Efficiency Hector Fix-Fierro, 2004-01-06 This study explores the socio legal context of economic rationality in the legal and judicial systems It examines the meaning and relevance of the concept of efficiency for the operation of courts and court systems seeking to answer questions such as in what sense can we say that the adjudicative process works efficiently What are the relevant criteria for the measurement and assessment of court efficiency Should the courts try to operate efficiently and to what extent is this viable What is the proper relationship between efficiency and justice considerations in a judicial proceeding To answer these questions a conceptual framework is developed on the basis of empirical studies and surveys carried out mainly in the United States Western Europe and Latin America Two basic ideas emerge from it First economic rationality has penetrated the legal and judicial systems at all levels and dimensions from the level of society as a whole to the day to day operation of the courts from the institutional dimension of adjudication to the organizational context of judicial decisions Far from being an alien value in the judicial process efficiency has become an inseparable part of the structure of expectations we place on the legal system Second economic rationality is not the prevalent value in legal decision making as it is subject to all kinds of constraints local conditions and concrete negotiations with other values and interests **The**

What? Philipp Sebastian Angermeyer, 2015-04-01 This book presents a study of interpreter mediated interaction in New York City small claims courts drawing on audio recorded arbitration hearings and ethnographic fieldwork *Vulnerable Consumers and the Law* Christine Riefa, Severine Saintier, 2020-10-27 This book charts the difficulties encountered by vulnerable consumers in their access to justice through the contributions of prominent authors academic practitioners and consultants in the field of consumer law and access to justice It demonstrates that despite the development of ADR access to justice is still severely lacking for the vulnerable consumer The book highlights that a broad understanding of access to justice which encompasses good regulation and its public enforcement is an essential ingredient alongside access to the mechanisms of traditional private justice courts and ADR to protect the vulnerable consumer Indeed many of the difficulties are linked to normative obstacles and lack of access to justice is primarily a vulnerability in itself that can exacerbate existing ones In addition because it may contribute to pushing already vulnerable consumers into social exclusion it is not simply about economic justice but also about social justice The book shows that lack of access to justice is not irreversible nor is it necessarily linked to consumer apathy New technologies could provide solutions The book concludes with a plea for developing inclusive justice systems with more emphasis on public enforcement alongside effective courts systems to offer the vulnerable with adequate means to defend themselves This book will be suitable for both students and practitioners and all those with an interest in the justice system *Handbook of Research on International Consumer Law* Geraint G. Howells, I. Ramsay, Thomas Wilhelmsson, 2010 This is a truly international effort and one with a strong commitment to human rights by the highly reputable authors coming from different jurisdictions The many facets of today's consumer law are presented to the reader including developing countries a fascinating effort in a dynamically emerging field of law We are comprehensively informed about such bread and butter areas as advertising unfair terms consumer guarantees product safety and liability consumer credit and redress But traditional consumer law concepts and remedies are facing challenges in more complex areas like services of general internet where consumers and private users should enjoy equal access to universal services with the internet where speed must not be a pretext to eliminate standards of fair dealing with risky investment services under the problematic paradigm shift from investor protection to investor confidence A book to read to think about to work with for everybody interested in the future of consumer markets and law in a time of economic crisis Norbert Reich University of Bremen Germany This is a richly interesting collection of essays written by leading names in the field It offers a thoroughly reliable survey of key tensions and challenges in modern consumer law and brilliantly combines thematic overview with detailed analysis It will stimulate comparative thinking it will provide a source of information and it will be welcomed by consumer law scholars all over the world Stephen Weatherill University of Oxford UK Consumer law and policy has emerged in the last half century as a major policy concern for all nations This Handbook of original contributions provides an international and comparative analysis of central issues in consumer law and policy in developed and developing

economies The Handbook encompasses questions of both social policy and effective business regulation Many of the issues are common to all countries and are becoming increasingly globalised due to the growth in international trade and technological developments such as the Internet The authors provide a broad coverage of both substantive topics and institutional questions concerning optimal approaches to enforcement and the role of class actions in consumer policy It also includes comparative insights into the influential EU and US models of consumer law and relates consumer law to contemporary trends in human rights law Written by a carefully selected group of international experts this text represents an authoritative resource for understanding contemporary and future developments in consumer law This Handbook will provide students researchers and policymakers with an insight to the main policy debates in each context and provide models of legal regulation to assist in the evaluation of laws and the development of consumer law and policy

Law and the Market Economy in China Perry Keller, 2017-07-05 This volume concerns several aspects of China's changing market based economy These include commercial contract enforcement corporate structures competition law and other issues related to China's membership in the WTO In the past two decades the rapid integration of China's economy into the global marketplace has created obligations and expectations of non discrimination and regulatory transparency in domestic markets The Chinese government has responded by demanding better governance within major companies market sectors and public administration generally However as the articles in this volume show it has struggled to find a corporate structure capable of absorbing external equity investment and participation but still amenable to direct and indirect state guidance It has also moved cautiously in creating legal controls over unfair competition Moreover the protection of state owned enterprises which serve as vehicles for domestic economic social and political policy has been a recurring issue in China's WTO trade disputes

Everyday Law in Russia Kathryn Hendley, 2017-02-07

Everyday Law in Russia challenges the prevailing common wisdom that Russians cannot rely on their law and that Russian courts are hopelessly politicized and corrupt While acknowledging the persistence of verdicts dictated by the Kremlin in politically charged cases Kathryn Hendley explores how ordinary Russian citizens experience law Relying on her own extensive observational research in Russia's new justice of the peace courts as well as her analysis of a series of focus groups she documents Russians' complicated attitudes regarding law The same Russian citizen who might shy away from taking a dispute with a state agency or powerful individual to court might be willing to sue her insurance company if it refuses to compensate her for damages following an auto accident Hendley finds that Russian judges pay close attention to the law in mundane disputes which account for the vast majority of the cases brought to the Russian courts Any reluctance on the part of ordinary Russian citizens to use the courts is driven primarily by their fear of the time and cost measured in both financial and emotional terms of the judicial process Like their American counterparts Russians grow more willing to pursue disputes

as the social distance between them and their opponents increases Russians are loath to sue friends and neighbors but are less reluctant when it comes to strangers or acquaintances Hendley concludes that the rule of law rubric is ill suited to Russia and other authoritarian polities where law matters most but not all of the time Federal Role in Criminal Justice and Crime Research United States.
