The Human Being As Music:

The Human Being as Music Lea van der Pals, 1992 **Music** Rudolf Steiner, 2016-07-22 Our neurosensory system is inwardly configured music and we experience music as an artistic quality to the degree that a piece of music is in tune with the mystery of our own musical structure Rudolf Steiner What is music Rudolf Steiner regards the essence of music as something spiritual inaudible to the senses The world of tones borne on the vibrations of air is not the essential element The true nature of music the spiritual element in music he says is found between the tones lies in the intervals as an inaudible quality Rudolf Steiner spoke repeatedly about music as something inherent both in the cosmos and the human being It played an important role in many forms of ritual and worship and people once perceived a link between music and the world of stars which was seen as the dwelling place of the gods Nowadays our view of music is divorced from such religious outlooks but research repeatedly demonstrates the profound effect it continues to have on us In this unique anthology of texts compiled with a commentary and notes by Michael Kurtz Steiner describes the realm of the spiritually resonating harmonies of the spheres and our intrinsic connection to this cosmic music He also explores the phenomenon of musical listening and experience as well as Goethe's approach to music *The Mystery of Musical Creativity* Hermann Beckh, 2019-11-06 Beckh ventures into provinces that I have not had the opportunity of investigating myself Rudolf Steiner Lost for decades the manuscript of Hermann Beckh's final lectures on the subject of music present fundamentally new insights into its cosmic origins Beckh characterises the qualities of musical development examines select musical works that represent for him the peak of human ingenuity and throws new light on the nature and source of human creativity and inspiration Published here for the first time the lectures demonstrate a distinctive approach founded on the raw material of musical perception Beckh discusses the whistling wind the billowing wave the song of the birds and particularly the theme of longing Never losing the ground from under his feet he penetrates perennial themes from the yearning for real spontaneity and the Mystery background uniting heaven and earth to spiritual knowledge that can meet the demands of the twenty first century Out of the cosmic context Beckh writes to the individual situation From there he seeks again the re won cosmic context He does not write as a musical specialist and then turn to universal human concerns rather Beckh writes from universal human concerns and reveals music as of special concern to everyone In addition to the transcripts of fifteen lectures this book contains a valuable introduction and editorial footnotes It also features appendices including Beckh's essay The Mystery of the Night in Wagner and Novalis reminiscences of Beckh by August Pauli and Harro R ckner Donald Francis Tovey's Wagnerian harmony and the evolution of the Tristan chord and several contemporaneous reviews of Beckh's published works **Music in the Human Experience** Donald A. Hodges, 2019-10-07 Music in the Human Experience An Introduction to Music Psychology Second Edition is geared toward music students yet incorporates other disciplines to provide an explanation for why and how we make sense of music and respond to it cognitively physically and emotionally All human societies in every corner of the

globe engage in music Taken collectively these musical experiences are widely varied and hugely complex affairs How did human beings come to be musical creatures How and why do our bodies respond to music Why do people have emotional responses to music Music in the Human Experience seeks to understand and explain these phenomena at the core of what it means to be a human being New to this edition Expanded references and examples of non Western musical styles Updated literature on philosophical and spiritual issues Brief sections on tuning systems and the acoustics of musical instruments A section on creativity and improvisation in the discussion of musical performance New studies in musical genetics Greatly increased usage of explanatory figures

Karl Rahner's Writings on Literature, Music and the Visual Arts

,2021-08-26 This book is made up of a collection of texts unavailable in one volume until now including six previously untranslated essays from a major theologian of the twentieth century Rahner's numerous writings focused on the revelation of God as mystery in the world and on the human being who has an essential openness towards the transcendent His articles reveal an empathy and a depth of insight into the relationship between theology faith and the arts which are remarkable and may take the reader by surprise More recently Rahner's contribution to the growing field of theology and the arts has been recognised by leading theologians on this subject He asserts that theology must integrate the verbal and non verbal arts as they are authentic means of human self expression of religious experience and of God's self communication and therefore they are essential sources of theology Rahner argues that theology understood as a person's reflexive self expression about him or herself in the light of divine revelation cannot be regarded as complete until the arts become an intrinsic moment of theology itself

Body and Force in Music Youn Kim,2022-09-01 Our understanding of music is inherently metaphorical and metaphoricity pervades all sorts of musical discourses be they theoretical analytical philosophical pedagogical or even scientific The notions of body and force are the two most pervasive and comprehensive scientific metaphors in musical discourse Throughout various intertwined contexts in history the body force pair manifests multiple layers of ideological frameworks and permits the conceptualization of music in a variety of ways Youn Kim investigates these concepts of body and force in the emerging field of music psychology in the late nineteenth and early twentieth centuries The field's discursive space spans diverse contexts including psychological theories of auditory perception and cognition pedagogical theories on the performer's bodily mechanism speculative and practical theories of musical rhythm and aesthetical discussion of the power of music This investigation of body and force aims to illuminate not just the past scene of music psychology but also the notions of music that are being constructed at present

The Driving Force of Spiritual Powers in World History Rudolf Steiner, 2023-05-05 7 lectures in Dornach Switzerland March 11 23 1923 CW 222 Historical happenings on Earth can be understood in their reality only when we see them as reflections of what is being enacted in the supersensible spiritual world between the beings of the higher hierarchies Rudolf Steiner March 17 1923 What is the qualitative difference between the utterance of true and untrue words Is there one How about between living and dead thoughts What is the origin of war and strife among peoples on Earth How can humanity find a right relationship to the beings of the spiritual world These are among the compelling questions addressed by Rudolf Steiner in this concise yet powerful series of lectures given in March 1923 comprising this volume of The Collected Works of Rudolf Steiner In these lectures Steiner portrays among other things the work of various hierarchical beings both in collaboration and sometimes in opposition to one another whose activity and strife in the spiritual world is mirrored in the migrations of and wars among peoples on Earth The clashes between East and West for example are thus seen in an entirely new light heralding a sea change in the approach to history No longer should events on Earth be viewed as isolated within themselves but rather as interwoven in a grand vibrant tapestry formed from the threads that connect humanity on Earth with the activity and aims of exalted spiritual beings Humanity has profound potential for both good and evil The question is whether we will be able to rise to a renewed form of cognition through which we can once again grasp living spiritual reality or we will persist in the dead intellectualized thinking so common today thinking that as Steiner points out in the final lecture of this volume if not transformed will lead to the gradual destruction of Earth itself These lectures are a tour de force that should not be neglected by any serious student of history or the future of humanity and human life more broadly Includes 10 color plates This volume is a translation from German of Die Impulsierung des weltgeschichtlichen Geschehens durch geistige Mächte Rudolf Steiner Verlag 1989 GA 222 Cover Image Naval Battle of Le Panto 1571 by Luca Cambiasi 1521 1585 at the Royal Monastery of San Lorenzo de El Escorial Spain
