The History Of Air Cargo And Airmail From The 18th Century:

History of Air Cargo and Airmail from the 18th Century Camille Allaz, 2005-03 It was first published in French by the Institut du Transport Aerien in 1998 and received very favourable reviews Through the publication of the English language edition this remarkable work is now accessible to many more readers around the world In addition the author has expanded the book with new sections and he has extensively updated it to bring the story of air cargo into the twenty first century concluding with a look into the future The author Camille Allaz served as Senior Vice President Cargo at Air France for 10 years which gave him an insider s close up view of his subject a privilege not enjoyed by many historians There is no aspect of mail or cargo transport by air that has not been thoroughly researched and documented by Allaz from the first brief transport of animals by balloon in France in 1783 to the vast global networks of the integrated express carriers in the 21st century As a true scholar he fits his narrative into the larger framework of political military economic and aviation history This book should stand for years as the definitive work on the history of air cargo and airmail and will be of immense value to the academic community to the air cargo industry the postal services and to the general public **Air Cargo** Joachim G.
