## **The History Of The Telescope:**

The History of the Telescope Henry C. King, 2003-01-01 This remarkable history encompasses not only the achievements of the early inventors and astronomers but also the less frequently recounted stories of the instrument makers and of the actual instruments A model of unsurpassed comprehensive scholarship this volume covers many fields including professional and amateur astronomy 196 black and white illustrations      **The History of the Telescope** Henry C. King, 1979-01-01

**The Telescope** Geoff Andersen, 2007 A history of the telescope includes discussion of such related topics as the dark adapted human eye interferometry adaptive optics and remote sensing      *Reader's Guide to the History of Science* Arne Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn

The Telescope Richard Dunn, 2011-11-01 As an instrument of science and navigation the telescope was at the forefront of discovery Even today it is vital to modern understanding of space and the origins of matter The story of its development is a fascinating narrative of scientific endeavour exploration and ingenuity encompassing the lives of scientists and astronomers such as Galileo Newton William Herschel and Edmund Halley as well as the exploits of naval officers and explorers like Cloudesley Shovell and James Cook Richard Dunn presents an engaging historical survey that traces the telescope from its invention in 1608 to its contemporary applications in astrophysics Profusely illustrated with exquisite examples of telescopes and other prints drawings and artworks The Telescope will appeal to all those with an interest in science discovery and exploration maritime history seafaring or astronomy      *The Oxford Guide to the History of Physics and Astronomy* J. L.

Heilbron, 2005-06-03 The entries follow an elaborate organizational plan which amounts to a new classification of knowledge its institutional settings and its applications This plan is reprinted in the opening pages of the Guide Thoroughly cross referenced and accented with attractive black and white artwork no other source is as systematic and authoritative or as informative and inviting in its coverage of physics astronomy and planetary science BOOK JACKET      The ^AOxford Guide to the History of Physics and Astronomy John L. Heilbron, 2005-06-03 With over 150 alphabetically arranged entries about key scientists concepts discoveries technological innovations and learned institutions the Oxford Guide to Physics and Astronomy traces the history of physics and astronomy from the Renaissance to the present

A Companion to the History of Science Bernard Lightman, 2019-11-12 The Wiley Blackwell Companion to the History of Science is a single volume companion that discusses the history of science as it is done today providing a survey of the debates and issues that dominate current scholarly discussion with contributions from leading international scholars Provides a single volume overview of current scholarship in the history of science edited by one of the leading figures in the field Features forty essays by leading

international scholars providing an overview of the key debates and developments in the history of science Reflects the shift towards deeper historical contextualization within the field Helps communicate and integrate perspectives from the history of science with other areas of historical inquiry Includes discussion of non Western themes which are integrated throughout the chapters Divided into four sections based on key analytic categories that reflect new approaches in the field *The History of the Telescope* H. C. King, 1952

**The History and Preservation of Chemical Instrumentation** John T. Stock, Mary Virginia Orna, 2012-12-06 The development of chemistry like that of the other fields of science and technology has depended greatly upon the availability of instruments Accordingly the study of the history of instrumentation is a major area in any survey of the progress in this science Recognizing this fact the Division of the History of Chemistry of the American Chemical Society organized and held a very successful symposium on the history of chemical instrumentation during the Washington D C National Meeting in 1979 Remarks both formal and informal made during this symposium stressed points that soon become obvious to anyone who looks at the ancestry of present day instruments In some cases the total history is measured in years rather than in centuries Chemical instrumentation by no means confined to the laboratory is vital in industry There is a natural tendency to discard an item of any kind when a newer version is acquired Often to discard means to scrap If the item scrapped is an instrument that is unique sometimes the last of its kind we have a permanent artefactual gap in the history of science

**The Arecibo Observatory: A History of Innovation and Discovery** Donald Campbell, 2025-01-13 Written by its former Director this book presents a historical account of the famous Arecibo Observatory and its 305 meter radio astronomical telescope widely known for its groundbreaking scientific discoveries and starring role in the James Bond movie *Golden Eye* The story details the planning funding and construction of the telescope the people who masterminded and contributed to the project and the involvement of the US Department of Defense in funding the construction It also includes the seminal scientific achievements in the three research areas to which the telescope contributed ionospheric physics planetary science and radio astronomy The book continues through later upgrades made to the site showing how the Arecibo telescope has arguably remained the world's most versatile and productive radio science instrument for over 50 years This historical account will fascinate astronomers and historians of science serving as a valuable contribution to the history of 20th century astronomy

*Eyes on the Universe* Isaac Asimov, 1975

**A History of Optical Telescopes in Astronomy** Wilson Wall, 2018-10-01 This book is uniquely about the relationship between the optical telescope and astronomy as they developed together It covers the time between the telescope's pivotal invention in the 1600s up to the modern era of space based telescopes Over the intervening centuries there were huge improvements in the optical resolution of telescopes along with changes in their positioning and nature of application that forever altered the course of astronomy For a long time the field was an exclusive club for self motivated stargazers who could afford to build their own telescopes Many of these leisure time scholars left their mark by virtue of their meticulous observations and record

keeping Although they would now be considered amateurs these figures and their contributions were pivotal and are covered in this book alongside professionals for the first time giving a complete picture of the history of telescopic science

*Exploring the History of New Zealand Astronomy* Wayne Orchiston, 2015-12-08 Dr Orchiston is a foremost authority on the subject of New Zealand astronomy and here are the collected papers of his fruitful studies in this area including both those published many years ago and new material The papers herein review traditional Maori astronomy examine the appearance of nautical astronomy practiced by Cook and his astronomers on their various stopovers in New Zealand during their three voyages to the South Seas and also explore notable nineteenth century New Zealand observatories historically from significant telescopes now located in New Zealand to local and international observations made during the 1874 and 1882 transits of Venus and the nineteenth and twentieth century preoccupation of New Zealand amateur astronomers with comets and meteors New Zealand astronomy has a truly rich history extending from the Maori civilization in pre European times through to the years when explorers and navigators discovered the region up to pioneering research on the newly emerging field of radio astronomy during WWII and in the immediate post war years A complete survey of a neglected but rich national astronomical history this does the subject full and comprehensive justice **The History of Astronomy**

Richard Pearson, **The History of Cartography, Volume 4** Matthew H. Edney, Mary Sponberg Pedley, 2020-05-15 Since its launch in 1987 the History of Cartography series has garnered critical acclaim and sparked a new generation of interdisciplinary scholarship Cartography in the European Enlightenment the highly anticipated fourth volume offers a comprehensive overview of the cartographic practices of Europeans Russians and the Ottomans both at home and in overseas territories from 1650 to 1800 The social and intellectual changes that swept Enlightenment Europe also transformed many of its mapmaking practices A new emphasis on geometric principles gave rise to improved tools for measuring and mapping the world even as large scale cartographic projects became possible under the aegis of powerful states Yet older mapping practices persisted Enlightenment cartography encompassed a wide variety of processes for making circulating and using maps of different types The volume's more than four hundred encyclopedic articles explore the era's mapping covering topics both detailed such as geodetic surveying thematic mapping and map collecting and broad such as women and cartography cartography and the economy and the art and design of maps Copious bibliographical references and nearly one thousand full color illustrations complement the detailed entries **History of the Telescope** Henry

Charles King, 1959 [The History of Astronomy](#) Anne Rooney, 2017-12-15 This volume traces humanity's exploration of the heavens from Neolithic times to NASA Moving beyond early superstitions and cosmology scientific study began by first making calendars and predicting astronomical events The invention of the telescope around 1600 marked a watershed in the field of astronomy Since the first recognition that the planets are other worlds the wonders of space have puzzled and enthralled us With a wealth of full color and archival images and a compelling narrative style this text charts our fascination

with stars from before Stonehenge to the search for exoplanets and extraterrestrial life      **Elements of the History of Philosophy and Science** Thomas Morell, 1827      *The History of Modern Cataract Surgery* Marvin L. Kwitko, Charles D. Kelman, 1998 Surely the threat of blindness from whatever cause is an event faced by an ever growing segment of our aging population However when the cause was cataract formation over the centuries a definite treatment evolved and became available to help those afflicted with this problem from couching through crude extra capsular Graeffe knife extraction intra capsular cataract surgery and planned extra capsular surgery to phacoemulsification ultrasound or laser Doctors therefore recognized very early that there was one blinding condition which could be treated and in which vision could be i
