**Deep History, Secular Theory** Luther Martin, 2014-05-21 Over the course of his career Luther H Martin has primarily produced articles rather than monographs. This approach to publication has given him the opportunity to experiment with different methodological approaches to an academic study of religion with updates to and different interpretations of his field of historical specialization namely Hellenistic religions the subject of his only monograph 1987. The contents of this collected volume represent Martin's shift from comparative studies to socio political studies to scientific studies of religion and especially to the cognitive science of religion. He currently considers the latter to be the most viable approach for a scientific study of religion within the academic context of a modern research university. The twenty five contributions collected in this volume are selected from over one hundred essays, articles and book chapters published over a long and industrious career and are representative of Martin's work over the past two decades.

In the process Brendan Goff argues Rotary became an extension of US power.

In light of modernity's rapid strides forward in electronic communication and lagging efforts to explore human nature Larry G Ehrlich's book focuses on the architecture of human communication behavior. It is divided into three sections which deal with intrapersonal interpersonal and public communication. This readable book not only offers a discussion on the most recent research in information technology and on relationships in a global community but it is a truly interdisciplinary approach to communication behavior.
