social disciplines The term economics imperialism refers to the expansion of economics to territories that lie outside the traditional domain of the discipline Its critics argue that in starting with the assumption of maximizing behaviour economics excludes the nuances of rival disciplines and has problems in interpreting real world phenomena This book focuses on a territory that persists to be largely intractable using the postulates of economics that of primitive societies In retracing the origins of economics imperialism back to the birth of the discipline this volume argues that it offers a reductionist interpretation that is poor in interpretative power By engaging with the neglected traditions of sociological and anthropological studies the analysis offers suggestions for a more democratic cooperation between the social sciences Economics as Social Science is of great interest to those who study history of economic thought political economy and the history of economic anthropology as well as history of social sciences and economic methodology **Paleoeconomics** Ola Olsson, 2024-10-17 This accessible and insightful textbook provides a comprehensive introduction to the economics of prehistory By presenting a chronological account of the beginnings of economics and human society it charts the key developments in early human history from the evolution of social norms and colonizing of unknown continents to the development of early technology and the transition to agricultural food production Particular attention is given to how human capital the natural environment social capital and the spread of knowledge and technical skills propelled economic development during prehistory The origin of modern concerns including wealth inequality stratified societies and environmental change are thoughtfully presented through the examining of the birth of the first states and human civilization This book provides a thrilling account of human evolution and economic development from its African origins and hunter gather days through to the invention of agriculture and the rise of early states Bringing together ideas from across economic history the political economy anthropology and evolutionary biology it will be relevant to students and general readers interested in these topics *Encounters, Excavations and Argosies* John Moreland, John Mitchell, Bea Leal, 2017-10-09 Richard Hodges one of Europe's preeminent archaeologists has throughout his career transformed the way we understand the early Middle Ages this volume pays tribute to him with a series of reflections on some of the themes and issues which have been central to his work over the last forty years
