Smoking A Behavioral Analysis Pergamon General Psychology Series:

Smoking Bernard Mausner, Ellen S. Platt, 2013-10-22 Smoking A Behavioral Analysis is written by two experimental social psychologists. It focuses on the psychological aspect of smoking and the effects that role playing has on it. Comprised of two parts, the first part deals with the reasons that people begin and continue smoking, the environmental and intra-individual support for smoking, the relationship of these supports and the values and expectations concerning the effects of smoking. The second part details an experiment that uses role playing to induce a change in smoking. It includes the background, design, procedure, and the implications of the experiment in the research and control of smoking. The book is a valuable reference for psychologists, medical doctors, experts, and lay people interested in smoking, smoking cessation, and the relationship of behavior to this habit.

Behavioral Approaches to Community Psychology Michael T. Nietzel, Richard A. Winett, Marian L. MacDonald, 2013-10-22 Behavioral Approaches to Community Psychology reviews and evaluates the extension of social learning procedures to various demanding community problems. This book presents the applications of the behavioral paradigm for various social problems including alcoholism, adult offenders, aging, unemployment, drug addiction, juvenile delinquency, environmental protection, psychiatric residence, and problems of the schools. Organized into 12 chapters, this book begins with an overview of the development and patterning of human behavior. This text then examines various research conducted in schools concerning behavioral approaches to educational problems. Other chapters consider the increasing concern and debate for the problems of crime and delinquency. This book discusses as well the concern of the society about opiate drug addiction and abuse. The final chapter deals with the strengthened relation between behaviorists and community psychologists. This book is a valuable resource for social psychologists and graduate students. Applied researchers and practitioners in community health settings will also find this book useful.

Ecological Assessment of Child Problem Behavior: A Clinical Package for Home, School, and Institutional Settings Robert G. Wahler, Alvin E. House, Edward E. Stambaugh, 2013-10-22 Ecological Assessment of Child Problem Behavior: A Clinical Package for Home, School, and Institutional Settings discusses sampling methods to assess the problem child's behavioral interactions in the environment of the real world. The book focuses on the following facets of ecological assessment: 1. format of interview for the stage during the observational sampling procedures; 2. use of an observational procedure by adult members of the child's natural community; and 3. the employment of a standardized category coding system. In general, the book deals with devising a standardized category codes that will be used in direct observations of a clinical nature. The book shows that investigators of various theoretical merits attempt to construct category systems to systematize coding behavior such as those of Heyns and Lippitt 1954, of Baker and Wright 1955, or of McGrew 1972. The authors enumerate the category codes to describe different aspects of children's social environments and their common behaviors that result from these settings. Behavioral scientists, psychiatrists, child psychologists, students, and professors in the sciences of human behavior, particularly concerning children,

are encouraged to read this book **The Human Subject in the Psychological Laboratory** I. Silverman, 2013-10-22
 Written for anyone who does or plans to do behavioral research this book is based on the thesis that the psychological laboratory is a special place for people brought there as subjects Accordingly subjects act in ways that bear little relationship to their behaviours in the life situations to which psychologists seek to generalize their findings An analysis is given of the motives feelings and intentions common to people who assume the role of psychological subjects The ways in which their responses confound data and lead to spurious conclusions are described Interpersonal Communication Kurt Danziger, 2016-06-06
