In Defense of Universal Human Rights Rhoda E. Howard-Hassmann, 2018-11-26 Should African and Muslim majority countries be obliged to protect LGBT rights or do such rights violate their cultures Should Western based corporations be held liable if their security guards injure union activists in another part of the world or should such decisions be settled under local or domestic law In this book renowned human rights scholar Rhoda E Howard Hassmann vigorously defends the universality of human rights arguing that the entire range of rights is necessary for all individuals everywhere regardless of sex color ethnicity sexuality religion or social class Howard Hassmann grounds her defense of universality in her conception of human dignity which she maintains must include personal autonomy equality respect recognition and material security Only social democracies she contends can be considered fully rights protective states Taking issue with scholars who argue that human rights are Western quasi imperialist impositions on states in the global South and risk undermining community and social obligation Howard Hassmann explains how human rights support communities and can only be preserved if states and individuals observe their duties to protect them

Lethal Force, the Right to Life and the ECHR Stephen Skinner, 2019-08-22 In its case law on the use of lethal and potentially lethal force the

European Court of Human Rights declares a fundamental connection between the right to life in Article 2 of the European Convention on Human Rights and democratic society This book discusses how that connection can be understood by using narrative theory to explore Article 2 law s specificities and its deeper historical social and political significance Focusing on the domestic policing and law enforcement context the book draws on an extensive analysis of case law from 1995 to 2017 It shows how the connection with democratic society in Article 2 s substantive and procedural dimensions underlines the right to life s problematic duality as an expression of a basic value demanding a high level of protection and a contextually limited provision allowing states leeway in the use of force Emphasising the need to identify clear standards in the interpretation and application of the right to life the book argues that Article 2 law s narrative dimensions bring to light its core purposes and values These are to extract meaning from pain and death ground democratic society s foundational distinction between acceptable force and unacceptable violence and indicate democratic society s essential attributes as a restrained responsible and reflective system

NGOs Thomas Davies,2014-01-11 In the first historical account of international NGOs from the French Revolution to the present Thomas Davies places the contemporary debate on transnational civil society in context In contrast to the conventional wisdom which sees transnational civil society as a recent development taking place along a linear trajectory he explores the long history of international NGOs in terms of a cyclical process characterized by three major waves the era to 1914 the inter war years and the period since the Second World War The breadth of transnational civil society activities explored is unprecedented in its diversity from business associations to humanitarian organizations peace groups to socialist movements feminist organizations to pan nationalist groups The geographical scope covered is also extensive and the analysis is richly supported with reference to a diverse array of previously unexplored sources By revealing the role of civil society rather than governmental actors in the major trans formations of the past two and a half centuries this book is for anyone interested in obtaining a new perspective on world history The analysis concludes in the second decade of the twenty first century providing insights into the trajectory of transnational civil society in the post 9 11 and post financial crisis eras

Labor on the Fringes of Empire Alessandro Stanziani,2018-01-23 After the abolition of slavery in the Indian Ocean and Africa the world of labor remained unequal exploitative and violent straddling a fine line between freedom and unfreedom This book explains why Unseating the Atlantic paradigm of bondage and drawing from a rich array of colonial estate plantation and judicial archives Alessandro Stanziani investigates the evolution of labor relationships on the Indian subcontinent the Indian Ocean and Africa with case studies on Assam the Mascarene Islands and the French Congo He finds surprising relationships between African and Indian abolition movements and European labor practices inviting readers to think in terms of trans oceanic connections rather than simple oppositions Above all he considers how the meaning and practices of freedom in the colonial world differed profoundly from those in the mainland Arguing for a multi centered view of imperial dynamics Labor on the Fringes of Empire is a pioneering global history of nineteenth century labor
