The History Of The Cavalcade Of America:

The History of the Cavalcade of America Martin Grams, 1998-01-01 Historians in Public Ian Tyrrell, 2005-12 From lagging book sales and shrinking job prospects to concerns over the discipline's narrowness myriad factors have been cited by historians as evidence that their profession is in decline in America Ian Tyrrell's *Historians in Public* shows that this perceived threat to history is recurrent exaggerated and often misunderstood In fact history has adapted to and influenced the American public more than people and often historians realize Tyrrell's elegant history of the practice of American history traces debates beginning shortly after the profession's emergence in American academia about history's role in school curricula He also examines the use of historians in and by the government and whether historians should utilize mass media such as film and radio to influence the general public As *Historians in Public* shows the utility of history is a distinctive theme throughout the history of the discipline as is the attempt to be responsive to public issues among pressure groups A superb examination of the practice of American history since the turn of the century *Historians in Public* uncovers the often tangled ways history makers make history both as artisans and as actors *Channeling the Past* Erik Christiansen, 2013-03-15 After the turmoil of the Great Depression and World War II Americans looked to the nation's more distant past for lessons to inform its uncertain future By applying recent and emerging techniques in mass communication including radio and television programs and commercial book clubs American elites working in media commerce and government used history to confer authority on their respective messages With insight and wit Erik Christiansen uncovers in *Channeling the Past* the ways that powerful corporations rewrote history to strengthen the postwar corporate state while progressives communists and other leftists vied to make their own versions of the past more popular Christiansen looks closely at several notable initiatives CBS's flashback *You Are There* program the Smithsonian Museum of American History constructed in the late 1950s the *Cavalcade of America* program sponsored by the Du Pont Company the History Book Club and the Freedom Train a museum on rails that traveled the country from 1947 to 1949 exhibiting historic documents and flags including original copies of the U S Constitution and the Magna Carta It is often said that history is written by the victors but Christiansen offers a more nuanced perspective history is constantly remade to suit the objectives of those with the resources to do it He provides dramatic evidence of sophisticated calculations that influenced both public opinion and historical memory and shows that Americans' relationships with the past changed as a result **Science on the Air** Marcel Chotkowski LaFollette, 2009-08-01 Mr Wizard's World Bill Nye the Science Guy NPR's Science Friday These popular television and radio programs broadcast science into the homes of millions of viewers and listeners But these modern series owe much of their success to the pioneering efforts of early twentieth century science shows like *Adventures in Science* and *Our Friend the Atom* *Science on the Air* is the fascinating history of the evolution of popular science in the first decades of the broadcasting era Marcel Chotkowski LaFollette transports readers to the early days of radio when the new medium

allowed innovative and optimistic scientists the opportunity to broadcast serious and dignified presentations over the airwaves But the exponential growth of listenership in the 1920s from thousands to millions and the networks recognition that each listener represented a potential consumer turned science on the radio into an opportunity to entertain not just educate Science on the Air chronicles the efforts of science popularizers from 1923 until the mid 1950s as they negotiated topic content and tone in order to gain precious time on the air Offering a new perspective on the collision between science s idealistic and elitist view of public communication and the unbending economics of broadcasting LaFollette rewrites the history of the public reception of science in the twentieth century and the role that scientists and their institutions have played in both encouraging and inhibiting popularization By looking at the broadcasting of the past Science on the Air raises issues of concern to all those who seek to cultivate a scientifically literate society today

Cold War Dixie Kari Frederickson,2013-06-01 Focusing on the impact of the Savannah River Plant SRP on the communities it created rejuvenated or displaced this book explores the parallel militarization and modernization of the Cold War era South The SRP a scientific and industrial complex near Aiken South Carolina grew out of a 1950 partnership between the Atomic Energy Commission and the DuPont Corporation and was dedicated to producing materials for the hydrogen bomb Kari Frederickson shows how the needs of the expanding national security state in combination with the corporate culture of DuPont transformed the economy landscape social relations and politics of this corner of the South In 1950 the area comprising the SRP and its surrounding communities was primarily poor uneducated rural and staunchly Democratic by the mid 1960s it boasted the most PhDs per capita in the state and had become increasingly middle class suburban and Republican The SRP s story is notably dramatic however Frederickson argues it is far from unique The influx of new money new workers and new business practices stemming from Cold War era federal initiatives helped drive the emergence of the Sunbelt These factors also shaped local race relations In the case of the SRP DuPont s deeply conservative ethos blunted opportunities for social change but it also helped contain the radical white backlash that was so prominent in places like the Mississippi Delta that received less Cold War investment

Selling Women's History Emily Westkaemper,2017-01-09 Only in recent decades has the American academic profession taken women s history seriously But the very concept of women s history has a much longer past one that s intimately entwined with the development of American advertising and consumer culture *Selling Women s History* reveals how from the 1900s to the 1970s popular culture helped teach Americans about the accomplishments of their foremothers promoting an awareness of women s wide ranging capabilities On one hand Emily Westkaemper examines how this was a marketing ploy as Madison Avenue co opted women s history to sell everything from Betsy Ross Red lipstick to Virginia Slims cigarettes But she also shows how pioneering adwomen and female historians used consumer culture to publicize histories that were ignored elsewhere Their feminist work challenged sexist assumptions about women s subordinate roles Assessing a dazzling array of media including soap operas advertisements films magazines calendars and greeting cards *Selling Women s History* offers a new perspective on how early and mid twentieth century women saw themselves Rather than presuming a drought of female agency between the first and second waves of American feminism it reveals the subtle messages about women s empowerment that flooded the marketplace
