Geography, Religion, Gods, and Saints in the Eastern Mediterranean Erica Ferg, 2020-01-16 Geography Religion Gods and Saints in the Eastern Mediterranean explores the influence of geography on religion and highlights a largely unknown story of religious history in the Eastern Mediterranean In the Levant agricultural communities of Jews Christians and Muslims jointly venerated and largely shared three important saints or holy figures Jewish Elijah Christian St George and Muslim al Khi r These figures share peculiar characteristics such as associations with rain greenness fertility and storms Only in the Eastern Mediterranean are Elijah St George and al Khi r shared between religious communities or characterized by these same agricultural attributes attributes that also were shared by regional religious figures from earlier time periods such as the ancient Near Eastern Storm god Baal Hadad and Levantine Zeus This book tells the story of how that came to be and suggests that the figures share specific characteristics over a very long period of time because these motifs were shaped by the geography of the region Ultimately this book suggests that regional geography has influenced regional religion that Judaism Christianity and Islam are not historically or textually speaking separate religious traditions even if Jews Christians and Muslims are members of distinct religious communities and that shared religious practices between members of these and other local religious communities are not unusual Instead shared practices arose out of a common geographical

environment and an interconnected religious heritage and are a natural historical feature of religion in the Eastern Mediterranean. This volume will be of interest to students of ancient Near Eastern religions: Judaism, Christianity, Islam, sainthood, agricultural communities in the ancient Near East, Middle Eastern religious and cultural history, and the relationships between geography and religion.

The Transformation of American Religion : The Story of a Late-Twentieth-Century Awakening Amanda Porterfield, Professor of Religious Studies, University of Wyoming, 2001-04-05. As recently as a few decades ago, most people would have described America as a predominantly Protestant nation. Today we are home to a colorful mix of religious faiths and practices, from a resurgent Catholic Church and a rapidly growing Islam to all forms of Buddhism and many other non-Christian religions. How did this startling transformation take place? A great many factors contributed to this transformation, writes Amanda Porterfield in this engaging look at religion in contemporary America. Religious activism, disillusionment with American culture stemming from the Vietnam war, the influx of Buddhist ideas, a heightened consciousness of gender, and the vastly broadened awareness of non-Christian religions arising from the growth of religious studies programs all have served to undermine Protestant hegemony in the United States. But the single most important factor, says Porterfield, was the very success of Protestant ways of thinking: emphasis on the individual's relationship with God, tension between spiritual life and religious institutions, egalitarian ideas about spiritual life and belief in the practical benefits of spirituality. Distrust of religious institutions, for instance, helped fuel a religious counterculture; the tendency to define spiritual truth against the dangers or inadequacies of the surrounding culture; and Protestantism's pragmatic view of spirituality played into the tendency to see the main function of religion as therapeutic. For anyone interested in how and why the American religious landscape has been so dramatically altered in the last forty years, *The Transformation of Religion in America* offers a coherent and persuasive analysis.
