Promethean Ambitions William R. Newman, 2005-10-01 In an age when the nature of reality is complicated daily by advances in bioengineering cloning and artificial intelligence it is easy to forget that the ever evolving boundary between nature and technology has long been a source of ethical and scientific concern modern anxieties about the possibility of artificial life and the dangers of tinkering with nature more generally were shared by opponents of alchemy long before genetic science delivered us a cloned sheep named Dolly In *Promethean Ambitions* William R Newman ambitiously uses alchemy to investigate the thinning boundary between the natural and the artificial Focusing primarily on the period between 1200 and 1700 Newman examines the labors of pioneering alchemists and the impassioned and often negative responses to their efforts By the thirteenth century Newman argues alchemy had become a benchmark for determining the abilities of both men and demons representing the epitome of creative power in the natural world Newman frames the art nature debate by contrasting the supposed transmutational power of alchemy with the merely representational abilities of the pictorial and plastic arts a dispute which found artists such as Leonardo da Vinci and Bernard Palissy attacking alchemy as an irreligious fraud The later assertion by the Paracelsian school that one could make an artificial human being the homunculus led to further disparagement of alchemy but as Newman shows the immense power over nature promised by the field contributed directly to the technological apologetics of Francis Bacon and his followers By the mid seventeenth century the famous father of modern chemistry Robert Boyle was employing the arguments of medieval alchemists to support the identity of naturally occurring substances with those manufactured by chymical means In using history to highlight the art nature debate Newman here shows that alchemy was not an unformed and capricious precursor to chemistry it was an art founded on coherent philosophical and empirical principles with vocal supporters and even louder critics that attracted individuals of first rate intellect The historical relationship that Newman charts between human creation and nature has innumerable implications today and he ably links contemporary issues to alchemical debates on the natural versus the artificial

The Heredity Hoax Richard M. Lerner, Gary Greenberg, 2025-01-30 This innovative and thought provoking book integrates both new authored material and reprints of existing literature that together provide a compelling narrative that reveals the fatally flawed science associated with genetic reductionist accounts of human behavior and development Through an interdisciplinary lens it illuminates the dynamic nature of human development empowering readers to question established notions and embrace the complexity of our potential Across the book the work of top tier scientists from developmental comparative educational and biological science illuminates theory and research converging on

the conclusion that the multiple egregiously flawed work of genetic reductionists should be expunged from research pertinent to human development The book challenges the prevailing reductionist narratives and their application to social policies programs and uses in media Theoretically based and empirically rigorous this multidisciplinary approach to human development will shine a light on the inequities in individuals or groups that suggest that specific genes do not enable them to succeed in life The Heredity Hoax invites graduate programs and advanced undergraduate courses on human development human potential epigenetics and more to delve into the intricate interplay between genes environment and personal growth This will also serve as an unimpeachable source of evidence for researchers educators and social policymakers **The Body**

Within Renée van de Vall, Robert Zwijnenberg, 2009 The central question of this interdisciplinary volume is whether present day medical visualisation techniques like ultrasound endoscopy CT MRI and PET scans mark a significant shift in the historical and cultural construction and experience of bodily interiority **Eta Carinae and the Supernova Impostors**

Kris Davidson, Roberta M. Humphreys, 2012-03-15 In 1965 Fritz Zwicky proposed a class of supernovae that he called Type V described as excessively faint at maximum There were only two members SN1961v and Eta Carinae We now know that Eta Carinae was not a true supernova but if it were observed today in a distant galaxy we would call it a supernova impostor 170 years ago it experienced a great eruption lasting 20 years expelling 10 solar masses or more and survived Eta Carinae is now acknowledged as the most massive most luminous star in our region of the Galaxy and it may be our only example of a very massive star in a pre supernova state In this book the editors and contributing authors review its remarkable history physical state of the star and its ejecta and its continuing instability Chapters also include its relation to other massive unstable stars the massive star progenitors of supernovae and the first stars in the Universe **Anna Zieglerin and the Lion's Blood**

Tara Nummedal, 2019-04-19 In 1573 the alchemist Anna Zieglerin gave her patron the Duke of Braunschweig Wolfenbittel the recipe for an extraordinary substance she called the lion's blood She claimed that this golden oil could stimulate the growth of plants create gemstones transform lead into the coveted philosophers stone and would serve a critical role in preparing for the Last Days Boldly envisioning herself as a Protestant Virgin Mary Anna proposed that the lion's blood paired with her own body could even generate life repopulating and redeeming the corrupt world in its final moments In Anna Zieglerin and the Lion's Blood Tara Nummedal reconstructs the extraordinary career and historical afterlife of alchemist courtier and prophet Anna Zieglerin She situates Anna's story within the wider frameworks of Reformation Germany's religious political and military battles the rising influence of alchemy the role of apocalyptic eschatology and the position of women within these contexts Together with her husband the jester Heinrich Schombach and their companion and fellow alchemist Philipp Sommering Anna promised her patrons at the court of Wolfenbittel spiritual salvation and material profit But her compelling vision brought with it another darker possibility rather than granting her patrons wealth or redemption Anna's alchemical gifts might instead lead to war disgrace and destruction By 1575 three years after Anna's arrival at court

her enemies had succeeded in turning her from holy alchemist into poisoner and sorceress culminating in Anna's arrest torture and public execution In her own life Anna was a master of self fashioning in the centuries since her death her story has been continually refashioned making her a fitting emblem for each new age Interweaving the history of science gender religion and politics Nummedal recounts how one resourceful woman's alchemical schemes touched some of the most consequential matters in Reformation Germany
