Over 3000 Questions on Laws of the Human Body, Or Physiology John Peter Schmitz,1899 **The history of emotions** Rob Boddice,2017-12-28 This book introduces students and professional historians to the main areas of concern in the history of emotions It discusses how the emotions intersect with other lines of historical research relating to power practice society and morality Addressing criticism from within and without the discipline of history the book offers a rigorous defence of this new approach demonstrating its potential centrality to historiographical practice as well as the importance of this kind of historical work for our general understanding of the human brain and the meaning of human experience **Why Children Don't Listen** Monika Kiel-Hinrichsen,2014-03-31 What can you do when a child just won't listen How we speak to each other is at the very heart of human relationships Children are often much better than adults at reading between the lines and deciphering the messages we send through body language and tone of voice This is an invaluable handbook for parents and teachers on how to communicate better with children It covers all aspects of talking to and importantly listening to children including communication with children of different ages and understanding the wider situation in which the conversation is taking place The author translates the theory into practical everyday solutions There are useful exercises throughout to help us communicate more successfully Economic-Philosophic Manuscripts Karl Marx,2024-05-09 Written during a formative period in Paris in 1844 the Economic Philosophic Manuscripts also known as Paris Manuscripts or Manuscripts of 1844 were left unpublished during Marx's lifetime and only became accessible in the 1930s after being discovered among his papers These pages unfinished and repetitive capture a moment of theoretical transition as Marx grapples with the works of Feuerbach Hegel and classical political economy in an effort to synthesize materialist anthropology with a critique of alienated labor Despite their fragmented state they mark one of the first systematic efforts to conceptualize estrangement within capitalist production where man becomes estranged not only from the product of his labor but from his species being and from other men Composed between April and August of that year these manuscripts sketch a humanist critique of private property money and political economy through the lens of speculative philosophy and are saturated with allusions to Hegel's Phenomenology of Spirit Adam Smith's economic theory and Feuerbach's human centered theology Although never completed they articulate early formulations of alienation need labor and species life that would reappear in transmuted forms in his later economic works The third manuscript includes a prefatory section that

retroactively serves as a key to the other two offering a theoretical justification for the method and categories being deployed Their disordered form belies the underlying coherence of an author attempting to locate the conditions under which man could be restored to himself through the transformation of the economic base This modern Critical Reader's Edition includes an illuminating afterword tracing Marx's intellectual relationships with revolutionary thinkers and philosophers including Hegel Feuerbach Engels and Ricardo containing unique research into his ideological development and economic metaphysical theories a comprehensive timeline of his life and works a glossary of Marxist terminology and a detailed index of all of Marx's writings This professional translation renders Marx's dense dialectical prose into modern language to preserve the original force and precision of the text Combined with the scholarly amplifying material this edition is an indispensable exploration of Marx's classic works and his enduring Hegelian Protestant influence in the political religious economic and philosophical spheres

The Whole Person Roberta Vienneau, 2023-07-19 In a world where many are disillusioned with the highly drug dependent medical establishment integrative medicine is gaining popularity because of its more holistic approach Holism by definition implies greater than the sum of its parts and is a response to reductionism especially biological reductionism in medicine The holistic model widely accepted in integrative healthcare today is a biopsychosocial model that aims to treat the whole person It is a systems hierarchy model that includes the universe to a cell particle so one's understanding of holism will be reflected in what one considers relevant To a pulmonologist holism might mean the whole respiratory system to a geneticist holism might mean the whole family history but who is treating the whole person This groundbreaking book sheds light on the limitations of integrative healthcare in

exploring the full potential of homeopathy in treating the whole person It argues that we don't need a new approach definition or understanding of holism We sometimes just need to step out of the systems hierarchy model of the reductionist paradigm itself to get a larger view and redefine the boundaries of what constitutes the wholeness of a person With a clear and engaging writing style the book takes readers on a journey through the history and evolution of the concept of whole and presents a compelling case for the adoption of an anthroposophic paradigm as a more comprehensive and effective approach to holism healing and homeopathy Whether you are a homeopath a healthcare practitioner a patient or simply interested in holistic medicine this is a must read book that will challenge your assumptions and expand your understanding of what it means to treat the whole person
