**Malevich** Gerry Souter, 2012-05-08 Pioneer of geometric abstract art and one of the most important members of the Russian Avant garde Malevitch experimented with various modernist styles In reaction to the influence of Cubism and Futurism on artists in Russia Malevitch in his art reduced the world of nature to basic elements and colours such as in his Red Square 1915 He introduced his abstract non objective geometric patterns in a style and artistic movement he called Suprematism One of the important names of the twentieth century he however turned back to Primitivism once Russia's communist leaders forced him to do so

**Words for Odours** Melissa Barkat-Defradas, Elisabeth Motte-Florac, 2016-06-22 While the human sense of smell has long been considered underdeveloped there is nonetheless a growing body of literature to attest to its remarkable importance in human behaviour However there has been very little work conducted in linguistics which is all the more regrettable as economic globalization has made it increasingly useful to communicate on odours in a variety of domains such as the wine and perfume industries This volume brings together a number of studies on how olfactory experiences are verbalized applying both pragmatic and theoretical approaches to better understanding the different strategies speakers use to talk of odours Four major themes are investigated here Part I From Olfactory Perception to Verbalisation examines the various complex cognitive operations implemented in the process of olfactory perception Explorations of recollection processes also crucial for odour verbalization provide important insights into how cultural conditions contribute to shaping olfactory memories Part II Categories and Hedonic Valence focuses on how speakers circumvent paucity in vocabulary to describe odours in a variety of ways Sorting operations make it possible to either select an appropriate linguistic label for a given odour or to compensate for the lack thereof by using consistent descriptions Indeed although such cognitive operations are influenced by a subject's environment cultural representations and goals the contributions to this section show that hedonic value is crucial for categorizing odours Part III Lexical and Cultural Variation illustrates that some languages spoken on the African continent such as the Arabic and Bantu languages are relatively rich in

their olfactory lexicon thereby revealing the greater attention paid to odours in these societies That being said such relative richness or paucity can be modulated through a variety of mechanisms which shape the linguistic output as exemplified in Part IV Putting Odours into Words where the olfactory lexicons of two Indo European languages French and Greek are analysed from a comparative perspective
