Research Relating to Children, 1953 *Children's Peer Relations: Issues in Assessment and Intervention* B. H.

Schneider, K. H. Rubin, J. E. Ledingham, 2012-12-06 Willard W Hartup This volume amounts to an anniversary collection It was 50 years ago that Lois Jack 1934 published the findings from what most investigators consider to be the first intervention study in this area The experiment later replicated and extended by Marjorie Page 1936 and Gertrude Chittenden 1942 concerned ascendant behavior in preschool children which was defined to include a The pursuit of one's own purposes against interference and b directing the behavior of others Individual differences in ascendance were assumed to have some stability across time and hence to be important in personality development But ascendance variations were also viewed as a function of the immediate situation Among the conditions assumed to determine ascendance were the individual's status in the group as expressed in others' attitudes toward him his conception of these attitudes and his previously formed social habits Jack 1934 p 10 Dr Jack's main interest was to show that nonascendant children identified on the basis of observations in the laboratory with another child were different from their more ascendant companions in one important respect They lacked self confidence And having demonstrated that Dr Jack devised a procedure for teaching the knowledge and skill to nonascendant children that the play materials required She guessed correctly that this training would bring about an increase in the ascendance scores of these children *Handbook of Child Psychopathology* Michel Hersen, 2013-11-11 Although the field of child psychopathology is of relatively recent origin it is a healthy burgeoning one Within the past 10 to 20 years numerous articles and books have been published and the field can now be described as emerging with an identity of its own No longer can child psychopathology be viewed simply as a downward extension of adult psychopathology Rather children must be viewed as children not as miniature adults Such a situation requires that issues of child psychology and developmental psychology be intimately considered when delineating the problems of children Such a focus has guided our efforts in soliciting contributors and topics for this volume All contributors are active researchers and clinicians in the area of child psychopathology and all are acutely aware of the special considerations of child and developmental psychology as they relate to child behavior problems Further all contributors are empirically minded consequently the various chapters are data based and represent the most up to date knowledge available However since research based knowledge is more abundant in some topic areas than in others the chapters vary in length and scope Developmental Disabilities Abstracts, 1978

Child and Adolescent Development William Damon, Richard M. Lerner, 2008-03-14 This advanced text for psychology human development and education provides students with state of the art overviews of the discipline in an accessible affordable format Unique both in the depth of its coverage and in the timeliness of the research that it presents this

comprehensive text conveys the field of child and adolescent development through the voices of scientists who themselves are now shaping the field **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1971 First multi year cumulation covers six years 1965 70 Child and Adolescent Development for Educators Christi Crosby Bergin,David Allen Bergin,Sue Walker,Graham Daniel,Angela Fenton,Pearl Subban,2018-09-01 Child and Adolescent Development for Educators covers development from early childhood through high school This text provides authentic research based strategies and guidelines for the classroom helping future teachers to create an environment that promotes optimal development in children The authors apply child development concepts to topics of high interest and relevance to teachers including classroom discipline constructivism social emotional development and many others Child and Adolescent Development for Educators combines the core theory with practical implications for educational contexts and shows how child development links to the Australian Professional Standards for Graduate Teachers Case studies and real world vignettes further bridge the distance between research and the classroom Along with strong coverage of key local research such as the Longitudinal Study of Australian Children and Longitudinal Study of Indigenous children *Solidarity and Prosocial Behavior* Detlev Fetchenhauer,Andreas Flache,Abraham Buunk,Sigwaart Lindenberg,2006-08-29 This book is the product of an intensive cooperation between psych ogists and sociologists who study solidarity and prosocial behavior and its fruits are briefly summarized in Chapter 1 The topics of so darity and prosocial behavior are at the core of both disciplines and thus one might expect that an intensive cooperation like the one that produced this book is not uncommon Surprisingly however it is extremely rare that sociologists and psychologists get together to c bine their knowledge in these fields Instead researchers from both disciplines tend to ignore each other s work quite generally and the work on prosocial and antisocial behavior is no exception The conviction that sociology and psychology can benefit from each other s work led us a group of sociologists and psychologists at the University of Groningen The Netherlands in 1999 to launch a joint research project on solidarity and prosociality The aim was to find a common ground on which insights from each discipline could contribute to a broader understanding of solidarity and prosocial behavior This interdisciplinary research project was called Prosocial Dispositions and Solidary Behavior and it was financed by the University of Groningen as a so called breedtestrategie program i e a program for broadening disciplinary approaches
