The Rights of Victims in Criminal Justice Proceedings for Serious Human Rights Violations Juan Carlos Ochoa S., 2013-02-05 The Rights of Victims in Criminal Justice Proceedings for Serious Human Rights Violations addresses a question of critical importance to policy makers international lawyers academics and affected societies throughout the world Should victims of

serious human rights violations be granted under international law the rights of access to and participation in criminal proceedings before international hybrid and domestic tribunals Juan Carlos Ochoa applies a thorough analysis of international and comparative domestic law and practice to this question taking into account a host of international human rights instruments and case law the theory law and practice of international and hybrid criminal tribunals the law and practice in several domestic jurisdictions and many theoretical and empirical studies After first determining the current state of and emerging trends in international law in this area he argues that the lack of recognition of these rights under customary international law is inadequate because access to and participation in criminal proceedings for victims of these infringements are based on several internationally recognised human rights and principles contribute to the expressivist objectives of these procedures and are consistent with the principles that inform the enforcement of criminal law in democratic States On this basis Ochoa convincingly suggests concrete reforms

argument is that because of their Jewish heritage Jewish scholars inherited the endorsement of earthly particularism for the sake of universalism and the other way around for the sake of universalism humanity's differences need to be solved through the law

Managing Babel: The International Legal

Protection of Minorities in the Twentieth Century Li-Ann Thio, 2005-01-01 Minority protection is integral to a civilised standard of internal good governance The goal of promoting friendly inter group relations within states highlights the linkages between constitutionalism and the extending reach of international law in shaping domestic governance and structuring relations between the state non state communities and individuals While law per se cannot guarantee the security and integrity of minority groups law and legal institutions play a role in promoting a tolerant and pluralistic environment and a multicultural ethos that appreciates rather than resents ethno cultural diversity This book is a comprehensive modern study of the important field of international protection of minority rights focusing on 20th century developments Minority rights regimes which address the issue of group identity and autonomy have essentially been a stabilising force buttressing state survivability in the face of claims to self determination or secession These serve to promote the peaceful co existence of distinct ethno cultural groups captured by the metaphor of Babel within existing states Despite overlaps the content of minority protection is more modest than the claim of indigenous groups for collective rights or peoples rights to self determination As part of the contemporary corpus of human rights norms minority protection may be

appreciated as an aspect of the evolving content of the internal dimension of the right to self determination Chapter 1 introduces some key definitional and conceptual problems in the field of minority protection and presents a brief historical review of international approaches up to 1919 Chapter 2 discusses the League of Nations era Chapter 3 examines approaches towards minority protection after World War Two as reflected in the drafting of the United Nations Charter and efforts to protect minorities outside the UN regime In this period discussed in Chapters 4 and 5 minorities issues remained largely submerged within the UN project of promoting universal individual human rights Chapter 6 addresses the post 1989 revival in minorities issues within the UN Chapter 7 offers a succinct overview of what might be considered a parallel history with respect to the development of regional human rights schemes and what these afford to minority protection closing with concluding observations Meticulously researched this volume offers a valuable synthesis of this important but often heart breaking field

Nationalism and Intra-State Conflicts in the Postcolonial World Fonkem Achankeng, 2015-09-28 This book highlights the complexities of nationalism and the struggles of different groups left unaddressed within the nation states of a postcolonial world The central question is what happened to the worldly and radical visions of freedom liberty and equality that animated intellectual activists and policy makers from Woodrow Wilson in the 1920s This book analyzes the outcome of lumping disparate groups of people together under one nation state and holding them together against the knowledge of the incompatibility theory of plural states In a world of arbitrarily and colonially mapped sovereign states groups and nations with distinctive histories and cultures trapped within the borders of sovereign states want the freedom to decide their own destinies This book challenges deconstructs and decolonizes Western epistemologies related to postcolonial state formation and maintenance In examining the freedom concept that no human group ought to be determining the independence of other human groups this book constructs an alternative conceptualization of nations and peoples rights in the twenty first century in which radical hopes and global dreams are recognized as central to internal nationalism struggles
