## **Stone Houses And Earth Lords Maya Religion In The Cave Context:**

Stone Houses and Earth Lords Keith M. Prufer, James E. Brady, 2005-11-25 Stone Houses and Earth Lords is the first volume dedicated exclusively to the use of caves in the Maya Lowlands covering primarily Classic Period archaeology from A.D. 100 through the Spaniards arrival. Although the caves that riddled the lowlands show no signs of habitation, most contain evidence of human use, evidence that suggests that they functioned as ritual spaces. **Exploring the Mesoamerican Subterranean Realm** James E. Brady, Cristina Verdugo, 2025-09-01 Exploring the Mesoamerican Subterranean Realm brings together recent work and interpretations on the use of underground cavities by Mesoamerican's pre-Columbian cultures, demonstrating their invaluable cultural purpose. Case studies from across the region investigate the ways in which these highly charged points in the sacred landscape were the focus of countless political and religious activities. The volume expands the study of caves to focus on the broader realm of subterranean space, introducing the concept of the constructed subterranean, a space in which the Maya deliberately created sacred landmarks through excavation. Chapters critically examine chultuns previously thought to be subterranean storage chambers and sascaberas previously considered mines, demonstrating that the traditional archaeological models are deeply flawed. A wealth of data on both features is used to envision a new sacred landscape filled with thousands of subterranean sacred landmarks. Natural caves are also examined. A survey conducted around the ancient site of Yaxchilan considers the obvious importance of large stalagmites set up in the site core as monuments. Long distance pilgrimages to these caves fundamentally reevaluate the nature of pilgrimage and reveals an economic and political importance that structured settlement and activities around the pilgrimage sites. Finally, evidence is analyzed to show that the human bones recovered from Midnight Terror Cave, Belize, were the result of human sacrifice. Dealing equally with the archaeology of both natural and constructed subterranean spaces, Exploring the Mesoamerican Subterranean Realm challenges preconceived notions of these spaces and their meanings, dramatically shifting the field's focus and extending the understanding of the critical importance of this dark side of archaeology. New Perspectives on Human Sacrifice and Ritual Body Treatments in Ancient Maya Society Vera Tiesler, Andrea Cucina, 2007-02-15 The central goal of this book is to contribute to the timely discussion and understanding of Maya sacrifice and related posthumous body manipulation. Most school children in the US learn about the Maya and their practices based on their cultural and religious beliefs in their Social Studies classes. But a number of new sites have been discovered, giving an interdisciplinary group of researchers a channel to discuss these acts and their meaning. The editors bring together not only archaeologists but anthropologists, forensic anthropologists, art historians, and bioarchaeologists, giving the volume a more complete perspective on these sites and the material culture and biological evidence found there. The field of archaeology is growing to include the physical remains of ritual practice along with the material remains, and this book can be seen as an example of how the study of ancient civilizations can be more comprehensive. Additionally, this is an international volume with

scholars from the area studied which is becoming more and more important in archaeological research This will be of interest to students studying Mayan and Mesoamerican culture as well as those interested in bioarchaeology and human sacrifice

The Bioarchaeology of Space and Place Gabriel D. Wrobel, 2014-04-16 The Bioarchaeology of Space and Place investigates variations in social identity among the ancient Maya by focusing on individuals and small groups identified archaeologically by their inclusion in specific discrete mortuary contexts or by unusual mortuary treatments Utilizing archaeological biological and taphonomic data from these contexts the studies employ a variety of methodological approaches to reconstruct aspects of individuals life course and mortuary pathways Following this specific mortuary behaviors are discussed in relation to their local or regional cultural setting using relevant archaeological ethnohistoric and or ethnographic data in an effort to interpret their meaning within the broader social political and economic contexts in which they were carried out This volume covers a number of topics that are currently being debated in Maya archaeology including identification and discussion of the role and extent of

human sacrifice in Maya culture the use of ancestors for maintaining political power the mortuary use of caves by both elites and non elites ethnic distinctions within urban areas and the extent of movement of people between communities Importantly the papers in this volume attempt to test and move beyond static dichotomic categories that are often employed in mortuary studies in an effort to better understand the complex ways in which the Maya conceptualized and manipulated social identity This type of nuanced case study approach that incorporates historical archaeological and theoretical contextualization is becoming increasingly important in the field of bioarchaeology providing valuable sources of data where small diverse samples impede populational approaches      **The Archaeology of Yucatán: New Directions and Data** Travis W. Stanton,2014-10-10 This volume was conceived to provide a forum for Mexican and foreign scholars to publish new data and interpretations on the archaeology of the northern Maya lowlands specifically the State of Yucatán      *The Archaeology of Caves in Ireland* Marion Dowd,2015-01-31 The Archaeology of Caves in Ireland is a ground breaking and unique study of the enigmatic unseen and dark silent world of caves People have engaged with caves for the duration of human occupation of the island spanning 10 000 years In prehistory subterranean landscapes were associated with the dead and the spirit world with evidence for burials funerary rituals and votive deposition The advent of Christianity saw the adaptation of caves as homes and places of storage yet they also continued to feature in religious practice Medieval mythology and modern folklore indicate that caves were considered places of the supernatural being particularly associated with otherworldly women Through a combination of archaeology mythology and popular religion this book takes the reader on a fascinating journey that sheds new light on a hitherto neglected area of research It encourages us to consider what underground activities might reveal about the lives lived aboveground and leaves us in no doubt as to the cultural significance of caves in the past
