Finkel, 2010-06-28 Social psychology is a flourishing discipline It explores the most essential questions of the human psyche e g Why do people help or harm others How do influence professionals get us to do what they want and how can we inoculate ourselves against their sometimes insidious persuasion tactics Why do social relationships exert such powerful effects on people s physical health and it does so with clever ingenuitive research methods This edited volume is a textbook for advanced social psychology courses Its primary target audience is first year graduate students MA or PhD in social psychology although it is also appropriate for upper level undergraduate courses in social psychology and for doctoral students in disciplines connecting to social psychology e g marketing organizational behavior The authors of the chapters are world renowned leaders on their topic and they have written these chapters to be engaging and accessible to students who are just learning the discipline After reading this book you will be able to understand almost any journal article or conference presentation in any field of social psychology You will be able to converse competently with most social psychologists in their primary research domain a use skill that is relevant not only in daily life but also when interviewing for a faculty position And most importantly you will be equipped with the background knowledge to forge ahead more confidently with your own research Attribution Gifford Weary, Melinda A. Stanley, John H. Harvey, 2012-12-06 This book initially was conceived in 1986 by Weary and Harvey as a revision and update of their 1981 *Perspectives on Attributional Processes* published by Wm C Brown Dubuque Iowa However toe extensive

nature of recent work on attributional processes and the opportunity to collaborate with Melinda Stanley as a coauthor led to a plan to develop a more comprehensive work than the 1981 book. It definitely is an amalgam of our interests in social and clinical psychology. It represents our commitment to basic theoretical and empirical inquiry blended with the applications of ideas and methods to understanding attribution in more naturalistic settings and as it unfolds in the lives of different kinds of people coping with diverse problems of living. The book represents a commitment also to the breadth of approach to attribution questions epitomized by Fritz Heider's uniquely creative mind and work in pioneering the area. To us the attributional approach is not a sacrosanct school of thought on the human condition. It is rather a body of ideas and findings that we find to be highly useful in our work as social JH and GW and clinical GW and MS psychology scholars. It is an inviting approach that as we shall describe in the book brings together ideas and work from different fields in psychology all concerned with the pervasive and inestimable importance of interpretive activity in human experience and behavior. A

Functional Theory of Cognition Norman H. Anderson, 2014-03-05 A unified general theory of functional cognition is presented in this book. Its generality appears in the titles of the 13 chapters listed below. Its unity appears in the effectiveness of the same methods and concepts across all of these areas. Generality and unity both stem from the foundation axiom of purposiveness. The axiom of purposiveness has been made effective through capability for functional measurement of values which embody the goal directed character of purposiveness. This measurement capability is based on the general cognitive algebra established in information integration theory. Functional theory can thus be made precise and effective near the level of everyday phenomenology. The book is written at a relatively simple level directed at readers in every field of psychology. Among its characteristics are self-sufficient theory near the level of everyday phenomenology, foundation on structure of the internal world and solid grounding in experimental analysis. *Lay Epistemics and Human Knowledge* Arie W.

Kruglanski, 2013-06-29 Whatever your reasons, kind reader, for reading these words, whatever your premises about forewords, whatever the epistemic motivation with which you approach them, let me urge you to turn immediately to Kruglanski's first chapter and skim it. If any enthusiasm for social psychology flows in your veins, you will certainly proceed then to read further in this important book. It represents some dozen years of Arie's thought and of his and his colleagues' research. Its intellectual scope covers 50 years of social psychology from attitudes and attitude change to balance dissonance and the various other cognitive consistency theories to causal attribution and to current cognitive social psychology. Social psychologists have recently begun to leave the fireside coziness of scribbling textbook catalogues of our field and to venture out into the cold outdoor adventure of detecting or creating its underlying structure. Of these attempts at providing scope plus order, Kruglanski's must surely be the most ambitious. For his is no mere overarching theory which like a circus tent over a diverse set of sideshows covers everything but does little to provide thematic structure. Rather, Kruglanski tries to produce a basic reorganization of our thinking about social psychology. To use his LEGO blocks metaphor for the modification of knowledge

structures he attempts to dismantle the current assembly of elements of our field and reassemble them into a simpler and more coherent configuration *The Rhetoric of the Human Sciences* John S. Nelson, Allan Megill, Deirdre N. McCloskey, 1987 Opening with an overview of the renewal of interest in rhetoric for inquiries of all kinds this volume addresses rhetoric in individual disciplines mathematics anthropology psychology economics sociology political science and history Drawing from recent literary theory it suggests the contribution of the humanities to the rhetoric of inquiry and explores communications beyond the academy particularly in women's issues religion and law The final essays speak from the field of communication studies where the study of rhetoric usually makes its home **The Handbook of Attitudes** Dolores Albarracín, Blair T. Johnson, Mark P. Zanna, 2014-04-04 This new handbook presents synthesizes and integrates the existing knowledge of methods theories and data in attitudes The editors goal is to promote an understanding of the broader principles underlying attitudes across several disciplines Divided into three parts one on definitions and methods another on the relations of attitudes with beliefs behavior and affect and a final one that integrates these relations into the broader areas of cognitive processes communication and persuasion social influence and applications the handbook also features an innovative chapter on implicit versus explicit attitudes With contributions from the top specialists this handbook features unique collaborations between researchers some who have never before worked together Every writer was encouraged to work from as unbiased a perspective as possible A must have for researchers in the areas of social political health clinical counseling and consumer psychology marketing and communication the handbook will also serve as an excellent reference for advanced courses on attitudes in a variety of departments **Advertising Exposure, Memory and Choice** Andrew A. Mitchell, 2013-06-17 Theoretical research on advertising effects at the individual level has focused almost entirely on the effects of advertising exposure on attitudes and the mediators of attitude formation and change This focus implicitly assumes attitudes are a good predictor of behavior which they generally are not and downplays the role of memory in that there is generally a considerable amount of time between advertising exposure and purchase decisions in most marketing situations Recently a number of researchers have developed conceptual models which provide an explicit link between two separate events advertising exposure and purchase behavior with memory providing the link between these events Originally presented at the eighth annual Advertising and Consumer Psychology Conference held in Toronto some chapters in this volume present recent research on the role of inferences in advertising situations the effects of exposure to multiple advertisements message receptivity drama advertisements and the use of EEG in measuring advertising effectiveness Contributions focus on research examining the effects of advertising exposure on consumer information processing and decision making This book will be of interest to consumer psychologists and professionals in advertising and marketing
