Lee, 2010-02-12 A study of human reproduction and social organization in preindustrial communities that reveals important similarities between Europe and Asia This pioneering study reconceptualizes the impact of social organizations economic conditions and human agency on human reproduction in preindustrial communities in Europe and Asia Unlike previous studies in which Asia is measured by European standards Prudence and Pressure develops a Eurasian perspective Drawing on rich new data and the tools of event history analysis the authors challenge the accepted Eurocentric Malthusian view that attributes prudence smaller families due to late marriage to the preindustrial West and pressure high mortality due to overpopulation to the East showing instead important similarities between Europe and Asia in human motivation and population behavior The authors analyze age gender family and household kinship social class and power religion culture and economic resources in order to compare reproductive strategies and outcomes They reveal underlying similarities between East and West in two major components of the reproductive regime marriage and childbearing and offer evidence showing that preindustrial reproduction was motivated and governed by human agency at least as much as by human biology Prudence and Pressure is part of a large scale interdisciplinary effort to use new data and methods to re examine the Malthusian paradigm of population growth It represents a significant advance in the fields of historical demography history and sociology **The Japanese Family System** Akihiko Kato, 2021-08-13 This book offers a new perspective and empirical evidence that are relevant for understanding changes in family structures intergenerational relationships and female labor force participation in the strong family societies and that also shed light on those in the weak family societies Focusing on the stem family and the gender division of labor presenting detailed quantitative evidence and testing the theories on family change and gender revolution the book provides a comprehensive examination of change continuity and regionality in the Japanese family system over the twentieth century By analyzing data from a nationally representative life course survey with event history techniques it investigates factors affecting post marital intergenerational co residence and proximate residence along with those influencing continuous and or discontinuous employment of married women across the life course In this way it reveals the mechanisms underlying the stem family formation and those behind married women s M shaped employment pattern It further explores regionality in the Japanese family system applying a demographic mapping method to data from a nationally representative community survey and official statistics The mapping analyses demonstrate persistent geographical contrasts between two types of living arrangements single household versus multi household in the stem family accompanied by two types of maternal employment full time versus part time They also reveal a historical correlation between traditional communal parenting systems and modern childcare services linking past to present from the late nineteenth to the early twenty first century **Epidemics and Mortality in Early Modern Japan** Ann Bowman Jannetta, 2014-07-14 Ann Jannetta suggests that Japan s geography and isolation from major world trade routes provided a cordon sanitaire that prevented the

worst diseases of the early modern world from penetrating the country before the mid nineteenth century Her argument is based on the medical literature on epidemic diseases on previously unknown evidence in Buddhist temple registers and on rich documentary evidence from contemporary observers in Japan Originally published in 1987 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Early Japanese Trade, Administration and Interactions with the West Louis Cullen, 2025-10-01 Throughout his academic career Louis Cullen's main research interest has been foreign trade originally that of England Ireland and France but from the mid 1990s his focus turned to Japanese history resulting in his critically acclaimed A history of Japan 1582 1941 Internal and External Worlds Subsequently he concentrated on the analysis of archival sources and of the problems they pose for the interpretation of Japanese history papers on some of these themes and their associated statistical dimensions have appeared in Nichibunken's Japan Review and are republished here together with a collection of other papers including interpreting Tokugawa history and the knowledge and the use of Japanese by the Dutch on Dejima island

[Japanizing Japanese Families](#), 2023-03-20 This book draws on historical demography to elucidate the regional diversity of the Japanese family and its convergence toward an integrated national family model that heralded the modern era providing a new image of the family in pre industrial Japan The volume challenges the idea of early modern 1600 1870 Japan as a monolithic nation based on the ie the stem family household so often mentioned as the fundamental form of Japanese social organization and enshrined in the Meiji Civil Code which in fact came into being at various locales at various speeds in the latter half of the

18th and the earlier half of the 19th centuries In addition there are several chapters which examine the role of women either centrally or tangentially With contributions by Mary Louise NAGATA YAMAMOTO Jun Hiroko COSTANTINI Stephen ROBERTSON MIZOGUCHI Tsunetoshi NAKAJIMA Mitsuhiro TSUBOUCHI Yoshihiro and MORIMOTO Kazuhiko Strange Parallels: Volume 2, Mainland Mirrors: Europe, Japan, China, South Asia, and the Islands Victor Lieberman, 2009-10-30

Blending fine grained case studies with overarching theory this book seeks both to integrate Southeast Asia into world history and to rethink much of Eurasia's premodern past It argues that Southeast Asia Europe Japan China and South Asia all embodied idiosyncratic versions of a Eurasian wide pattern whereby local isolates cohered to form ever larger more stable more complex political and cultural systems With accelerating force climatic commercial and military stimuli joined to produce patterns of linear cum cyclic construction that became remarkably synchronized even between regions that had no contact with one another Yet this study also distinguishes between two zones of integration one where indigenous groups remained in control and a second where agency gravitated to external conquest elites Here then is a fundamentally original view of Eurasia during a 1 000 year period that speaks to both historians of individual regions and those interested in global trends

Pre-industrial Korea and Japan in Environmental Perspective Conrad Totman, 2003-12-01 Quoting from a reader's report this is an original and compelling synthesis of the environmental history of Korea and Japan Taking the history of Japan and Korea and their environmental interactions from late Pleistocene down to about 1870 AD the author makes a convincing case for viewing the two countries together as a history particularly when looking at their pre industrial experiences Drawing from a rare combination of knowledge of both countries Conrad Totman reveals the extent of shared timing substance and dynamics in the political social and economic development of the two countries and in their relationship to the ecosystem With extensive bibliography chronology glossary maps and graphs A real must

The Stem Family in Eurasian Perspective Antoinette Fauve-Chamoux, Emiko Ochiai, 2009 Is the Asian stem family different from its European counterpart This question is a central issue in this collection of essays assembled by two historians of the family in Eurasian perspective The stem family is characterized by the residential rule that only one married child remains with the parents This rule has a direct effect upon household structure In short the stem family is a domestic unit of production and reproduction that persists over generations handing down the patrimony through non egalitarian inheritance In spite of its ambiguous status in current family typology as something lurking in the valley between the nuclear family and the joint family the stem family was an important family form in pre industrial Western Europe and has been a focus of the European family history since Fr d ric Le Play and more recently Peter Laslett However the encounter with Asian family history has revealed that many areas in Asia also had and still have a considerable proportion of households with a stem family structure The stem family debate has entered a new stage In this book some studies that benefited from recently created large databases present micro level analyses of dynamic aspects of family systems while others discuss more broadly the rise and

fall of family systems past and present A main concern of this book is whether the family type in a society is ethno culturally determined and resistant to changes or created by socio economic conditions Such a comparison that includes Asian countries activates a new phase of the discussion on the stem family and family systems in a global perspective **The Bioarchaeology of Urbanization** Tracy K. Betsinger, Sharon N. DeWitte, 2020-11-05 Urbanization has long been a focus of bioarchaeological research but what is missing from the literature is an exploration of the geographic and temporal range of human biological demographic and sociocultural responses to this major shift in settlement pattern Urbanization is characterized by increased population size and density and is frequently assumed to produce negative biological effects However the relationship between urbanization and human health requires careful examination given the heterogeneity that exists within and between urban contexts Studies of contemporary urbanization have found both positive and negative outcomes which likely have parallels in past human societies This volume is unique as there is no current bioarchaeological book addressing urbanization despite various studies of urbanization having been conducted Collectively this volume provides a more holistic understanding of the relationships between urbanization and various aspects of human population health The insight gained from this volume will provide not only a better understanding of urbanization in our past but it will also have potential implications for those studying urbanization in contemporary communities
