*Why Don't Jumbo Jets Flap Their Wings?* David Alexander, 2009-06-02 What do a bumble bee and a 747 jet have in common It's not a trick question The fact is they have quite a lot in common They both have wings They both fly And they're both ideally suited to it They just do it differently Why Don't Jumbo Jets Flap Their Wings offers a fascinating explanation of how nature and human engineers each arrived at powered flight What emerges is a highly readable account of two very different approaches to solving the same fundamental problems of moving through the air including lift thrust turning and landing The book traces the slow and deliberate evolutionary process of animal flight in birds bats and insects over millions of years and compares it to the directed efforts of human beings to create the aircraft over the course of a single century Among the many questions the book answers Why are wings necessary for flight How do different wings fly differently When did flight evolve in animals What vision knowledge and technology was needed before humans could learn

to fly Why are animals and aircrafts perfectly suited to the kind of flying they do David E Alexander first describes the basic properties of wings before launching into the diverse challenges of flight and the concepts of flight aerodynamics and control to present an integrated view that shows both why birds have historically had little influence on aeronautical engineering and exciting new areas of technology where engineers are successfully borrowing ideas from animals "Science, Technology, and Utopias " Christine Filippone,2017-07-05 The rise of proxy wars the Space Race and cybernetics during the Cold War marked science and technology as vital sites of social and political power Women artists historically excluded from these domains responded critically while simultaneously redeploying the products of Technological Society into works that promoted ideals of progress and alternative concepts of human community In this innovative book author Christine Filippone offers the first focused examination of the conceptual use of science and technology by women artists during and just after the women s movement She argues that artists Alice Aycock Agnes Denes Martha Rosler and Carolee Schneemann used science and technology to mount a critique on Cold War American society as they saw it conservative and constricting Motivated by the contemporary American Women s Movement these artists transformed science and technology into new modes of artmaking that transgressed modernist heroic painterly styles and subverted the traditional economic structures of the gallery the museum and the dealer At the same time the artists also embraced these domains of knowledge and practice as expressions of hope for a better future Many found inspiration in the scientific theory of open systems which investigated problems of wholeness dynamic interaction and organization enabling consideration of the porous boundaries between human bodies and their social political and nonhuman environments Filippone also establishes that the theory of open systems not only informed feminist art but also continued to influence women artists practice of reclamation and ecological art through the twenty first century VCR and Film Catalog ,1986 *To Authorize the President of the United States to Present on Behalf of the Congress Specially Struck Gold Medals to Bryan Lewis Allen and to the A.
