Knibbe, 2020-05-17 *Secular Societies Spiritual Selves* is the first volume to address the gendered intersections of religion spirituality and the secular through an ethnographic approach The book examines how spirituality has emerged as a relatively silent category with which people often signal that they are looking for a way to navigate between the categories of the religious and the secular and considers how this is related to gendered ways of being and relating Using a lived religion approach the contributors analyse the intersections between spirituality religion and secularism in different geographical areas ranging from the Netherlands Portugal and Italy to Canada the United States and Mexico The chapters explore the spiritual experiences of women and their struggle for a more gender equal way of approaching the divine as well as the experience of men and of those who challenge binary sexual identities advocating for a queer spirituality This volume will be of interest to anthropologists and sociologists as well as scholars in other disciplines who seek to understand the role of spirituality in creating the complex gendered dynamics of modern societies      **Stories from Montreal 6** Angelina Leggo, Mona Magalhaes, Valerie Webber, 2011      **Stories from Montreal 5** Maïke Storks, Sebastian Anstis, Siena Anstis, 2010      Objects in Context: Theorizing Material Culture Stephanie Anderson, Cierra Webster, 2013 *Objects in Context Theorizing Material Culture* brings together a group of diverse essays originating from a graduate student conference held at Western University in 2013 entitled *Re Activating Objects Social Theory and Material Culture* With over 100 delegates from across Canada and the United States the conference's vision was to investigate the ways that material culture provides a lens to examine the structures of our socio cultural economic worlds As such this publication provides interdisciplinary approaches to a wide range of fundamental and theoretical questions about social constructions social politics and social ethics The contributing scholars offer critical approaches which activate objects that are under theorized and or reactivate objects with shifting or multiple ideologies Ultimately the papers within this volume address the broad ranging question what can objects tell us about the worlds in which we live      *Stories from Montreal 4* Nirmala Bains, 2008\*      *Stories from Montreal 2* Tammy Saxton, Crystal Leger, Karoline Truchon, 2002\*      **Stories from Montreal 3** Talia Weisz, Rachel James, Isabelle Amy LeGoff, 2007      *The Urban University and the Knowledge Economy* Patrizia Ingallina, 2025-10-03 This book presents international experiences of territorial strategies and urban projects in which universities have played a major role over the past fifteen years through spatial planning and within a multiscalar approach This approach constitutes the book's first originality illustrating the complexity of certain cases such as New York London or the Greater Paris Metropolis by highlighting the significant interconnections between spatial and institutional scales The second innovative aspect lies in the selection of case studies some of which are addressed for the first time in international literature Benguerir in Morocco Bergamo in Italy Grenoble Lille Marseille and Lyon in France and Hanoi in

Vietnam while others are still little known from the perspective of university planning and its political and economic role in major metropolitan areas Greater Paris Metropolis Seoul The third key point explores the opportunity to directly compare well established Western metropolises like New York and London with the evolving Greater Paris Metropolis It also highlights Montreal a city blending Anglo Saxon and French influences while seeking its own unique path Additionally Asia s dynamic role is explored from China s innovative university planning to Hanoi s ambitious projects and Seoul s tension between national policies and metropolitan ambitions All chapters have been designed to raise questions provoke reflections and develop a perspective on the ongoing evolution of territorial strategies that leverage universities and the research conducted within them as a means to drive economic growth and increase productivity These strategies also converge toward an image of the city as a knowledge hub facilitating relationships between universities businesses and city users
