Situating Sound And Rhythm:

Situating the Subject in Film Theory Veijo Hietala,1990 **Situating the Subject in Film Theory** ,1990

Situating Mallarmé David P. Kinloch,Gordon Millan,2000 Since his death just over a century ago Stéphane Mallarmé has become a major figure in world literature Over this period Mallarmé criticism has tended to concentrate on two aspects of his work Firstly on textual analysis in order to tackle the difficulty of his writing and secondly thanks to the interest shown in him by figures such as Barthes Derrida Kristeva and Lacan on his theoretical writings Indeed this particular part of his oeuvre has somewhat dominated Mallarmé studies in the last thirty years This book adopts a new approach by attempting to contextualise Mallarmé's creative writing in terms of his relationships with other art forms other writers and indeed other cultures At the same time one of his own key obsessions with death is also reassessed as is his relationship to the society of his time Mallarmé's ambitious project was to exploit the potential of dance music and painting as well as poetry in order to produce an artistic monument for the modern post industrial age Experts from all of these fields have therefore combined with literary specialists in order to adopt an interdisciplinary and comparative approach to Mallarmé's work which marks a bold and exciting new departure in Mallarmé studies

Sound Worlds from the Body to the City Ariane Wilson,2019-03-13 This volume reveals the extent to which aural perception influences our spatial awareness Spanning various fields and practices from psychology to geography and from zoology to urban planning it covers a range of

environments in which sounds contribute to forming our sense of space and place The contributions gathered here lead from the mother's womb through the habitats of insects and owls to the resonating bodies of buildings and the city to artistic endeavours that aim to consciously reveal the spatiality of sound In this progression the book demonstrates the profoundly constitutive role of hearing and listening at all stages of our biological and social development as well as the epistemological phenomenological and emotional importance of sound in relation to our construction of space As such it will appeal not only to architects town planners and artists but also to the growing community of scientists and scholars intrigued by sonic issues Differing from both quantitative acoustics and sound design its approach opens new perspectives on the sonic dimension and aural understanding of our environment by tracing analogies between a diversity of spaces formed when sound interacts with listening as a mode of attention

Sonic Interventions Sylvia Mieszkowski, Joy Smith, Marijke de Valck, 2015-07-14 *Sonic Interventions* makes a compelling case for the importance of sound in theorizing literature subjectivity and culture Sound is usually understood as our second sense and as our belief in a visually dominated culture prevails remains of secondary interest Western cultures are considered to be predominantly visual while other societies are thought to place more importance on the acoustic dimension This volume questions these assumptions by examining how sound differs from and acts in relationship to the visual It moves beyond theoretical dichotomies between the visual and the sonic the oral and literature and instead investigates sonic interventions in their often multi faceted forms The case studies deal with political appropriations of music and sounds they explore the poetic use of the sonic in novels and plays they develop theoretical concepts out of sonic phenomena and pertain to identity formation and the practice of mixing in hip hop opera and dancehall sessions Ultimately the book brings to the fore what roles sound may play for the formation of gendered identity for the stabilization or questioning of race as a social category and the conception of place Their intricate interventions beckon critical attention and offer rich material for cultural analysis
