Coombs III, Sixth U S president John Quincy Adams a man who knew a lot about effective leadership maintained that the most successful people were those whose actions inspired others to dream more learn more do more and become more These

people were the ones who left the sidelines entered the fray and threw themselves into life They were the ones who forged a nation and achieved the impossible They were the ones who truly connected to life to others and to themselves Today the world needs human connection more than ever It needs people who strive for deeper relationships not just surface recognition who come at life with the enthusiasm energy and excitement that bind people together These people have a powerful impact on all around them Leadership guru Art Coombs combines fresh perspectives profound experience engaging information and unforgettable stories into a simple formula that will result in rich connections as you live laugh learn love and lead those who mean the most to you Begin today to live the authentic abundant life you were meant to as you build and shape the connections that change everything [The Human Connection](#) Virginia Mackenzie,1983-01-01 *Hidden Depths* Penny Spikins,2022-08-23 n Hidden Depths Professor Penny Spikins explores how our emotional connections have shaped human ancestry Focusing on three key transitions in human origins Professor Spikins explains how the emotional capacities of our early ancestors evolved in response to ecological changes much like similar changes in other social mammals For each transition dedicated chapters examine evolutionary pressures responses in changes in human emotional capacities and the archaeological evidence for human social behaviours Starting from our earliest origins in Part One Professor Spikins explores how after two million years ago movement of human ancestors into a new ecological niche drove new types of collaboration including care for vulnerable members of the group Emotional adaptations lead to cognitive changes as new connections based on compassion generosity trust and inclusion also changed our relationship to material things Part Two explores a later key transition in human emotional capacities occurring after 300 000 years ago At this time changes in social tolerance allowed ancestors of our own species to further reach out beyond their local group and care about distant allies making human communities resilient to environmental changes An increasingly close relationship to animals and even to cherished possessions appeared at this time and can be explained through new human vulnerabilities and ways of seeking comfort and belonging Lastly Part Three focuses on the contrasts in emotional dispositions arising between ourselves and our close cousins the Neanderthals Neanderthals are revealed as equally caring yet emotionally different humans who might if things had been different have been in our place today This new narrative breaks away from traditional views of human evolution as exceptional or as a linear progression towards a more perfect form Instead our evolutionary history is situated within similar processes occurring in other mammals and explained as one in which emotions rather than intellect were key to our evolutionary journey Moreover changes in emotional capacities and dispositions are seen as part of differing pathways each bringing strengths weaknesses and compromises These hidden depths provide an explanation for many of the emotional sensitivities and vulnerabilities which continue to influence our world today *Human Connection* Arthur F. Coombs III,2017-09-19 Leadership guru Art Coombs combines fresh perspectives profound experience engaging information and unforgettable stories into a simple formula that will result in rich connections as you live laugh learn love and lead those who
