burgess, Herbert Blumer, 1910 Established in 1895 as the first U S scholarly journal in its field AJS remains a leading voice for analysis and research in the social sciences presenting work on the theory methods practice and history of sociology AJS also seeks the application of perspectives from other social sciences and publishes papers by psychologists anthropologists statisticians economists educators historians and political scientists
