Shifting Cultures Henriette Bugge, Joan Pau Rubiés, 1995 Cultures shift by absorbing outside influences and dealing creatively with them In the age of European expansion the Europeans gradually changed their view of the world Missionaries propagated their religion and had to learn how to approach those whom they wanted to convert Non Europeans adapted European ideas and used them in their own social context like the Mexican Indian nobleman who re wrote Calderon's plays in Nahuatl or the Brazilians who created a new popular culture This volume contains many interesting contributions of this kind and highlights cultural history which has often been eclipsed by political and economic history **The**

International History of Communication Study Peter Simonson, David W. Park, 2015-10-14 The International History of Communication Study maps the growth of media and communication studies around the world Drawing out transnational flows of ideas institutions publications and people it offers the most comprehensive picture to date of the global history of communication research and education This volume reaches into national and regional areas that have not received much attention in the scholarship until now including Asia Latin America Africa and the Middle East alongside Europe and North America It also covers communication study outside of academic settings in international organizations like UNESCO and among commercial and civic groups It moves beyond the traditional canon to cover work by forgotten figures including women scholars in the field and those outside of the United States and Europe and it situates them all within the broader geopolitical institutional and intellectual landscapes that have shaped communication study globally Intended for scholars and graduate students in communication media studies and journalism this volume pushes the history of communication study in new directions by taking an aggressively international and comparative perspective on the historiography of the field Methodologically and conceptually the volume breaks new ground in bringing comparative transnational and global frames to bear and puts under the spotlight what has heretofore only lingered in the penumbra of the history of communication study *Mission and Tamil Society* Henriette Bugge, 2020-07-24 Looks to provide an analysis of religion as a dynamic factor in Indian society Not only is the ritual economic and power status of the missionaries examined but also such effects on their converts as social status and mobility

Indigenizing the Cold War Sinae Hyun, 2023 The Border Patrol Police BPP of Thailand was formed as a United States CIA's paramilitary intelligence force in the early 1950s In the early 1960s changes in Thailand's political leadership and the US government's strategies for fighting the spread of communism in Southeast Asia led to a transformation of the BPP The organization became a civic action agency supported by the US Agency for International Development and the Thai monarchy Its civic actions pinned on advancing anticommunist modernization civilian counterinsurgency and royalist nationalism soon extended from the margins to the center of Thailand and contributed to building the border of Thainess khwam pen thai The growing tension between the royalist network consisting of military and rightwing groups and the democratization movements culminated in a massacre On October 6 1976 the Village Scout a rural vigilante group that the BPP created through its civic actions and the Police Aerial Reinforcement Unit PARU a subunit of the BPP attacked peaceful protesters at Thammasat University The success of a military coup on the same day solidified the victory of the royalist network and it would continue to dominate Thai politics and society into the post Cold War era Through a study of the Border Patrol Police's transformations Indigenizing the Cold War shows how the Thai ruling elite unfailingly pursued their nation building With an introduction of the indigenization concept and an in depth analysis of postcolonial nation building this work challenges conventional Cold War studies The Cold

War in Thailand was not always and only about an ideological conflict between the communist and anticommunist. It was a war between the local ruling elite and the people each pushing forward their visions for constructing a new nation state. The indigenization framework helps one to see the nature and impacts of the collaboration between global superpowers and the Asian local ruling elite; it exposes an arrangement that took advantage of the American Cold War to legitimize and continue their authoritarian regimes. Current Swedish Research on Latin America, 1988. *The Digital Challenge* Shirin Madon, S. Krishna, 2018-02-06. This title was first published in 2003. Information and communication technologies (ICTs) are increasingly being recognized as vital to the economic growth and global inclusion and participation of developing countries. This book brings together both academics and practitioners to provide a comprehensive and insightful overview of ICT and development around the world. It examines the role of IT in providing new economic and industrial opportunities in increasing access to global information and communication in assisting small cultural and ethnic groups to overcome disadvantages of physical distance and in catalysing initiatives towards democratic decentralization and empowerment of citizens. It also critically appraises major problems such as inappropriate focus and resource allocation and of missed opportunities. By combining comparative case studies from Africa, South and East Asia, South America and Eastern Europe with theoretical analysis, this volume synthesizes a range of issues related to the evident tensions that exist for developing countries as they try to balance global and local priorities through the adoption and use of ICTs. *The First Sourcebook on Nordic Research in Mathematics Education* Bharath Sriraman, Simon Goodchild, Christer Bergsten, Gudbjorg Palsdottir, Lenni Haapasalo, Bettina Dahl Søndergaard, 2010-09-01. The First Sourcebook on Nordic Research in Mathematics Education. Norway, Sweden, Iceland, Denmark and contributions from Finland provides the first comprehensive and unified treatment of historical and contemporary research trends in mathematics education in the Nordic world. The book is organized in sections coordinated by active researchers in mathematics education in Norway, Sweden, Iceland, Denmark and Finland. The purpose of this sourcebook is to synthesize and survey the established body of research in these countries with findings that have influenced ongoing research agendas, informed practice, framed curricula and policy. The sections for each country also include historical articles in addition to exemplary examples of recently conducted research oriented towards the future. The book will serve as a standard reference for mathematics education researchers, policy makers, practitioners and students both in and outside the Nordic countries. **University of Michigan Official Publication** University of Michigan, 1993.
