The Post-Communist World in the Twenty-First Century Barbara Ann Chotiner, Linda J. Cook, 2022-06-28 The Post Communist

World in the Twenty First Century presents studies by senior scholars and practitioners that are highly relevant to contemporary political challenges The democratic vision that accompanied the collapse of communist regimes in the Soviet Union and East Central Europe has been replaced by a range of authoritarian semi authoritarian and democratic regimes and growing division between Western and Russian influence Russia s invasion of Ukraine has led to renewed tensions and international crisis China which presents major challenges to the US Europe and the global order has emerged as a critical actor in the international conflict The need to understand the internal dynamics and international behavior of communist and authoritarian regimes is more urgent at this time The expertise provided by the volume s contributors is especially timely offering new insights into the past and contemporary politics of these states the agendas driving their behavior regimes domestic strengths and weaknesses and the role of leaders differing perceptions in exacerbating international conflict Practitioners demonstrate how such knowledge can inform effective policy and ameliorative efforts

Intermarium Marek Jan Chodakiewicz, 2017-09-08 History and collective memories influence a nation its culture and institutions hence its domestic politics and foreign policy That is the case in the Intermarium the land between the Baltic and Black Seas in Eastern Europe The area is the last unabashed rampart of Western Civilization in the East and a point of convergence of disparate cultures Marek Jan Chodakiewicz focuses on the Intermarium for several reasons Most importantly because as the inheritor of the freedom and rights stemming from the legacy of the Polish Lithuanian Ruthenian Commonwealth it is culturally and ideologically compatible with American national interests It is also a gateway to both East and West Since the Intermarium is the most stable part of the post Soviet area Chodakiewicz argues that the United States should focus on solidifying its influence there The ongoing political and economic success of the Intermarium states under American sponsorship undermines the totalitarian enemies of freedom all over the world As such the area can act as a springboard to addressing the rest of the successor states including those in the Caucasus Central Asia and the Russian Federation Intermarium has operated successfully for several centuries It is the most inclusive political concept within the framework of the Commonwealth By reintroducing the concept of the Intermarium into intellectual discourse the author highlights the autonomous and independent nature of the area This is a brilliant and innovative addition to European Studies and World Culture

The Colors of Poverty Ann Chih Lin, David R. Harris, 2008-08-14 Given the increasing diversity of the nation particularly with respect to its growing Hispanic and Asian populations why does racial and ethnic difference so often lead to disadvantage In The Colors of Poverty a multidisciplinary group of experts provides a breakthrough analysis of the complex mechanisms that connect poverty and race The Colors of Poverty reframes the debate over the causes of minority poverty by emphasizing the cumulative effects of disadvantage in perpetuating poverty across generations The contributors consider a kaleidoscope of factors that contribute to widening racial gaps including education racial discrimination social capital immigration and incarceration Mich le Lamont and Mario Small grapple with the theoretical ambiguities of existing cultural

explanations for poverty disparities They argue that culture and structure are not competing explanations for poverty but rather collaborate to produce disparities Looking at how attitudes and beliefs exacerbate racial stratification social psychologist Heather Bullock links the rise of inequality in the United States to an increase in public tolerance for disparity She suggests that the American ethos of rugged individualism and meritocracy erodes support for antipoverty programs and reinforces the belief that people are responsible for their own poverty Sociologists Darren Wheelock and Christopher Uggen focus on the collateral consequences of incarceration in exacerbating racial disparities and are the first to propose a link between legislation that blocks former drug felons from obtaining federal aid for higher education and the black white educational attainment gap Joe Soss and Sanford Schram argue that the increasingly decentralized and discretionary nature of state welfare programs allows for different treatment of racial groups even when such policies are touted as race neutral They find that states with more blacks and Hispanics on welfare rolls are consistently more likely to impose lifetime limits caps on benefits for mothers with children and stricter sanctions The Colors of Poverty is a comprehensive and evocative introduction to the dynamics of race and inequality The research in this landmark volume moves scholarship on inequality beyond a simple black white paradigm beyond the search for a single cause of poverty and beyond the promise of one magic bullet solution A Volume in the National Poverty Center Series on Poverty and Public Policy **Central and Eastern**

Europe After Transition Wojciech Sadurski, 2016-04-08 How have national identities changed developed and reacted in the wake of transition from communism to democracy in Central and Eastern Europe Central and Eastern Europe After Transition defines and examines new autonomous differences adopted at the state and the supranational level in the post transitional phase of the post Communist area and considers their impact on constitutions democracy and legal culture With representative contributions from older and newer EU members the book provides a broad set of cultural points for reference Its comparative and interdisciplinary approach includes a useful selection of bibliographical resources specifically devoted to the Central Eastern European countries transitions **Reimagining the International Legal Order** Vesselin

Popovski, Ankit Malhotra, 2023-07-24 International law is usually conservative with lawyers and judges emphasizing consistency stability and predictability as the major advantages of the law Legal scholars often prefer not to challenge the status quo to suggest amendments or to reform institutions advocating simply to focus on the implementation of the laws that already exist This collection stands different It shares the authors discomfort with the present legal order and some of its institutions and courts and dives into either a corrective or a profound reimagination of these so that they can better address rising global challenges Leading experts in their areas present their new and cutting edge perspectives Divided into six parts the volume paints a vast yet solid thematic landscape of unique and critical approaches The book invites and allows for a deep engagement with a wide range of opinions from across the world It enables a free and courageous reimagining of the international legal order detached from the endless feasibility skepticism The work will be fascinating reading for students

academics and researchers working in the areas of International Law and International Relations *Ukrainian Intelligentsia in Post-Soviet L'viv* Eleonora Narvselius, 2012-04-05 Intelligentsia assumes the right to speak in the name of the entire nation and to extrapolate its own tastes values and choices to it Therefore intelligentsia s voices have been in many ways decisive in the discussions about Ukrainian national identity which gained momentum in the post Soviet Ukrainian society The historical and cultural cityscape of L'viv is an especially apt site for investigation of the nexus intelligentsia nation not only in the Ukrainian but in the East Central European context This borderline city while not being a remarkable industrial administrative or political centre has acquired the reputation of a site of unique cultural production and a principal center of the Ukrainian nationalist movement throughout the twentieth century Here the popular conceptions of intelligentsia have been elaborated at the intersection of various cultural historical and political traditions This study addresses Ukrainian speaking intelligentsia and intellectuals in L'viv both as a discursive phenomenon and as the social category of cultural producers who in the new circumstances both articulate the nation and are articulated by it
